**Into the Looking Glass** John Ringo, 2005-06-01 WORST TWO OUT OF THREE When a 60 kiloton nuclear explosion destroys the University of Central Florida, terrorism is the first suspect. But terrorists don't generally leave doorways to another world in their wake. Or, rather, a generator of doorways to multiple other worlds. With time of the essence, the Secretary of Defense scrounges up the nearest physicist with a high level security clearance. With doctorates in everything from nuclear physics to electrical engineering, William Weaver, PhD, is the egghead's egghead. On the other hand, with skills in everything from mountain biking to screaming electric guitar, he's also fast enough and tough enough to survive when the alien gates start disgorging demons. As a snap decision, he appears to be the perfect choice, smart, tough and capable. Now if he could only patch things up with his girlfriend, get his boss off his back and get his cellphone bill paid. Oh, yeah, and figure out why the heck these gates keep opening. Okay, so sometimes he's got priority issues. As the gates spread and evil aliens spread with them, it is

up to Weaver and SEAL Command Master Chief Miller to find a way to stop the proliferation and close the hostile gates. The problem being that the only way they can see to save the earth is destroy it. Then there's not going to be any more girlfriends or cellphones or bosses . . . Hmmm... Okay, two out of three of those are bad. They're really, really bad. Bad on toast. Bad like the Pacific is watery. Every day a Monday, bad. One and a half at the very least. Worst two out of three. Gotta prioritize. Guess Weaver and Miller are just gonna have to save the world. At the publisher's request, this title is sold without DRM (Digital Rights Management).

*Architecture for Residential Care and Ageing Communities* Sten Gromark, Björn Andersson, 2020-10-19 Architecture for Residential Care and Ageing Communities confronts urgent architectural design challenges within residential innovation, ageing communities and healthcare environments. The increasing and diversified demands on the housing market today call for alterability and adaptability in long term solutions for new integrated ways of residing. Meanwhile, an accentuated ageing society requires new residential ways of living, combining dignity, independence and appropriate care. Concurrently, profound changes in technical conditions for home healthcare require rethinking healing environments. This edited collection explores the dynamics between these integrated architectural and caring developments and intends to envision reconfigured environmental design patterns that can significantly enhance new forms of welfare and ultimately, an improved quality of life. This book identifies, presents, and articulates new qualities in designs, in caring processes, and healing atmospheres, thereby providing operational knowledge developed in close collaboration with academics, actors and stakeholders in architecture, design, and healthcare. This is an ideal read for those interested in health promotive situations of dwelling, ageing and caring.

*Cross-Cultural Management* Jasmin Mahadevan, 2023-03-11 This timely textbook is contemporary and comprehensive in its coverage of Cross-Cultural Management, and unique in its approach which fosters a multi-paradigmatic mindset among readers; embraces problem-based and experiential learning; and acknowledges the many diverse identities of cross-cultural managers. Part I provides an overview on how Cross-Cultural Management emerged and why it is unique, and Part II integrates the functionalist, interpretive and critical perspectives underpinning it. Part III transfers this learning to areas of application, including international business, organizations, technology and social media, and Part IV focuses on key skillsets such as developing your managerial competencies and designing your own research. Each chapter is brought to life via an opening case study, and readers are invited to complete a variety of activities throughout chapters. Afterwards, the opening case is revisited, and a closing activity introduces the next area of learning. This textbook is essential reading for higher education students,

educators and researchers alike, and will also be of interest to business and management practitioners. It can be used as a central text for university and college courses on and related to Cross-Cultural Management, International Business and general intercultural competencies. *Security in the Bubble* Christine Hentschel, 2015-08-08 Focusing on the South African city of Durban, *Security in the Bubble* looks at spatialized security practices, engaging with strategies and dilemmas of urban security governance in cities around the world. While apartheid was spatial governance at its most brutal, postapartheid South African cities have tried to reinvent space, using it as a “positive” technique of governance. Christine Hentschel traces the contours of two emerging urban regimes of governing security in contemporary Durban: handsome space and instant space. Handsome space is about aesthetic and affective communication as means to making places safe. Instant space, on the other hand, addresses the crime-related personal “navigation” systems employed by urban residents whenever they circulate through the city. While handsome space embraces the powers of attraction, instant space operates through the powers of fleeing. In both regimes, security is conceived not as a public good but as a situational experience that can. No longer reducible to the after-pains of racial apartheid, this city’s fragmentation is now better conceptualized, according to Hentschel, as

a heterogeneous ensemble of bubbles of imagined safety.

Designing Mind-Friendly Environments Steve Maslin, 2021-12-21 Exploring the impact of the built environment and design on people with a range of neurological experiences, including autism, dementia, dyslexia and dyspraxia, this comprehensive guide provides project commissioners, architects and designers with all the information and personal insight they need to design, create and build 'mind-friendly' environments for everyone. Assimilating knowledge from medical, therapeutic, social and educational spheres, and using sensory integration theory, the book explores the connection between our minds and our surroundings and considers the impact of the environment on the senses, well-being and neurodiverse needs of people. The book shows how design adaptations to lighting, acoustics, temperature, surfaces, furniture and space can positively benefit the lives of everyone across a range of environments including workplaces, retail, sport and leisure, domestic, educational institutions, cultural and civic spaces, outdoor spaces and places of worship. Universal in its approach and written by an experienced architect and inclusive design consultant, this book is essential reading for professionals in architecture and design, education, organisational psychology, business management and occupational therapy.
