Colin Mason

**The Aliens and the Scalpel** Roger K. Leir, 2005-12 The personal story of a professional physician's work involving one of the greatest breakthroughs of all time -- scientific proof that anomalous bio-electromagnetic implants of extraterrestrial origin have been removed from persons reporting alien abduction experiences. This revised and updated book includes and is supported by new scientific reports and a new photo gallery section. The evidence presented here provides enough evidence to believe that we have cosmic companions and they here with us now.

*Cosmic Test Tube* Randall Fitzgerald, 1998 By the author of *The complete book of extraterrestrial encounters* (1979). Provides descriptive summaries of over 150 books on ancient astronauts, UFO contactees/abductees, debunkers and skeptics and the search for radio signals from space.

Atlas Obscura, 2nd Edition Joshua Foer, Ella Morton, Dylan Thurau, 2019-10-15 Discover wonder. "A wanderlust-whetting cabinet of curiosities on paper."— *New York Times* Inspiring equal parts wonder and wanderlust, *Atlas Obscura* is a phenomenon of a travel book that shot to the top of bestseller lists when it was first published and changed the way we think about the world, expanding our sense of how strange and marvelous it really is. This second edition takes readers to even more curious and unusual destinations, with more than 100 new places, dozens and dozens of new photographs, and two very special features: twelve city guides, covering Berlin, Budapest, Buenos Aires, Cairo, London, Los Angeles, Mexico City, Moscow, New York City, Paris, Shanghai, and Tokyo. Plus a foldout map with a dream itinerary for the ultimate around-the-world road trip. More a cabinet of curiosities than traditional guidebook, *Atlas Obscura* revels in the unexpected, the overlooked, the bizarre, and the mysterious. Here are natural wonders, like the dazzling glowworm caves in New Zealand, or a baobab tree in South Africa so large it has a pub inside where 15 people can sit and drink comfortably. Architectural marvels, including the M. C. Escher-like stepwells in India. Mind-boggling events, like the Baby-Jumping Festival in Spain—and no, it's not the babies doing the jumping, but masked men dressed as devils who vault over rows of squirming infants. Every page gets to the very core of why humans want to travel in the first place: to be delighted and disoriented, uprooted from the familiar and amazed by the new. With its compelling descriptions, hundreds of photographs, surprising charts, maps for every region of the world, and new city guides, it is a book you can open anywhere and be transported. But proceed with caution: It's almost impossible not to turn to the next entry, and the next, and the next.

*The 2030 Spike* Colin Mason, 2013-06-17 The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

Crash at Corona Don Berliner, Stanton T. Friedman, 2010-04-01 IF UFOS DON'T EXIST, THEN THEY CAN'T CRASH. But something did crash near Corona, a tiny town not far from Roswell, New Mexico, in 1947. And that crash has been dissected and debated ever since. Aviation/science writer Don Berliner and nuclear physicist Stanton Friedman, the original civilian investigator of the so-called Roswell incident, have delved into the controversy to find the truth. They sifted through once-classified government documents, interviewed military and civilian witnesses, pieced together evidence, considered alternative theories, and concluded that a UFO crashed near Corona-and the U.S. government knew it and covered it up. Crash at Corona proves that what was found in the New Mexico desert wasn't a weather balloon or a secret weapon-it was a UFO. One of the more credible books arguing the existence of UFOs...Most arresting of all is the testimony of those who handled the debris, who had no opportunity to compare notes, yet have described the materials ...in almost identical language.-Publishers Weekly DON BERLINER has written more than 300 magazine articles and 25 books on aviation history and space and was also a staff writer for the National Investigations Committee on Aerial Phenomena (NICAP). He is board chairman of the non-profit Fund for UFO Research, Inc., and is a delegate to the UFO Research Coalition. STANTON T. FRIEDMAN is a nuclear physicist who has worked for General Electric, General Motors, Westinghouse, and other corporations. He is also the author of TOP SECRET/MAJIC and has appeared on Larry King, Unsolved Mysteries, and Nightline, and was involved with the documentaries UFOs Are Real and Flying Saucers Are Real. He was the final speaker at the fiftieth anniversary conference at the International UFO Museum and Research Center at Roswell, and has given more than 700 lectures on the subject of UFOs.

*Nightmare Movies* Kim Newman, 2011-04-18 Now over twenty years old, the original edition of Nightmare Movies has retained its place as a true classic of cult film criticism. In this new edition, Kim Newman brings his seminal work completely up-to-date, both reassessing his earlier evaluations and adding a second part that assess the last two decades of horror films with all the wit, intelligence and insight for which he is known. Since the publication of the first edition, horror has been on a gradual upswing, and taken a new and stronger hold over the film industry. Newman negotiates his way through a vast back-catalogue of horror, charting the on-screen progress of our collective fears and bogeymen from the low budget slasher movies of the 60s, through to the slick releases of the 2000s, in a critical appraisal that doubles up as a genealogical study of contemporary horror and its forebears. Newman invokes the figures that fuel the ongoing demand for horror - the serial killer; the vampire; the werewolf; the zombie - and draws on his remarkable knowledge of the genre to give us a comprehensive overview of the modern myths that have shaped the imagination of multiple generations of cinema-goers. Nightmare Movies is an invaluable companion that not only provides a newly updated history of the darker side of film but a truly entertaining guide with which to discover the less well-trodden paths of horror, and re-discover the classics with a newly instructed eye.

A Hugo Award-winning Novel! "Vinge is one of the best visionary writers of SF today."-David Brin Thousands of years in the future, humanity is no longer alone in a universe where a mind's potential is determined by its location in space, from superintelligent entities in the Transcend, to the limited minds of the Unthinking Depths, where only simple creatures, and technology, can function. Nobody knows what strange force partitioned space into these regions of thought, but when the warring Straumli realm use an ancient Transcendent artifact as a weapon, they unwittingly unleash an awesome power that destroys thousands of worlds and enslaves all natural and artificial intelligence. Fleeing this galactic threat, Ravna crash lands on a strange world with a ship-hold full of cryogenically frozen children, the only survivors from a destroyed space-lab. They are taken captive by the Tines, an alien race with a harsh medieval culture, and used as pawns in a ruthless power struggle. **The Origin of Consciousness in the Breakdown of the Bicameral Mind** Julian Jaynes, 2000-08-15 National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, *The New Yorker* "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—American Journal of Psychiatry

Barbarian's Touch Ruby Dixon, 2024-01-02 The next novel in the Ice Planet Barbarians series, an international publishing phenomenon—now in a special print edition with a bonus new epilogue! Lila

has never been more frightened in her life, but when Roka appears, everything changes. When I wake up on the ice planet, I'm scared of everything: This place is cold, silent, and the locals look more like blue devils than aliens. To make matters worse, one of the strangers decides I'm going to be his girlfriend and kidnaps me away from my sister. I'm completely and utterly alone. What's a girl to do? Well, this girl escapes. Of course, that means I go from the frying pan into the fire, and my situation gets even more dangerous. Just when I have no hope left, a new hero shows up. Sure, he's blue, horned, and has a tail. He's also fierce, protective, makes me purr...and thinks I'm perfect. But is what we have real or just a mating instinct?

*UFO Crash at Roswell* Benson Saler, Charles A. Ziegler, Charles Moore, 2010-06-22 In the summer of 1947 something mysterious crashed in the New Mexican desert near the town of Roswell. Whether it was an alien spacecraft manned by tiny humanlike beings or—the US government's official explanation—a scientific research balloon has long been a subject of passionate debate. Transcending the believer-versus-skeptic debate, anthropologists Benson Saler and Charles A. Ziegler contend that the Roswell story is best understood as a modern American myth. They show how the story—and its continual retelling—tap into modern fears about the power of technology, the duplicity of the government, and the power of the media. *UFO Crash at Roswell* also includes physicist Charles Moore's meticulous account of how 1947 experiments to launch balloon-borne radar reflectors may have led to the Roswell UFO myth.

*Contemporary Musicians* Tracie Ratiner, 2009-04 Provides biographical information on important figures in today's musical arena, covering artists working in all genres of modern music, including rock, jazz, pop, rap, rhythm and blues, folk, New Age, country, gospel and reggae.

*The Encyclopedia of Fantastic Film* R. G. Young, 2000 Thirty-five years in the making, and destined to be the last word in fanta-film references! This incredible 1,017-page resource provides vital credits on over 9,000 films (1896-1999) of horror, fantasy, mystery, science fiction, heavy melodrama, and film noir. Comprehensive cast lists include: directors, writers, cinematographers, and composers.
