The Landmark Julius Caesar Kurt A. Raaflaub,2019-02-05 The Landmark Julius Caesar is the definitive edition of the five works that chronicle the military campaigns of Julius Caesar. Together, these five narratives present a comprehensive picture of military and political developments leading to the collapse of the Roman republic and the advent of the Roman Empire. The Gallic War is Caesar's own account of his two invasions of Britain and of conquering most of what is today France, Belgium, and Switzerland. The Civil War describes the conflict in the following year which, after the death of his chief rival, Pompey, and the defeat of Pompey's heirs and supporters, resulted in Caesar's emergence as the sole power in Rome. Accompanying Caesar's own commentaries are three short but essential additional works, known to us as the Alexandrian War, the African War, and the Spanish War. These were written by three unknown authors who were clearly eyewitnesses and probably Roman officers. Caesar's clear and direct prose provides a riveting depiction of ancient warfare and, not incidentally, a persuasive portrait for the Roman people (and for us) of Caesar himself as a brilliant, moderate, and effective leader—an image that was key to his final success. Kurt A. Raaflaub's masterful translation skillfully brings out the clarity and elegance of Caesar's style, and this, together with such Landmark features as maps, detailed annotations, appendices, and illustrations, will provide every reader from lay person to scholar with a rewarding and enjoyable experience. (With 2-color text, maps, and illustrations throughout; web essays available at <http://www.thelandmarkcaesar.com/>)

Birthing Eternity Jane Elizabeth Cody,2013-04 Are we living in what the Bible calls the Last Days? It feels like it, but how can you know for certain? What if everything you have been taught about the End Times is wrong? What if the doctrines of well-meaning theologians who lived in a day before planes, trains, and automobiles, before phones, TVs, and satellite communications, are as helpful as the understanding of an elephant provided by the four proverbial blind men? Based on their limited knowledge, gleaned from what their hands have touched, they proclaim an elephant is like a rope, a snake, a tree, a fan. With the clarity of sight, we know none of these accurately describes an elephant! Birthing Eternity makes a compelling case to take off your theological blindfolds and examine the elephant standing before you. By tracing the correlation between documented history and the biblical prophecy, Birthing Eternity will give you answers that are both unexpected and profound. Find out how God has fulfilled His Word in astounding detail and gain critical insight about current events that are on everyone's mind in this unsettled and challenging time. Birthing Eternity makes the Last Days easy to understand. It is proof that the message of End Times Scripture does not require top-secret information, prophetic visions, or a degree in theology. It is simply a matter of connecting the dots between what is plainly stated in Scripture and human events. More than that, you will find assurance that the unfolding of Last Days events isn't something to be feared, but rather an exciting adventure. No matter what, there is hope for a bright future—including eternity.

Uncertainty Modeling In Knowledge Engineering And Decision Making - Proceedings Of The 10th International Flins Conference Cengiz Kahraman,Faik Tunc Bozbura,Etienne E Kerre,2012-08-10 FLINS, originally an acronym for Fuzzy Logic and Intelligent Technologies in Nuclear Science, is now extended to Computational Intelligence for applied research. The contributions to the 10th of FLINS conference cover state-of-the-art research, development, and technology for computational intelligence systems, both from the foundations and the applications points-of-view.

Semantic Web Michael Workman,2015-08-27 This book examines recent developments in semantic systems that can respond to situations and environments and events. The contributors to this book cover how to design, implement and utilize disruptive technologies. The editor discusses the two fundamental sets of disruptive technologies: the development of semantic technologies including description logics, ontologies and agent frameworks; and the development of semantic information rendering and graphical forms of displays of high-density time-sensitive data to improve situational awareness. Beyond practical illustrations of emerging technologies, the editor proposes to utilize an incremental development method called knowledge scaffolding –a proven educational psychology technique for learning a subject matter thoroughly. The goal of this book is to help readers learn about managing information resources, from the ground up and reinforcing the learning as they read on.

Applied Data Analysis for Urban Planning and Management Alasdair Rae,Cecilia Wong,2021-09-08 This book showcases the different ways in which contemporary forms of data analysis are being used in urban planning and management. It highlights the emerging possibilities that city-regional governance, technology and data have for better planning and urban management - and discusses how you can apply them to your research. Including perspectives from across the globe, it's packed with examples of good practice and helps to demystify the process of using big and open data. Learn about different kinds of emergent data sources and how they are processed, visualised and presented. Understand how spatial analysis and GIS are used in city planning. See examples of how contemporary data analytics methods are being applied in a variety of contexts, such as 'smart' city management and megacities. Aimed at upper undergraduate and postgraduate students studying spatial analysis and planning, this timely text is the perfect companion to enable you to apply data analytics approaches in your research.

The Semantic Web: Research and Applications Sean Bechhofer,2008-05-20 This book constitutes the refereed proceedings of the 5th European Semantic Web Conference, ESWC 2008, held in Tenerife, Canary Islands, Spain, in June 2008. The 51 revised full papers presented together with 3 invited talks and 25 system description papers were carefully reviewed and selected from a total of 270 submitted papers. The papers are organized in topical sections on agents, application ontologies, applications, formal languages, foundational issues, learning, ontologies and natural language, ontology alignment, query processing, search, semantic Web services, storage and retrieval of semantic Web data, as well as user interfaces and personalization.

Smart Wireless Acoustic Sensor Network Design for Noise Monitoring in Smart Cities Rosa Ma Alsina-Pagès,Patrizia Bellucci,Giovanni Zambon,2021-01-15 The Environmental Noise Directive (END) requires that a five-year updating of noise maps is carried out to check and report on the changes that have occurred during the reference period. The updating process is usually achieved using a standardized approach consisting of collecting and processing information through acoustic models to produce the updated noise maps. This procedure is time consuming and costly, and has a significant impact on the financial statement of the authorities responsible for providing the maps. Furthermore, the END requires that easy-to-read noise maps are made available to the public to provide information on noise levels and the subsequent actions to be undertaken by local and central authorities to reduce noise impacts. In order to update the noise maps more easily and in a more effective way, it is convenient to design an integrated system incorporating real-time noise measurement and signal processing to identify and analyze the noise sources present in the mapping area (e.g., road traffic noise, leisure noise, etc.) as well as to automatically generate and present the corresponding noise maps. This wireless acoustic sensor network design requires transversal knowledge, from accurate hardware design for acoustic sensors to network structure design and management of the information with signal processing to identify the origin of the measured noise and graphical user interface application design to present the results to end users. This book is collection in which several views of methodology and technologies

required for the development of an efficient wireless acoustic sensor network from the first stages of its design to the tests conducted during deployment, its final performance, and possible subsequent implications for authorities in terms of the definition of policies. Contributions include several LIFE and H2020 projects aimed at the design and implementation of intelligent acoustic sensor networks with a focus on the publication of good practices for the design and deployment of intelligent networks in other locations.

Textbook of Pediatric Rheumatology Ross E. Petty, Ronald M. Laxer, Carol B Lindsley, Lucy Wedderburn, Robert C Fuhlbrigge, Elizabeth D. Mellins, 2020-12-03 Offering up-to-date, comprehensive coverage of disease progression, diagnosis, management, and prognosis, *Textbook of Pediatric Rheumatology* is the definitive reference in the field. For physicians caring for children with rheumatic diseases, this revised 8th Edition is an unparalleled resource for the full spectrum of rheumatologic diseases and non-rheumatologic musculoskeletal disorders in children and adolescents. Global leaders in the field provide reliable, evidence-based guidance, highlighted by superb full-color illustrations that facilitate a thorough understanding of the science that underlies rheumatic disease. Offers expanded coverage of autoinflammatory diseases, plus new chapters on Takayasu Arteritis and Other Vasculitides, Mechanistic Investigation of Pediatric Rheumatic Diseases, Genetics and Pediatric Rheumatic Diseases, and Global Issues in Pediatric Rheumatology. Reflects the changes in diagnosis, monitoring, and management that recent advances have made possible. Covers the latest information on small molecule treatment, biologics, biomarkers, epigenetics, biosimilars, and cell-based therapies, helping you choose treatment protocols based on the best scientific evidence available today. Features exhaustive reviews of the complex symptoms, signs, and lab abnormalities that characterize these clinical disorders.

Between Text and Image Delia Chiaro, Christine Heiss, Chiara Bucaria, 2008-08-14 Over the past decade interest in research on screen translation has increased sharply while at the same time fast moving technological breakthroughs are continually modifying and renewing both products and well-established methods of linguistic mediation. Thus, as more scholars choose to devote their energies to investigating this multi-faceted field, there is an ever-growing need to map out where the discipline stands and where it is going in terms of research. This book sets out to establish the state of the art of this ever expanding field and at the same time to underscore the work of scholars following new paths of investigation both in terms of innovative linguistic mediations being examined and pioneering experimental design. The volume includes descriptions of sophisticated electronic databases and corpora of audiovisual products for the big and small screen, and the rationale behind them, e.g. how they are created and programmed for querying; technical limitations; homogeneity in querying languages. Furthermore, *Between Text and Image* also includes a number of cutting edge studies in audience perception of audiovisual products, i.e. empirically based viewer centred studies which are still rare yet essential if we wish to gain a thorough understanding of the field. Finally, the volume does not fail to ignore examples of original research carried out from both a traditional linguistic viewpoint and from a more cultural perspective.

Machine Learning Techniques for Online Social Networks Tansel Özyer, Reda Alhajj, 2018-05-30 The book covers tools in the study of online social networks such as machine learning techniques, clustering, and deep learning. A variety of theoretical aspects, application domains, and case studies for analyzing social network data are covered. The aim is to provide new perspectives on utilizing machine learning and related scientific methods and techniques for social network analysis. *Machine Learning Techniques for Online Social Networks* will appeal to researchers and students in these fields.

Politically Animated Jennifer Nagtegaal, 2023-10-12 *Politically Animated* studies the convergence of animation and actuality within films, television series, and digital shorts from across the Spanish-speaking world. It interrogates the many ways in which animation as a stylistic tool and storytelling device participates in political projects underpinning an array of non-fiction works. The case studies in the book cover a diverse geographical scope, including Spain, Argentina, Colombia, and Mexico. They critically analyse different works such as feature-length animated documentary films, a work of animated journalism, a short animated essay, and micro-short episodes from a televised animated documentary series. Jennifer Nagtegaal employs the term politically animated in reference to the ideological implications of choosing specific techniques and styles of animation within certain socio-historical and cultural contexts. Nagtegaal illuminates the creative union of animated documentary and the comics medium currently being exploited by Spanish and Latin American cartoonists and filmmakers alike. By paying particular attention to cultural production beyond the big screen, *Politically Animated* continues to stretch the bounds of animated documentary scholarship.
