Spam Wars Danny Goodman,2004 Spammers, scammers, and hackers are destroying electronic mail. The email inbox that once excited you with messages from friends, family, and business prospects now causes outright dread and rage. With unsolicited and unwelcome email accounting for as much as 80% of the world's email traffic, it's time for all email users to act to turn the tide in this epic battle for their privacy and sanity. He also explains why the latest anti-spam technologies and laws can't do the whole job. Spam Wars provides the readers with the additional insight, not only to protect themselves from attack, but more importantly to help choke off the economies that power today's time-wasting email floods. Spam Wars puts to rest many popular misconceptions and myths about email, while giving readers the knowledge that email attackers don't want you to have. Danny Goodman's crystal-clear writing can turn any email user into a well-armed spam warrior.

Inside the SPAM Cartel Spammer-X Spammer-X,2004-11-13 Authored by a former spammer, Inside the SPAM Cartel is a methodical, technically explicit expose of the inner workings of the SPAM economy. Readers will be shocked by the sophistication and sheer size of this underworld. From the author: You may hate spam and think all spammers are evil, but listen to my story and see why I do this and more importantly, HOW. For most people, the term SPAM conjures up the image of hundreds of annoying, and at times offensive, e-mails flooding their inbox every week. But for a few, SPAM is a way of life that delivers an adrenaline rush fueled by cash, danger, retribution, porn

and the avoidance of local, federal, and international law enforcement agencies. Inside the SPAM Cartel offer readers a never-before seen view inside this dark sub-economy. You'll meet the characters that control the flow of money as well as the hackers and programmers committed to keeping the enterprise up and running. You may disagree with their objectives, but you can't help but to marvel at their ingenuity and resourcefulness in defeating spam filters, avoiding being identified, and staying one step ahead of the law. Spam makes up now 64% of all email sent and it is said to be the most annoying part of being online. You'll meet the characters that control the flow of money as well as the hackers and programmers committed to keeping the enterprise up and running. Authored by a former spammer, this is a methodical, technically explicit expose of the innerworkings of the SPAM economy.

Spam Kings Brian S McWilliams,2014-09-09 More than sixty percent of today's email traffic is spam. In 2004 alone, five trillion spam messages clogged Internet users' in-boxes, costing society an estimated \$10 billion in filtering software and lost productivity. This expose explores the shadowy world of the people responsible for today's junk-email epidemic. Investigative journalist Brian McWilliams delivers a fascinating account of the cat-and-mouse game played by spam entrepreneurs in search of easy fortunes and anti-spam activists. McWilliams chronicles the activities of several spam kings, including Davis Wolfgang Hawke, a notorious Jewish-born neo-Nazi leader. The book traces this 20-year-old neophyte's rise in the trade, where he became a major player in the lucrative penis pill market - a business that would eventually make him a millionaire and the target of lawsuits from AOL and others. Spam Kings also tells the story of anti-spam cyber-vigilantes like Susan Gunn, a computer novice in California, whose outrage led her to join a group of anti-spam activists. Her volunteer sleuthing put her on a collision course with Hawke and other spammers, who sought revenge on their pursuers. The book sheds light on the technical sleight-of-hand and sleazy business practices that spammers use - forged headers, open relays, harvesting tools, and bulletproof hosting - and warns of the ever-inventive spammers' development of new types of spam.--Jacket.

The Concept Of Spam In Email Communication Alena Rudnitskaya,2009-08-17 Seminar paper from the year 2006 in the subject English Language and Literature Studies - Linguistics, grade: keine, LMU Munich (Department für Anglistik und Amerikanistik), course: Internet Communication, language: English, abstract: The communication by email has become one of the most important means of communication in cooperate and private. An internet user is constantly confronted by mass emails containing undesired information. Spam, defined as bulk unsolicited emailing, generally commercial in nature, and predominately fraudulent. Spam causes high charges and damages. Nucleus Research announced that the spam epidemic is costing US businesses \$712 per employee each year in lost worker productivity. As a result, users are spending 16 seconds identifying and deleting each spam e-mail, which translates into an annual cost of \$70 bln to all US businesses. Looking at the total e-mail traffic, Nucleus estimates that at least 90% of e-mail reaching corporate servers is spam. The average user receives 21 spam messages to their inbox each day. (Moskalyuk 2007) Regardless of the inefficient time spent, there are further costs caused by spam, such as (cf Filterpoint 2008):
 · Deleted emails remain stored in the trash folder.
 · Higher storage costs through higher server expenses.
 · Higher bandwidth essential to store the spam mails.
 · Time spent by IT staff for anti-spam measures.
 · Recovery costs after a virus attack. Various experts provide a spam calculator that enables to determine the approximate annual costs for an enterprise created by spam. (Gibbs 2003, Commtouch 2007) The calculator introduced by Gibbs differentiates productivity, connectivity, storage and support costs. This Spam Cost Analysis Model can be found in appendix 1 of this work. In this work different types of spam in general and in specific will be pointed out and characterized. Measures against unsolicited emails will be reviewed. First I start with the definition of spam and where it comes from, followed with the spam history. Then I briefly list the most common categories and variants of spam used. The next step will be the revision of a present situation captured by Commtouch and Symantec, as well as statistics on the information learned through spam monitoring during the last few months, with the examples of its usage. I conclude with an overview of spam solutions offered and point out further research topics in the area.

Spam Finn Brunton,2015-01-30 What spam is, how it works, and how it has shaped online communities and the Internet itself. The vast majority of all email sent every day is spam, a variety of idiosyncratically spelled requests to provide account information, invitations to spend money on dubious products, and pleas to send cash overseas. Most of it is caught by filters before ever reaching an in-box. Where does it come from? As Finn Brunton explains in *Spam*, it is produced and shaped by many different populations around the world: programmers, con

artists, bots and their botmasters, pharmaceutical merchants, marketers, identity thieves, crooked bankers and their victims, cops, lawyers, network security professionals, vigilantes, and hackers. Every time we go online, we participate in the system of spam, with choices, refusals, and purchases the consequences of which we may not understand. This is a book about what spam is, how it works, and what it means. Brunton provides a cultural history that stretches from pranks on early computer networks to the construction of a global criminal infrastructure. The history of spam, Brunton shows us, is a shadow history of the Internet itself, with spam emerging as the mirror image of the online communities it targets. Brunton traces spam through three epochs: the 1970s to 1995, and the early, noncommercial computer networks that became the Internet; 1995 to 2003, with the dot-com boom, the rise of spam's entrepreneurs, and the first efforts at regulating spam; and 2003 to the present, with the war of algorithms–spam versus anti-spam. Spam shows us how technologies, from email to search engines, are transformed by unintended consequences and adaptations, and how online communities develop and invent governance for themselves.
