Training the Translator Paul Kussmaul,1995-03-16 This book begins by investigating, through the use of think-aloud protocols, the mental processes of students when they translate. The creative and successful processes observed can be used directly for teaching purposes, while the unsuccessful ones can serve to find out where remedial training is needed. The book then goes on to discuss methods for improving a translator's competence. The strategies offered are based on the pragmatic and semantic analysis of texts from a functional point of view, and they include such practical matters as the use of dictionaries and the evaluation of translations and error analysis. The book is intended for teachers in translator-training institutions, but it can also be used by students for self-training.

The Use and Abuse of EFL Dictionaries Hilary Nesi,2012-02-14 The book begins with a review of research into dictionary use. A number of experimental design problems are discussed, in particular the unreliability of questionnaire responses, and the need for detailed accounts of individual dictionary consultations whilst sampling in numbers sufficient to represent specified populations. The experiments reported in subsequent chapters investigate issues raised in the review. The first two studies find that dictionary use during a reading comprehension test affected completion speed but not test scores. The apparent failure of dictionary use to improve comprehension is attributed to the test itself, the dictionaries, and the users' choice of look-up words. The ability of users to interpret dictionary entries is investigated in three further studies which use computers to gather data on large numbers of individual consultations. The findings indicate that there is little difference between three major EFL dictionaries in terms of speed of consultation and overall productive success. They also indicate that Malaysian ESL subjects, who have higher vocabulary scores, are slower in their reading and less successful in their interpretation of entries than Portuguese EFL subjects. Finally, the findings suggest that overall productive success is unaffected by the presence or absence of examples. The experimental findings lead to the conclusion that dictionary consultation is a process in which users match pre-existing beliefs about word meaning and behaviour against segments in the dictionary entry. Such segments are often selected because they are familiar-sounding and conceptually accessible, but may contain only incomplete or non-essential information. Where pre-existing beliefs and dictionary information conflict, dictionary information is sometimes overridden. Thus word knowledge acquired from a single consultation is often insufficient to ensure productive success. Although it is probably inevitable that word knowledge will be acquired slowly, through multiple encounters, modifications to the dictionary entry and the training of users might help to avoid serious misinterpretation of dictionary information.

The Oxford Reverse Dictionary ,1999 Have a word on the tip of your tongue? Unlike a thesaurus, where you look up alternatives to a word you know, or a dictionary, which defines a familiar word, this dictionary helps with words you are vaguely aware of, but can't bring to mind. Some 31,000 entries are listed under a wide range of subject areas and key words.

Substrata Versus Universals in Creole Genesis Pieter Muysken,Norval Smith,1986-01-01 Two of the most prominent hypotheses about why the structures of the Creole languages of the Atlantic and the Pacific differ are the universalist and he substrate hypotheses. The universalist hypothesis claims, essentially, that the particular grammatical properties of Creole languages directly reflect universal aspects of the human language capacity, and thus Creole genesis involves, then, the stripping away of the accretions of language history. The substrate hypothesis claims, on the other hand, that creole genesis results from the confrontation of two systems, the native languages of the colonized groups, and the dominant colonial language, and that the native language leaves strong traces in the resulting Creole. The contributions of this ground breaking collection present new and historical research on the old debate of substrata versus universals in Creole languages.

Lincoln Speaks to Leaders Gene Griessman,Pat Williams,Peggy Matthews Rose,2009 Contemporary marketplace leaders outline leadership advice from one of America's most admired presidents--Abraham Lincoln--and explain how to apply those lessons to today's business environments.

Haitian Creole Albert Valdman,2015 Haitian Creole is the creole language with the largest number of speakers: about ten million in Haiti and two million in diaspora communities in North American, France, and the Caribbean, including the Dominican Republic, Cuba, and the French overseas departments. Haitian Creole presents a comprehensive view of the structure and development of Haitian Creole. It provides a detailed analysis of the phonology and grammar of the language and points out key differences between these two fundamental aspects of the language and corresponding features of French, its original target language. The book contains a detailed description of the productive strategies of vocabulary development and deals with the origin of Haitian Creole, as well as its relationship to the other French-based creoles in Louisiana, the Caribbean, French Guiana, and the Indian Ocean. A signal innovation with regard to other descriptions of the language is the treatment of linguistic variation, both in geographical dialects and variation as determined by social factors, as well as the presentation of earlier forms of Haitian Creole, as attested by texts from the Colonial period. Another major contribution is the discussion of language planning and related issues concerning the use of Haitian Creole in education and its status relative to French, the other officially recognized language of Haiti.
