Before We Were Strangers Renée Carlino, 2015-08-18 From the USA TODAY bestselling author of *Sweet Thing* and *Nowhere But Here* comes a love story about a Craigslist “missed connection” post that gives two people a second chance at love fifteen years after they were separated in New York City. To the Green-eyed Lovebird: We met fifteen years ago, almost to the day, when I moved my stuff into the NYU dorm room next to yours at Senior House. You called us fast friends. I like to think it was more. We lived on nothing but the excitement of finding ourselves through music (you were obsessed with Jeff Buckley), photography (I couldn’t stop taking pictures of you), hanging out in Washington Square Park, and all the weird things we did to make money. I learned more about myself that year than any other. Yet, somehow, it all fell apart. We lost touch the summer after graduation when I went to South America to work for National Geographic. When I came back, you were gone. A part of me still wonders if I pushed you too hard after the wedding... I didn’t see you again until a month ago. It was a Wednesday. You were rocking back on your heels, balancing on that thick yellow line that runs along the subway platform, waiting for the F train. I didn’t know it was you until it was too late, and then you were gone. Again. You said my name; I saw it on your lips. I tried to will the train to stop, just so I could say hello. After seeing you, all of the youthful feelings and memories came flooding back to me, and now I’ve spent the better part of a month wondering what your life is like. I might be totally out of my mind, but would you like to get a drink with me and catch up on the last decade and a half? M

[It] does just about everything right.... The Lost Art of Dying L.S. Dugdale, 2020-07-07 A Columbia University physician comes across a popular medieval text on dying well written after the horror of the Black Plague and discovers ancient wisdom for rethinking death and gaining insight today on how we can learn the lost art of dying well in this wise, clear-eyed book that is as compelling and soulful as *Being Mortal*, *When Breath Becomes Air*, and *Smoke Gets in Your Eyes*. As a specialist in both medical ethics and the treatment of older patients, Dr. L. S. Dugdale knows a great deal about the end of life. Far too many of us die poorly, she argues. Our culture has overly medicalized death: dying is often institutional and sterile, prolonged by unnecessary resuscitations and other intrusive interventions. We are not going gently into that good night—our reliance on modern medicine can actually prolong suffering and strip us of our dignity. Yet our lives do not have to end this way. Centuries ago, in the wake of the Black Plague, a text was published offering advice to help the living prepare for a good death. Written during the late Middle Ages, *ars moriendi*—The Art of Dying—made clear that to die well, one first had to live well and

described what practices best help us prepare. When Dugdale discovered this Medieval book, it was a revelation. Inspired by its holistic approach to the final stage we must all one day face, she draws from this forgotten work, combining its wisdom with the knowledge she has gleaned from her long medical career. *The Lost Art of Dying* is a twenty-first century *ars moriendi*, filled with much-needed insight and thoughtful guidance that will change our perceptions. By recovering our sense of finitude, confronting our fears, accepting how our bodies age, developing meaningful rituals, and involving our communities in end-of-life care, we can discover what it means to both live and die well. And like the original *ars moriendi*, *The Lost Art of Dying* includes nine black-and-white drawings from artist Michael W. Dugger. Dr. Dugdale offers a hopeful perspective on death and dying as she shows us how to adapt the wisdom from the past to our lives today. *The Lost Art of Dying* is a vital, affecting book that reconsiders death, death culture, and how we can transform how we live each day, including our last.

The Hidden Brain Shankar Vedantam, 2010-08-31 The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

The Fingerprint U. S. Department Justice, 2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

Anaphora Resolution and Text Retrieval Helene Schmolz, 2015-03-30 This book covers anaphora resolution for the English language from a linguistic and computational point of view. First, a definition of anaphors that applies to linguistics as well as information technology is given. On this foundation, all types of anaphors and their characteristics for English are outlined. To examine how frequent each type of anaphor is, a corpus of different hypertexts has been established and analysed with regard to anaphors. The most frequent type are non-finite clause anaphors - a type which has never been investigated so far. Therefore, the potential of non-finite clause anaphors are further explored with respect to anaphora resolution. After presenting the fundamentals of computational anaphora resolution and its application in text retrieval, rules for resolving non-finite clause anaphors are established. Therefore, this book shows that a truly interdisciplinary approach can achieve results which would not have been possible otherwise.

Brand Admiration C. Whan Park, Deborah J. MacInnis, Andreas B. Eisingerich, 2016-09-16 Brand Admiration uses deep research on consumer psychology, marketing, consumer engagement and communication to develop a powerful, integrated perspective and innovative approach to brand management. Using numerous real-world examples and backed by research from top notch academics, this book describes how companies can turn a product, service, corporate, person or place brand into one that customers love, trust and respect; in short, how to make a brand admired. The result? Greater brand loyalty, stronger brand advocacy, and higher brand equity. Admired brands grow more revenue in a more efficient way over a longer period of time and with more opportunities for growth. The real power of Brand Admiration is that it provides concrete, actionable guidance on how brand managers can make customers (and employees) admire a brand. Admired brands don't just do the job; they offer exactly what customers need (enabling benefits), in way that's pleasing, fun, interesting, and emotionally involving (enticing benefits), while making people feel good about themselves (enriching benefits). Providing these benefits, called 3 Es, is foundational to building , strengthening and leveraging brand admiration. In addition, the authors articulate a common-sense and action based measure of brand equity, and they develop dashboard metrics to diagnose if there

are any 'canaries in the coal mine', and if so, what to do next. In short, Brand Admiration provides a coherent, cohesive approach to helping the brand stand the test of time. A well-designed, well-managed brand becomes a part of the public consciousness, and ultimately, a part of the culture. This trajectory is the fruit of decisions made from an integrated strategic standpoint. This book shows you how to shift the process for your brand, with practical guidance and an analytical approach.

Signs of Australia Brady Michaels, Dale Campisi, 2017-11 Once upon a simpler time, hand-painted and hand-crafted signs brought color and vibrancy to Australian towns and cities -- advertising everything from dining rooms, milk bars, and CWA halls to Peter's ice cream, oatmeal, stout, Chinese restaurants, and Shelley's famous drinks. Now faded and slowly disappearing, they tell the story of life over two centuries, recording a distinctly Australian vernacular language. A keen photographer of the everyday, Brady Michaels has recorded an impressive array of signs from across Australia -- from the earliest ads for household goods and services, to more recent but now defunct video lending libraries and internet cafés. These beautifully composed and nostalgic images are accompanied by brief commentary by Dale Campisi, who ponders the significance of these fading and disappearing signs -- artful, kitsch, and at times hilarious -- lovingly preserved through Brady's lens.

Blue Carbon C. Nellemann, Emily Corcoran, 2009 This report explores the potential for mitigating the impacts of climate change by improved management and protection of marine ecosystems and especially the vegetated coastal habitat, or blue carbon sinks. The objective of this report is to

highlight the critical role of the oceans and ocean ecosystems in maintaining our climate and in assisting policy makers to mainstream an oceans agenda into national and international climate change initiatives. While emissions' reductions are currently at the centre of the climate change discussions, the critical role of the oceans and ocean ecosystems has been vastly overlooked.

I had always been the good girl - the workaholic with every second of her life mapped out to a tee. Then I got trapped in an elevator with Julian Hoult. He was... irresistible. Sophisticated sex in a crisp white shirt. His voice alone dropped me straight to my knees. What was I supposed to do? Well.... I can tell you what I was definitely not supposed to do. I was not supposed to run into him ever again. I was not supposed to be desperately unemployed, and I was definitely not supposed to accept his dirty little job offer. But I couldn't resist. As CEO of the Hoult Media empire, Julian will stop at nothing to get what he wants. So for his next venture with Manhattan's most lecherous billionaires, he's hired me to play the role of bait. And while my official title is that of Executive Assistant, my actual job requires low tops, tight skirts and flaunting everything I've got till his clients are easy to bend - till they can barely think for themselves anymore. It's sleazy and wrong. Against everything I've worked for. But with Julian as my audience, I can't help but enjoy every second. Thanks to him, I'm embracing the bad, and I swear... I've never in

my life felt this damned good.*** BAD BOSS is a full-length standalone romance ***

Mirror of the World Julian Bell,2010-05-25 “Exuberant, astute, and splendidly illustrated history of world art . . . draws fascinating parallels between artistic developments in Western and non-Western art.”—Publishers Weekly In this beautifully written story of art, Julian Bell tells a vivid and compelling history of human artistic achievements, from prehistoric stone carvings to the latest video

installations. Bell, himself a painter, uses a variety of objects to reveal how art is a product of our shared experience and how, like a mirror, it can reflect the human condition. With hundreds of illustrations and a uniquely global perspective, Bell juxtaposes examples that challenge and enlighten the reader: dancing bronze figures from southern India, Romanesque sculptures, Baroque ceilings, and jewel-like Persian manuscripts are discussed side by side. With an insider's knowledge and an unerring touch, Bell weaves these diverse strands into an invaluable introduction to the wider history of world art.
