South Africa International Monetary Fund. Fiscal Affairs Dept.,2015-09-08 This Technical Assistance report reviews South Africa’s tax system and also examines the fiscal regime with a view to generating a sustainable revenue contribution from mining and petroleum in future. Mining has historically been the mainstay of the South African economy. Mineral exports remain the principal contributor to foreign exchange earnings on the current account. South Africa is not yet a significant producer of crude oil or natural gas. Oil and gas exploration nevertheless shows promise. Taxation is far from top of the list in current challenges facing the development of extractive industries in South Africa. The national goal of economic and social transformation in favor of Historically Disadvantaged South Africans has major impact on the mining sector.

The Value of Plant Disease Early-warning Systems Michael James Roberts,2006 Early-warning systems for plant diseases are valuable when the systems provide timely forecasts that farmers can use to inform their pest management decisions. To evaluate the value of the systems, this study examines, as a case study, USDA's coordinated framework for soybean rust surveillance, reporting, prediction, and management, which was developed before the 2005 growing season. The framework's linchpin is a website that provides real-time, county-level information on the spread of the disease. The study assesses the value of the information tool to farmers and factors that influence that value. The information's value depends most heavily on farmers' perceptions of the forecast's accuracy. The study finds that the framework's information is valuable to farmers even in a year with a low rust infection like that of 2005. We estimate that the information provided by the framework increased U.S. soybean producers' profits by a total of \$11-\$299 million in 2005, or between 16 cents and \$4.12 per acre, depending on the quality of information and other factors. The reported cost of the framework was between \$2.6 million and almost \$5 million in 2005. [p.i].
