High-speed Penetration Dynamics Gabi Ben-Dor, Anatoly Dubinsky, Tov Elperin, 2013 This important monograph is the first comprehensive compendium of engineering models used in high-speed penetration mechanics. The book consists of two parts. The first part (more than a quarter of the book's content) is in fact a handbook giving a very detailed summary of the engineering models used for the analysis of high-speed penetration of rigid projectiles into various media (concrete, metals, geological media). The second part of the book demonstrates the possibilities and efficiency of using approximate models for investigating traditional and nontraditional problems of penetration mechanics. Different chapters in the books are devoted to different classes of problems and can be read independently. Each chapter is self-contained, which includes a comprehensive literature survey of the topic, and carries a list of used notations. The bibliography includes more than 700 references. This monograph is a reliable and indispensable reference guide for anyone interested in using engineering models in high-speed penetration mechanics.

Engineering Models In High-speed Penetration Mechanics And Their Applications (In 2 Volumes) Gabi Ben-dor, Anatoly Dubinsky, Tov Elperin, 2018-12-28 This two-volume, 1100 pages, 38 chapters book is a significantly expanded, revised and updated version of the monograph by the authors published in 2013 (Ben-Dor, G, Dubinsky, A, Elperin, T, 'High Speed Penetration Dynamics: Engineering Models and Methods,' Singapore: World Scientific Publishing Company). The contents increased by 60%, the number of titles in bibliography doubled and reached 1600; and the scope covers a range of new topics related to hypervelocity penetration, along with high-speed impact. Presented material is structured into two parts. The first part includes description and analysis of practically all known engineering models for calculating high-speed penetration of projectiles into concrete, metals, geological shields, adobe, and gelatine. The second part focuses on the use of approximate models for solving conventional and non-standard problems of penetration mechanics including prediction and optimization of protective properties of monolithic and multi-layered shields against high-speed projectiles and space debris; shape optimization of high-speed projectiles penetrating into various media; modelling of penetration and optimal control of penetrators equipped with jet thrusters; and investigation of the efficiency and optimization of segmented projectiles. The book includes comprehensive overviews on basic classes of problems in high-speed penetration mechanics. This is a indispensable reference guide for scientists, engineers, and students specializing in the field of high-speed and hypervelocity penetration mechanics.

Command Of The Air General Giulio Douhet, 2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

The Coming of the Greeks Robert Drews, 2018-06-05 When did the Indo-Europeans enter the lands that they occupied during historical times? And, more specifically, when did the Greeks come to Greece? Robert Drews brings together the evidence--historical, linguistic, and archaeological--to tackle these important questions.

Australian Verse John Leonard, 1998 This anthology is a thorough survey of poetry by Australians in English, beginning with a selection of contemporary work by younger poets, and going backward in time to the early colonial period. The selection is broad. In addition to poems in the literary tradition, it includes performance poetry, convict songs and old bush ballads. An extensive selection has been provided from the work of five major twentieth-century poets: Les Murray, Gwen Harwood, Judith Wright, A.D. Hope and Kenneth Slessor. Several features are provided to assist the reader: the date of each poem is provided; footnotes explain unfamiliar words and allusions; and brief biographical notes assist in locating each poet in his or her place in time.

Race and Sport Charles Kenyatta Ross, 2004 An examination of the connection between race and sport in America

Race and Sport Charles K. Ross, 2009-09-18 Even before the desegregation of the military and public education and before blacks had full legal access to voting, racial barriers had begun to fall in American sports. This collection of essays shows that for many African Americans it was the world of athletics that first opened an avenue to equality and democratic involvement. *Race and Sport* showcases African Americans as key figures making football, baseball, basketball, and boxing internationally popular, though inequalities still exist today. Among the early notables discussed is Fritz Pollard, an African American who played professional football before the National Football League established a controversial color barrier. Another, the boxer Sugar Ray Robinson, exemplifies the black American athlete as an international celebrity. African American women also played an important role in bringing down the barriers, especially in the early development of women's basketball. In baseball, both African American and Hispanic players faced down obstacles and entered the sports mainstream after World War II. One essay discusses the international spread of American imperialism through sport. Another shows how mass media images of African American athletes continue to shape public perceptions. Although each of these six essays explores a different facet of sports in America, together they comprise an analytical examination of African American society's tumultuous struggle for full participation both on and off the athletic field.

Plays by George Colman the Younger and Thomas Morton Barry Sutcliffe, 1983-09-08 This volume contains edited texts of five plays by two late eighteenth-century dramatists. The plays have been chosen to represent the range of the two playwrights and the variety of dramatic material on offer during the period. The full-length plays and afterpieces by George Colman the Younger and Thomas Morton were as popular as Sheridan's works in their time, but today are seldom performed or read. This discrepancy lies at the heart of Barry Sutcliffe's extensive introduction, which explores the critical and social background to the dramatic activity of the period and relates the dramas to the shifting demands of the theatre audiences for whom these plays were written.
