JFK Fredrik Logevall, 2021-09-07 A NEW YORK TIMES NOTABLE BOOK OF THE YEAR • A Pulitzer Prize-winning historian takes us as close as we have ever been to the real John F. Kennedy in this revelatory biography of the iconic, yet still elusive, thirty-fifth president. “An utterly incandescent study of one of the most consequential figures of the twentieth century.”—Jill Lepore, author of *These Truths: A History of the United States* WINNER OF THE ELIZABETH LONGFORD PRIZE • NAMED BIOGRAPHY OF THE YEAR BY The Times (London) ONE OF THE BEST BOOKS OF THE YEAR: The Sunday Times (London), New Statesman, The Daily Telegraph, Kirkus Reviews By the time of his assassination in 1963, John F. Kennedy stood at the helm of the greatest power the world had ever seen, a booming American nation that he had steered through some of the most perilous diplomatic standoffs of the Cold War. Born in 1917 to a striving Irish American family that had become among Boston’s wealthiest, Kennedy knew political ambition from an early age, and his meteoric rise to become the youngest elected president cemented his status as one of the most mythologized figures in American history. And while hagiographic portrayals of his dazzling charisma, reports of his extramarital affairs, and disagreements over his political legacy have come and

gone in the decades since his untimely death, these accounts all fail to capture the full person. Beckoned by this gap in our historical knowledge, Fredrik Logevall has spent much of the last decade searching for the “real” JFK. The result of this prodigious effort is a sweeping two-volume biography that properly contextualizes Kennedy amidst the roiling American Century. This volume spans the first thirty-nine years of JFK’s life—from birth through his decision to run for president—to reveal his early relationships, his formative experiences during World War II, his ideas, his writings, his political aspirations. In examining these pre-White House years, Logevall shows us a more serious, independently minded Kennedy than we’ve previously known, whose distinct international sensibility would prepare him to enter national politics at a critical moment in modern U.S. history. Along the way, Logevall tells the parallel story of America’s midcentury rise. As Kennedy comes of age, we see the charged debate between isolationists and interventionists in the years before Pearl Harbor; the tumult of the Second World War, through which the United States emerged as a global colossus; the outbreak and spread of the Cold War; the domestic politics of anti-Communism and the attendant scourge of McCarthyism; the growth of television’s influence on politics; and more. JFK: Coming of Age in the American Century, 1917–1956 is a sweeping history of the United States in the middle decades of the twentieth century, as well as the clearest portrait we have of this enigmatic American icon.

Language at the Speed of Sight Mark

Seidenberg, 2017-01-03 In this important and alarming book, see why so many American students are falling behind in their reading skills while others around the world excel (New York Times). In 2011, when an international survey reported that students in Shanghai dramatically outperformed American students in reading, math, and science, President Obama declared it a Sputnik moment: a wake-up call about the dismal state of American education. Little has changed, however, since then: over half of our children still read at a basic level and few become highly proficient. Many American children and adults are not functionally literate, with serious consequences. Poor readers are more likely to drop out of the educational system and as adults are unable to fully participate in the

workforce, adequately manage their own health care, or advance their children's education. In *Language at the Speed of Sight*, internationally renowned cognitive scientist Mark Seidenberg reveals the underexplored science of reading, which spans cognitive science, neurobiology, and linguistics. As Seidenberg shows, the disconnect between science and education is a major factor in America's chronic underachievement. How we teach reading places many children at risk of failure, discriminates against poorer kids, and discourages even those who could have become more successful readers. Children aren't taught basic print skills because educators cling to the disproved theory that good readers guess the words in texts, a strategy that encourages skimming instead of close reading. Interventions for children with reading disabilities are delayed because parents are mistakenly told their kids will catch up if they work harder. Learning to read is more difficult for children who speak a minority dialect in the home, but that is not reflected in classroom practices. By building on science's insights, we can improve how our children read, and take real steps toward solving the inequality that illiteracy breeds. Both an expert look at our relationship with the written word and a rousing call to action, *Language at the Speed of Sight* is essential for parents, educators, policy makers, and all others who want to understand why so many fail to read, and how to change that.

INT-Integrated Neurocognitive Therapy for Schizophrenia Patients Volker Roder, Daniel R. Müller, 2015-06-02 This book contains concrete and step by step information with many practical examples. It is in line with the most actual international empirical findings about schizophrenia and contains the most updated therapy approach being available currently. The techniques and exercises (partly computer-based) are described in detail. Case examples point out specific therapeutic situations and teach the therapist how to cope with complicated group and individual demands. Assessment for patient selection, differential indication and therapy control within a multi-dimensional treatment and rehabilitation system are discussed. INT was evaluated successfully in an international randomised multi-centre study. In the meantime it is implemented in many clinical settings in German speaking countries. Integrated Neurocognitive Therapy (INT) is a cognitive remediation therapy approach.

INT is the first treatment manual comprising all MATRICS areas (Measurement and Treatment Research to Improve Cognition in Schizophrenia). The NIMH (National Institute of Mental Health, USA) initiated this MATRICS initiative. MATRICS defines 11 neurocognitive and social cognitive areas of functioning being relevant for patients with schizophrenia. The improvement of these areas in a group therapy is the main goal of INT. INT is based on IPT (Integrated Psychological Therapy, Roder et al 2010). It is a resource and a recovery oriented intervention to enhance also therapy motivation and self-esteem and to reduce negative symptoms. Therapy focuses especially on group processes and the exercises augment transfer and generalisation to daily life. As a meta goal INT intends to amend life quality and the reintegration of the patients in the community. The presented manual offers the clinicians a practically orientated guide for carrying out INT.

Spirals Nico Israel, 2015-02-24 In this elegantly written and beautifully illustrated book, Nico Israel reveals how spirals are at the heart of the most significant literature and visual art of the twentieth century. Juxtaposing the work of writers and artists—including W. B. Yeats and Vladimir Tatlin, James Joyce and Marcel Duchamp, and Samuel Beckett and Robert Smithson—he argues that spirals provide a crucial frame for understanding the mutual involvement of modernity, history, and geopolitics, complicating the spatio-temporal logic of literary and artistic genres and of scholarly disciplines. The book takes the spiral not only as its topic but as its method. Drawing on the writings of Walter Benjamin and Alain Badiou, Israel theorizes a way of reading spirals, responding to their dual-directionality as well as their affective power. The sensations associated with spirals—flying, falling, drowning, being smothered—reflect the anxieties of limits tested or

breached, and Israel charts these limits as they widen from the local to the global and recoil back. Chapters mix literary and art history to explore 'pataphysics, Futurism, Vorticism, Dada and Surrealism, Concentrisme, minimalism, and entropic earth art; a coda considers the work of novelist W. G. Sebald and contemporary artist William Kentridge. In *Spirals*, Israel offers a refreshingly original approach to the history of modernism and its aftermaths, one that gives modernist studies, comparative literature, and art criticism an important new spin.

Directing the Sitcom Joel Zwick, Rosario J. Roveto, Jr., 2016-09-19 This guided tour of the American situation comedy is given by one of the most prolific directors of the genre. Brooklyn native Joel Zwick began his career in the late 1960s at La MaMa, a New York experimental theater club, before moving to Hollywood to become a successful director during the sitcom's golden age. He describes the 10 steps of sitcom production and outlines the five-day process, from the early table read to the final shoot in front of a live audience. Behind-the-scenes anecdotes include personal and professional experiences with actors Tom Hanks, Penny Marshall, Robin Williams, Jamie Foxx, the cast of *Full House* and many more.

Emotional Processes in Learning Situations Marianne Habib, 2022-06-23 Emotional processes are increasingly studied in psychology, whether through their modes of expression or through their effect on cognitive processes. While the theorization of the link between emotional and cognitive processes has varied over the centuries, the impact of emotions on cognitive functions is now undeniable and is supported by experimental arguments. Psychological processes are currently considered necessary for, or influenced by, the emergence of emotions. Learning is at the heart of individual

development and involves different cognitive processes; the study of the emotional processes at work in a learning situation must of course not be overlooked. This book presents the contributions of different disciplines of psychology in understanding the role of emotional processes in learning situations, from a developmental and whole-life perspective.

The Language of Jokes in the Digital Age Delia Chiaro, 2017-11-23 In this accessible book, Delia Chiaro provides a fresh overview of the language of jokes in a globalized and digitalized world. The book shows how, while on the one hand the lingua-cultural nuts and bolts of jokes have remained unchanged over time, on the other, the time-space compression brought about by modern technology has generated new settings and new ways of joking and playing with language. The Language of Jokes in the Digital Age covers a wide range of settings from social networks, e-mails and memes, to more traditional fields of film and TV (especially sitcoms and game shows) and advertising. Chiaro's consideration of the increasingly virtual context of jokes delights with both up-to-date examples and frequent reference to the most central theories of comedy. This lively book will be essential reading for any student or researcher working in the area of language and humour and will be of interest to those in language and media and sociolinguistics.

The Arabic, Hebrew and Latin Reception of Avicenna's Physics and Cosmology Dag Nikolaus Hasse, Amos Bertolacci, 2018-10-22 Avicenna (Ibn Sīnā) greatly influenced later medieval thinking about the earth and the cosmos, not only in his own civilization, but also in Hebrew and Latin cultures. The studies presented in this volume discuss the reception of prominent theories by Avicenna from the early 11th century onwards by thinkers

like Averroes, Fahraddin ar-Razi, Samuel ibn Tibbon or Albertus Magnus. Among the topics which receive particular attention are the definition and existence of motion and time. Other important topics are covered too, such as Avicenna's theories of vacuum, causality, elements, substantial change, minerals, floods and mountains. It emerges, among other things, that Avicenna inherited to the discussion an acute sense for the epistemological status of natural science and for the mental and concrete existence of its objects. The volume also addresses the philological and historical circumstances of the textual tradition and sheds light on the translators Dominicus Gundisalvi, Avendauth and Alfred of Sareshel in particular. The articles of this volume are presented by scholars who convened in 2013 to discuss their research on the influence of Avicenna's physics and cosmology in the Villa Vigoni, Italy.

Mad about Physics Christopher Jargodzki, Franklin Potter, 2002-02-28 Why is there eight times more ice in Antarctica than in the Arctic? Why can you warm your hands by blowing gently, and cool your hands by blowing hard? Why would a pitcher scuff a baseball? Which weighs more—a pound of feathers or a pound of iron? Let science experts Christopher Jargodzki and Franklin Potter guide you through the curiosities of physics and you'll find the answers to these and hundreds of other quirky conundrums. You'll discover why sounds carry well over water (especially in the summer), how a mouse can be levitated in a magnetic field, why backspin is so important when shooting a basketball, and whether women are indeed as strong as men. With nearly 400 questions and answers on everything from race cars to jumping fleas to vanishing elephants, *Mad about Physics* presents a comprehensive collection of braintwisters and paradoxes that will challenge and

entertain even the brainiest of science lovers. Whether you're a physicist by trade or just want to give your brain a power workout, this collection of intriguing and unusual physics challenges will send you on a highly entertaining ride that reveals the relevance of physics in our everyday lives.

Men and Speed G. Wayne Miller, Wayne

Miller, 2009-09-09 What is it that makes a man strap himself into an automobile and drive it hundreds of laps around a track at speeds surpassing 200 miles per hour? Critically acclaimed journalist G. Wayne Miller decided to find out by spending a year on the NASCAR circuit with Roush Racing's legendary owner Jack Roush and his four title-contending Winston Cup drivers: Mark Martin, Jeff Burton, Matt Kenseth, and Kurt Busch. Miller plumbs the allure of speed and the exploding popularity of stock-car racing through the dramatic 2001 season, which opened with the most famous Daytona 500 in history, when NASCAR legend Dale Earnhardt died as his car slammed into the wall on the final turn. Miller takes us inside the minds and behind the wheels of the of the hottest drivers of the past two seasons, as they cope with the thrills and the dangers along the way to the Cup. Miller also takes us inside Roush Racing, a \$125 million business, showing a side of NASCAR that few fans ever get to see. For longtime fans and curious newcomers alike, *Men and Speed* takes you for a wild ride through the fastest sport in the land.

Ultimate Insiders Kenneth T. Walsh, 2017-10-05

Virtually unknown to the public or historians, White House photographers have developed amazing access to the presidents of the United States over the past half-century. In this book, long-time White House correspondent Kenneth T. Walsh tells their stories, emphasizing observations about the presidents the photographers got to know so well along

with other key figures close to those presidents—including the first ladies, members of Congress, and important world leaders. This book shows how official White House photographers have morphed into ultimate insiders within the American presidency, allowed to observe and take pictures of nearly everything Chief Executives do related to their job. The photogs have often become close friends with the presidents they have served. Using these bonds of trust and their own powers of observation, they created fundamental impressions and public images of the presidents through the art of photography. Acting not only as image makers but as visual historians, they have built pictorial chronicles of the presidency—intimate narratives of America's leaders in public and private, showing how they dealt with everyday life as well as moments of great crisis and opportunity. From children playing in the Oval Office to decisions to send troops into harm's way, images created by White House photographers can make or break a presidential administration as well as define an era.
