Visual Impairment Heather Mason,Stephen McCall,2013-05-24 First published in 1998. This book embodies the positive philosophy that children with a visual impairment are entitled to access to the full national curriculum during their school years. In the UK, education placements for pupils and students with special needs range across a continuum from special schools and colleges, with day or residential attendance, to specialist units or individual integration into mainstream provision. Placement results from inter-disciplinary assessment and consultation and requires parental agreement. Lack of sight and measurably impaired vision constitute special needs in educational terms. The writers who have contributed to this major text are teachers and lecturers from both the specialist and mainstream areas of provision and have considerable first-hand experience in teaching pupils and students with a visual impairment.

Now in its eleventh edition, the Handbook has been revitalized by an expanded team of specialty experts and junior doctors to guide readers through each of the specialties encountered through medical school and Foundation Programme rotations, while remaining true to the humanity and patient focus of the original edition.
