The Inside & Out Guide to Speed Machines Steve Parker, 2006 Examines some of the fastest vehicles, including stock cars, rocket planes, powerboats, and high speed trains.

Ultimate Speed Samuel Hawley, Craig Breedlove, 2018-10-02 An L.A. hot rodder with a high school education, a family to support and almost no money, Craig Breedlove set out in the late 1950s to do something big: harness the thrust of a jet in a car. With a growing obsession that would cost him his marriage, he started building in his dad's garage. The car's name: Spirit of America. Through perseverance and endless hard work, Craig completed Spirit and broke the land speed record on the Bonneville Salt Flats, setting a new mark of 407 mph in 1963. In the early 1970s he turned to rockets and set an acceleration record at Bonneville that stands to this day. He built a jet car in the 1990s, Spirit of America-Sonic Arrow, to go head-to-head against Britain's ThrustSSC to be the first to Mach One. Craig's subsequent crash at 675 mph remains the fastest in history. Even today, at the age of 80, he is going strong with plans for yet another Spirit of America racer. The ultimate goal: 1,000 mph. Ultimate Speed is the authorized biography of Craig Breedlove, a candid revelation of one of motorsports' most interesting figures based primarily on countless hours of interviews with Craig and dozens of people connected to his life.

Rpt. 107-220 to ask the NRC to evaluate the Advanced Simulation and Computing program of the National Nuclear Security Administration at DOE in light of the development of the Earth Simulator. This report provides an assessment of the current status of supercomputing in the United States including a review of current demand and technology, infrastructure and institutions, and international activities. Bonneville Salt Flats "Landspeed" Louise Ann Noeth, 2020-11-09 Astronaut John Glenn used Utah's Bonneville Salt Flats as a landmark from space, but on Earth, amateur motorsports devotees have used the blistering hot, flat land as a speed laboratory for more than a century. On August 22, 1949, the hot rodders joined the pageant of power with their handcrafted cars, trucks, and motorcycles for a one-time event but never stopped coming back, trying to go faster every run down the multi-mile course. All came looking for the answer to the same question: How fast will it go? Those efforts have made them the fastest people on the planet, reaching speeds in excess of 500 miles per hour. On the salt, people find the limits of their courage, learn what daring greatly is all about, and realize why a Bonneville Salt Flats speed record is an internationally respected pedigree. People who race on the salt flats become a family bound together by speed--a powerful force that erases ethnic, economic, political, and religious barriers. They are land speed racers. And this is their story.
