The Passionate Programmer Chad Fowler,2009-05-28 Success in today's IT environment requires you to view your career as a business endeavor. In this book, you'll learn how to become an entrepreneur, driving your career in the direction of your choosing. You'll learn how to build your software development career step by step, following the same path that you would follow if you were building, marketing, and selling a product. After all, your skills themselves are a product. The choices you make about which technologies to focus on and which business domains to master have at least as much impact on your success as your technical knowledge itself--don't let those choices be accidental. We'll walk through all aspects of the decision-making process, so you can ensure that you're investing your time and energy in the right areas. You'll develop a structured plan for keeping your mind engaged and your skills fresh. You'll learn how to assess your skills in terms of where they fit on the value chain, driving you away from commodity skills and toward those that are in high demand. Through a mix of high-level, thought-provoking essays and tactical Act on It sections, you will come away with concrete plans you can put into action immediately. You'll also get a chance to read the perspectives of several highly successful members of our industry from a variety of career paths. As with any product or service, if nobody knows what you're selling, nobody will buy. We'll walk through the often-neglected world of marketing, and you'll create a plan to market yourself both inside your company and to the industry in general. Above all, you'll see how you can set the direction of your career, leading to a more fulfilling and remarkable professional life.

Church Lace - Being Eight Ecclesiastical Patterns in Pillow-Lace M. Milroy,2010-01 CHURCH LACE. This book presents eight ecclesiastical patterns in pillow-lace. PREFACE. This is the earliest record of Church needlework, and it puts before us a model that even after the thousands of years that have since passed by, we shall do well to copy. Most people agree that everything that is intrinsically good and beautiful should be used to make and furnish our Churches, and we use rich colour and fine linen even as did the Israelites. It is to increase the possibilities for Church purposes of one particular craft that this little book is written. There follow here a few patterns of pillow-lace designed for use on fair linen . They are especially suitable for the fair linen of small and simply decorated churches. The aim has been to keep the designs appropriate, simple, dignified, practical. The work can be done by those who are only novices in the art of pillow-lace making, provided the worker takes due care. Originally published in 1920. Many of the earliest books on weavin
