**Reproductively Active Chemicals** Richard J. Lewis, Sr.,1991-09-03 Reproductively Active Chemicals A Reference Guide Richard J. Lewis, Sr. Adverse effects on the human reproductive system due to chemical exposure are a growing concern of occupational safety and health professionals. While the effects of certain chemicals can be difficult to detect, and often go unnoticed or are mistakenly attributed to other causes, they can drastically increase risks of infertility, sterility, birth defects, and post-birth complications. Written by one of the foremost authorities in the field today, Reproductively Active Chemicals is the first book to identify, compile, and fully document the effects of more than 3,300 chemical substances known or suspected to cause adverse effects on human reproductive health. This major reference work features: Cross-indexes by synonym and identification number Vital information drawn from authoritative sources on hazardous chemicals, including chemical properties, toxicity, and synonyms Toxic effects indicating reported dominant reproductive effects The list of reproductively active materials covered here includes drugs, food additives, preservatives, ores, pesticides, dyes, and many other classes of materials. Some of the information also refers to materials of undefined composition. For each entry, the author provides the DPIM number, entry name, CAS number, molecular formula, molecular weight, a description of the material, and physical properties. He specifies effects on the male and female reproductive systems, mating success, fetal effects including abortion and transplacental carcinogenesis, and post-birth effects. Each reproductive or teratogenic effect reported includes the dose and species exposed, a brief characterization of the exposure conditions, and a reference to the source of the data. Human effects are presented separately from animal data to highlight the data's importance. With its broad range of crucial, up-to-date information, Reproductively Active Chemicals is an essential sourcebook for professionals in industrial health and safety and related areas. It offers vital information for protecting current and future generations from the dangers of chemical exposure, and will be especially helpful to industrial hygienists and toxicologists, safety and risk managers, loss prevention personnel, and industrial insurers.

*Khomeini's Warriors* Mehran Riazaty,2016-05-11 This book analyzes Ayatollah Khomeinis ideology, Irans official and unofficial armed forces, and its allies throughout the world and provides photographs of the regimes predominant actors. Since 1892, the Shia clergy has played a major role in Iran, such as the tobacco boycott, which led to the withdrawal of the concession given by the Shah to British citizens, Irans Constitutional Revolution of 1906, as well as organizing opposition to the Shahs policies in the 1979 revolution. Ayatollah Khomeini was a lecturer at Hawza Ilmiyya (Shia seminary of traditional Islamic school of higher learning) of Najaf and Qom for decades before he came on to the Iranian political scene. In 1977, Khomeini assumed the mantle of leadership within the Islamist opposition after the death of Ali Shariati, a leftist intellectual and one of the most influential Iranian Muslim thinkers of his generation. In 1930, Shariati contributed a new line of thinking in Iran, through his reinterpretation of jihad and shahadat (martyrdom), which was presented in his view of an authentic Islam. Shariatis new authentic Islam centered on a reinterpretation of the story of Karbala, where Imam Hussein was martyred in a battle, refusing to pledge allegiance to Yazid, the Umayyad caliph. Shariati borrowed the Christian concept of martyrdom from the Crucifixion and Resurrection of Jesus as the basis of his new Islamic philosophy. Shariati wrote that when faced with the possibility of ones own death, one must adopt an attitude of freedom-toward-death and thereby experience authentic living. In 1978, Ayatollah Khomeinis reinterpretation of Shia rituals removed the borders between the audience and the actors, turning the entire country into a stage for his casting. He imbued the old passion of the story of Karbala with a new passionate hatred for the Shahs unjust rule in Iran, as well as Israels and the United States influences within the world. Khomeinis memory of Dr. Mohammed Mosaddegh, whose government was toppled by the CIA in 1953, returning the Shah to Iran, resulted in the rise of various political groups such as nationalists, liberals, secularists, and Marxists. These groups were essential in assisting Khomeinis overthrow of the Shah, though they were soon stomped out by the creation of the Islamic Revolutionary Guard Corps (IRGC) in May 1979 in order to protect Khomeinis unique brand of a Shia Islamic Revolution. The Iran-Iraq War initiated the rapid expansion of the IRGCs size and capabilities. In September 1980, the IRGC had only 30,000 men in lightly armed units. Prior to the war, the IRGC personnel were very young in age and had little to no military experience. By the summer of 1981, the IRGC had organized basic training centers with experienced commanders and a select group of regular officers. They also had 50,000 members, and its strength would jump to 100,000 in 1983 and 250,000 in 1985. In order to meet all its manpower needs on the Iraq war front, the IRGC then turned to its volunteer militia, the Basiij. The Basiij members provided more troops than the IRGC could arm. The average Basiij member came from Irans rural areas and can be described as poor, uneducated, and ranged in age from twelve to thirty years old. Like the IRGC, the Basiij members are motivated by both religion and ideology. After the Iran-Iraq War, the IRGC focused on external threats as the Basiij increased its involvement in domestic affairs. In past years, the Basiij militia has been active in controlling public gatherings and disrupting demonstrations by civil or student

activists.

Energy Sector Diversification in Iran Shabnam Mirsaeedi-Farahani,2015-11-25 Shabnam Mirsaeedi-Farahani analyzes Iran’s interests in diversifying its energy sector, specifically electricity generation and consumption, between 1990 and 2011. She examines the policy discussions in the Iranian Parliament as well as policy development and implementation with respect to the electricity sector. One of the geopolitically crucial areas for both Iran’s domestic development as well as its international influence has been its energy sector. The author assesses international policy pressures and domestic interests to evaluate the interplay of interests, actors, and strategies. While increasing domestic generation capacity, Iran has been able to further its regional interests and influences as well as to build a backbone for its industrialization endeavors.
