Handbook of Korean Vocabulary Miho Choo, William O'Grady, 1996-03-01 Vocabulary learning is the single most important component of second-language acquisition. In cases where the second language is unrelated to the learner's native tongue, this task presents special challenges because there are typically few clues in a word's form to assist in learning and remembering its meaning. This book offers a solution to this problem for students of Korean. The Handbook is the first ever root dictionary of Korean designed for second-language learners. Useful for students at all levels, it contains more than 1,500 vocabulary lists consisting of words built from a shared root. These lists offer a unique and efficient way for students to acquire new words. Upon encountering a word, students can consult the lists for its component roots and discover many other semantically related words built from the same elements. An introduction provides an overview of Korean vocabulary and detailed instructions on how to use the word lists. A pronunciation guide outlines the major principles determining the pronunciation of compounds and other multipart words in Korean.

Research Handbook on the Law of Virtual and Augmented Reality Woodrow Barfield, Marc Jonathan Blitz, 2018-12-28 Virtual and augmented reality raise significant questions for law and policy. When should virtual world activities or augmented reality images count as protected First Amendment ‘speech’, and when are they instead a nuisance or trespass? When does copying them infringe intellectual property laws? When should a person (or computer) face legal consequences for allegedly harmful virtual acts? The *Research Handbook on the Law of Virtual and Augmented Reality* addresses these questions and others, drawing upon free speech doctrine, criminal law, issues of data protection and privacy, legal rights for increasingly intelligent avatars, and issues of jurisdiction within virtual and augmented reality worlds.

Social Media Marketing Alan Charlesworth,2017-11-21 Published in 1837, Hans Christian Andersen's *The Emperor's New Clothes* tells the tale of two weavers who present a non-existent suit of clothes to the Emperor with the caution that the suit is invisible to those who are unfit for their positions, stupid, or incompetent. As the Emperor parades in his underwear no one dares to say that they see no clothes—with the exception for one small child who exclaims; “he isn’t wearing anything at all.” Fast forward to the present day and business owners and managers around the world are told that anyone who cannot see the benefits of social media marketing are unfit for their positions, stupid, or incompetent. As organizations, brands and products fill the social media landscape with meaningless, objectiveless drivel that has interest to no one and serves only to waste resources and alienate customers, a small voice can be heard exclaiming; “who told you that was a good idea?” The caveat to this contemporary tale is that for a very few organizations, brands and products, social media has provided a kind-of marketing panacea. Correction: make that a very, very few organizations. For the rest, they are metaphorically parading in their digital underwear. All is not lost however. Although many have been duped in a new clothes-esque sting, and that their social media marketing efforts are indeed, invisible—but marketing on social media might just be riding to the rescue.
