A New Dictionary of Americanisms Sylva Clapin,2015-07-09 Excerpt from A New Dictionary of Americanisms: Being a Glossary of Words Supposed to Be Peculiar to the United States and the Dominion of Canada A very dull man, and a pertinacious reader - the terms are by no means incompatible - is said to have had Johnson's Dictionary lent to him by some mischievous friend as an interesting new work, and to have read it through from beginning to end, quite unconscious that he was doing anything unusual. He observed, when he returned it, that the author appeared to him a person of considerable information, but that his style was slightly unconnected. The remark had a good deal of truth in it, for a dictionary is not bad reading on the whole. It is much more endurable than a good many of what are called lighter books, and not much more unconnected. What is an Americanism? In a good many instances the name is given to some archaism belated, or some English provincialism that has worked its way into general acceptance in the United States. It is usual to object, when expressions of either kind are classed by. some one as Americanisms, that they are nothing of the kind, which, though in strictness true enough, is a little unpractical; for surely, when words that have become obsolete in the mother country, or are merely local here and there, find themselves in wide or universal popularity in America, it is indeed convenient to class them as what they have practically become - Americanisms. Such words, for instance, as shyster, meeching, etc., are for all practical purposes Americanisms now, and are best classed and defined therewith. If we reject them, we must reject also such characteristic words as boss, stoop, portage, etc. Carry it far enough, and we would have hardly anything left but neologisms. Atmosphere and Aesthetics Tonino Griffero,Marco Tedeschini,2019-11-21 This book provides a presentation of the concept of “atmosphere” in the realm of aesthetics. An “atmosphere” is meant to be an emotional space. Such idea of “atmosphere” has been more and more subsumed by human and social sciences in the last twenty years, thereby becoming a technical notion. In many fields of the Humanities, affective life has been reassessed as a proper tool to understand the human being, and is now considered crucial. In this context, the link between atmospheres and aesthetics becomes decisive. Nowadays, aesthetics is no longer only a theory of art, but has recovered its original vocation: to be a general theory of perception conceived of as an ordinary experience of pre-logical character. In its four parts (Atmospheric turn?, Senses and Spaces, Subjects and Communities, Aesthetics and Art Theory), this volume discusses whether atmospheres could take the prominent and paradigmatic position previously held by art in order to make sense of such sensible experience of the world.
