Years of the Elephant Willy Linthout, Theo Linthout, 2009 'Madame...Sir...May we come in?' This was the prelude to some dreadful news in the Germonprez household. No parent should ever have bury a child, especially not after a suicide. The chalk outline on the pavement is a constant reminder - even when it is no longer there. Linthout draws an almost tangible pain with his immediate, elementary art and strong script - combined with his own personal experience.

Rick Sammon's Creative Visualization for Photographers Rick Sammon, 2015-01-09 The difference between seeing and looking is essential—much like the difference, in music, between hearing and listening. In *Creative Visualization*, master photographer, photo educator and photo instructor Rick Sammon presents his proven methodology for creative digital photography. His signature inspiring and motivating approach opens creative avenues for photographers in a variety of genres. With easy-to-follow examples, Sammon shows you how simple changes—with visualization, composition, post-processing, and more—can mean the difference between a snapshot and a great shot. This book, illustrated with more than 300 of Rick's photographs, includes invaluable information about exposure, composition, subject choice, lighting, mood, and depth. In the Food for Thought section, Rick offers guidelines for setting goals, getting motivated, connecting with a subject, learning, painting with light, thinking like a painter and more. In *Develop Your Creative Vision*, Rick takes you on an exploration of composition, exposure, making images with impact, creating a mood, altering reality, and pursuing your passion. Corrective and creative image processing techniques, as well as HDR, EDR, panoramas and black-and-white imaging, are covered in the *Image Processing Specialties* section. Rick also shares a chapter on self-assignments – photo challenges – that you can use to expand your photographic horizons. Canon Explorer of Light and master photographer Rick Sammon shares the secrets behind learning to see photographically, to make the necessary changes that will have a noticeable impact on your photographs. Includes easy-to-follow instruction for post-processing techniques in Lightroom and Photoshop. Tips for making the best HDR and EDR images are also included, as well as illustrations of how plug-ins can help photographers awaken the artist within. Uses clear, visual examples of photo failures side-by-side with successful ones, outlining the small, but important changes—to composition, framing, exposure, etc.—that can immediately make a significant difference.

Enhancing Diversity Ronald J. Anderson,Clayton E. Keller,Joan M. Karp,1998 The 43 million people with disabilities form this country's largest minority group, yet they are markedly under-employed as educators. Enhancing Diversity: Educators with Disabilities paves the way for correcting this costly omission. Editors Anderson, Karp, and Keller have called upon the knowledge of 19 other renowned contributors to address the important issues raised in Enhancing Diversity, including the place of disability in discussions of diversity in education, research on educators with disabilities that validates their capabilities, and information on the qualifications desired in and the demands made of education professionals. Legal precedents are cited and explained, and examples of efforts to place disabled educators are presented, along with recommendations on how disabled individuals and school administrators can work toward increased opportunities. Interviews with 25 disabled educators discussing how they satisfactorily fulfill their professional requirements completes this thoughtful-provoking book.
