Putin's Asymmetric Assault on Democracy in Russia and Europe, 2018-04-24 The official U.S. government report on Russian interference in democracy around the world! Most Americans were surprised to learn of Russian efforts to manipulate the results of the 2016 presidential election, and have become increasingly concerned about the vulnerabilities of our democracy. Here for the first time in an official U.S. government report is the fascinating and detailed account of how ex-KGB agent Vladimir Putin has used computer hackers, official state spy agencies, and even Russian organized crime thugs over the past thirty years to achieve his policy agenda—not only for Russian political domination, but also for his own enrichment and the enrichment of the oligarchs who control almost all aspects of the Russian economy. This complete report includes chapters on: Putin's Rise and Motivations Manipulation and Repression Inside Russia Old Active Measures and Modern Malign Influence Operations Weaponization of Civil Society, Ideology, Culture, Crime, and Energy Kremlin Interference in Semi-Consolidated Democracies and Transitional Governments Kremlin Interference in Consolidated Democracies Multilateral and U.S. efforts to Counter the Kremlin's Asymmetric Arsenal In *Putin's Asymmetric Assault on Democracy in Russia and Europe*, we learn about Vladimir Putin's rise to power through the KGB to mayor of St. Petersburg and eventually as head of the Russian state. We discover the history of how Putin used classic Cold War KGB tactics by weaponizing civil society, culture, ideology, and Russia's criminal element against the nascent Russian democracy by cultivating and using ties to NGOs, thinktanks, extremist political groups, the Russian orthodox church, industrial and energy policy, and the Russian Mafia. We also see how the Kremlin then exported this political extortion, intimidation, and monetary corruption first to its Eastern European neighbors, then their western partners in the European Union, and how it has now landed on America's shores. Just as certain people in the intelligence community became increasingly alarmed at the growing strength and sophistication of Al-Qaeda in the late 1990s, the senators and staffers of the U.S. Senate Committee on Foreign Relations are giving the nation fair warning of a 9/11-level assault on the United States, this time by Russia's spy agencies. *Putin's Asymmetric Assault on Democracy in Russia and Europe* reveals not only the history of Russia's devastating tactics, but how to recognize and counter them.

Painting & the Market in Early Modern Antwerp Elizabeth A. Honig, 1998-01-01 This study of the ways in which Flemish painting between 1550 and 1650 reflected the burgeoning capitalism of Antwerp, focuses not only on the market-scene paintings, but also on the interaction between painters and markets as it was influenced by merchants, governments and consumers.

Marching Masters Colin Edward Woodward, 2014-03-05 The Confederate army went to war to defend a nation of slaveholding states, and although men rushed to recruiting stations for many reasons, they understood that the fundamental political issue at stake in the conflict was the future of slavery. Most Confederate soldiers were not slaveholders themselves, but they were products of the largest and most prosperous slaveholding civilization the world had ever seen, and they sought to maintain clear divisions between black and white, master and servant, free and slave. In *Marching Masters* Colin Woodward explores not only the importance of slavery in the minds of Confederate soldiers but also its effects on military policy and decision making. Beyond showing how essential the defense of slavery was in motivating Confederate troops to fight, Woodward examines the Rebels' persistent belief

in the need to defend slavery and deploy it militarily as the war raged on. Slavery proved essential to the Confederate war machine, and Rebels strove to protect it just as they did Southern cities, towns, and railroads. Slaves served by the tens of thousands in the Southern armies—never as soldiers, but as menial laborers who cooked meals, washed horses, and dug ditches. By following Rebel troops' continued adherence to notions of white supremacy into the Reconstruction and Jim Crow eras, the book carries the story beyond the Confederacy's surrender. Drawing upon hundreds of soldiers' letters, diaries, and memoirs, *Marching Masters* combines the latest social and military history in its compelling examination of the last bloody years of slavery in the United States.

Food in Painting Kenneth Bendiner, 2004 In this sumptuous exploration of food images in European and American painting from the early Renaissance to the present, Kenneth Bendiner sees food painting as a separate classification of art with its own history.

Shaping the Netherlandish Canon Walter S. Melion, 1991 A treatise on Dutch art on par with Vasari's critical history of Italian art, Karel van Mander's *Schilder-Boeck* (or *Book on Picturing*) has long been recognized for its critical and historical influence--and yet, until now, no comprehensive account of the book's conception, aims, and impact has been available. In this in-depth analysis of the content and context of Van Mander's work, Walter S. Melion reveals the *Schilder-Boeck*'s central importance to an understanding of northern Renaissance and Baroque art. By interpreting the terminology employed in the *Schilder-Boeck*, Melion establishes the text's relationship to past and contemporary art theory. Van Mander is seen here developing his critical categories and then applying them to Ancient, Italian, and Netherlandish artists in order to mark changes within a culture and to characterize excellence for each region. Thus Melion demonstrates how Van Mander revised both the structure and critical language of Vasari's *Lives* to refute the Italian's claims for the superiority of the Tuscan style, and to clarify northern artistic traditions and the concerns of Netherlandish artists. A much needed corrective to the view that Dutch art of the period was lacking in theory, Melion's work offers a compelling account of a sixteenth- and seventeenth-century theoretical and critical perspective and shows how this perspective suggests a rereading of northern art.

Looking East Burglind Jungmann, Kim Young-Jae, Christine Göttler, 2013 Peter Paul Rubens' fascinating depiction of a man wearing Korean costume of around 1617, in the collection of the J. Paul Getty Museum, has been considered noteworthy since it was made. This large drawing was copied in Rubens' studio during his own time and circulated as a reproductive print in the eighteenth century. Despite the drawing's renown, however, the reasons why it was made and whether it actually depicts a specific Asian person remain a mystery. The intriguing story that develops involves a shipwreck, an unusual hat, the earliest trade between Europe and Asia, the trafficking of Asian slaves, and the role of Jesuit missionaries in Asia.--P. Seventeenth-Century Flemish Garland Paintings Susan Merriam, 2017-07-05 Focusing on three celebrated northern European still life painters?Jan Brueghel, Daniel Seghers, and Jan Davidsz. de Heem?this book examines the emergence of the first garland painting in 1607-1608, and its subsequent transformation into a widely collected type of devotional image, curiosity, and decorative form. The first sustained study of the garland paintings, the book uses contextual and formal analysis to achieve two goals. One, it demonstrates how and why the paintings flourished in a number of contexts, ranging from an ecclesiastical center in Milan, to a Jesuit chapter house and private collections in Antwerp, to the Habsburg court in Vienna. Two, the book shows that when viewed over the course of the century, the images produced by Brueghel, Seghers and de Heem share important similarities, including an interest in self-referentiality and the exploration of pictorial form and materials. Using a range of evidence (inventories, period response, the paintings themselves), Susan Merriam shows how the pictures reconfigured the terms in which the devotional image was understood, and asked the viewer to consider in new ways how pictures are made and experienced.

This stunning work provides insights into both the culinary proclivities and table manners of these epic gourmands, answering such questions as What was the daily menu of the dukes of Burgundy? What was behind the sudden enthusiasm for saltwater fish in the 17th century? and Why were exotic desserts so popular in the 19th century? A valuable addition to the historical study of Belgian Noblemen and the ruling elite, this bilingual collection--presented in both English and French--creates a wonderfully rich portrait of the past, from the dukes of Burgundy to Belgian royalty.

The Landscape of Consumption Clé Lesger, 2014-04-29 This volume brings together research on retailing, shopping and urban space; themes that have attracted wide interest in recent decades. The authors argue that the 'modernity' of the nineteenth century is often over-emphasised at the expense of recognising earlier innovation.

Mapping Markets for Paintings in Europe 1450-1750 Neil De Marchi, Hans J. van Miegroet, 2006 Over the course of the fifteenth century easel paintings edged out tapestries, frescoes and wood inlay pictures on the walls of private dwellings. Millions of such paintings were produced in the period 1450-1800, in all shapes and sizes, and across the whole range of prices. Who bought them? How were they distributed? What place did they occupy among other luxury possessions? Such questions seem to require that visual culture be treated as an integral part of family spending and commercial pursuits. This volume is the outcome of a four-year collaboration between art historians, economists, social historians and museum professionals from the US, Australia and Europe; its aim was to map the new ground identified by these and related questions, in local contexts, but with comparative and

longitudinal concerns constantly in mind. The result is an entirely new matrix of the business and artistic interactions through which visual cultures in early modern Europe were formed. The editors, Neil De Marchi and Hans J. Van Miegroet, an economist and an art historian, have collaborated across their disciplines for ten years. Here they have interspersed participants' essays with brief connecting observations, to produce a text that respects disciplinary expertise while making connections across locations and across time. Much has been written about European paintings; but how markets in paintings emerged, who they served, what roles and institutions were developed that enabled them to function effectively, and how exchange affected visual preferences, have not been studied in such a deliberately wide-angled, comparative way. Mapping Markets is not only a book about paintings, but a compendium of cross-disciplinary methods and insights. It charts the state of research in this trans-disciplinary field, identifies gaps, and poses questions for scholars and students wishing to pursue further the issues raised here.

A Cultural History of the Senses in Antiquity Jerry Toner, 2014-10-23 The ancient world used the senses to express an enormous range of cultural meanings. Indeed the senses were functionally significant in all aspects of ancient life, often in ways that were complex and interconnected. Antiquity was also a period where the senses were experienced vividly: cities stank, statues were brightly painted and literature made full use of sensory imagery to create its effects. In a steeply hierarchical world, with vast differences between the landed wealthy, the poor and the slaves, the senses played a key role in establishing and maintaining boundaries between social groups; but the use of the senses in the ancient world was not static. New religions, such as Christianity, developed their own way of using the senses, acquiring unique forms of sensory-related symbolism in processes which were slow and often contested. The aim of this volume is to provide an overview of these structures and developments and to show how their study can yield a more nuanced understanding of the ancient world. A Cultural History of the Senses in Antiquity presents essays on the following topics: the social life of the senses; urban sensations; the senses in the marketplace; the senses in religion; the senses in philosophy and science; medicine and the senses; the senses in literature; art and the senses; and sensory media.
