International Conference on Reliable Systems

Engineering (ICoRSE) - 2023 Daniela Doina

Ciobotă, 2023-09-04 This book comprises state-of-the-art research
results in the field of mechatronics and other closely related areas
and that will be presented on occasion of the third “International
Conference of Reliable Systems Engineering (ICoRSE 2023)” that
will take place in Bucharest, Romania, between 07-08 September
2023. The first two ICoRSE editions brought together professors,
Ph.D. students, and researchers in Europe, North America, and
Asia, in countries such as: England, Albania, Austria, Bulgaria,
Canada, Czech Republic, Germany, France, Italy, Portugal, Turkey,
Ukraine, Uzbekistan, and Vietnam. In this year’s edition of the
conference, we have benefitted from the inclusion in the scientific
committee of the conference of professors in all of these countries,
and we cover a wide variety of topics, such as: theoretical and
applied mechanics; cyber-physical systems, robotics, smart bio-
medical and bio-mechatronic systems, new and intelligent
materials and structures, modelling and simulation in mechanics
and mechatronics, smart mechatronic production and control

system, optics, control systems, big data modelling, micro- and nanotechnology, automation, manufacturing optimization, and other. Since the book's chapters represent contributions of scholars who work in both state-funded institutions and in the business environment, they reflect a clear picture of the novelties attained in the leading-edge sciences that are in the scope of the conference. It is our belief that the book is useful to both students and researchers in all areas of engineering, who will each find at least one topic worthy of their interest in this work.
