TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment (Updated 2019) U.S. Department of Health and Human Services, 2019-11-19

Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.

**Strategic Corporate Social Responsibility** Debbie Haski-Leventhal, 2021-10-13  
With the changing expectations of consumers, employees and regulators, being best in the world is no longer enough. Businesses are now also expected to be best for the world: to be socially and environmentally responsible, sustainable and ethical. Based on the idea that strategic CSR offers the most holistic and effective approach to corporate social responsibility, the author presents the key concepts, theories and philosophical approaches to CSR, along with the practical tools needed to implement this knowledge in the real world. The book is split into three parts; the first part provides the theoretical background of CSR, the second part examines various CSR approaches and how they can be implemented, and the third part discusses measuring and communicating CSR. New this edition is also a chapter titled 'The S in CSR: Social and Global Issues'. Each chapter contains questions for reflection & discussion, exercises, and case studies from globally recognised brands such as Ben & Jerry's, Google, H&M, Johnson & Johnson, Nestlé, Patagonia, Puma, Unilever and Whole Foods. The book is complemented by chapter specific lecturer PowerPoint slides, a draft syllabus and an instructor's manual. Suitable reading for students on Corporate Social Responsibility modules.

**Embodied and grounded cognition** Anna Borghi,Diane Pecher,2012-01-01 In the last 10-15 years, the embodied and grounded cognition approach has become widespread in all fields related to cognitive science, such as cognitive and social psychology, neuroscience, philosophy, anthropology, computational modelling and robotics. According to this approach, our cognitive activity is grounded in sensory-motor processes and situated in specific contexts and situations. Therefore, in this view, concepts consist of the reactivation of the same neural pattern that is present when we perceive and/or interact with the objects they refer to. In the same way, understanding language would imply forming a mental simulation of what is linguistically described. This simulation would entail the recruitment of the same neurons that are activated when actually acting or perceiving the situation, action, emotion, object or entity described by language. In the last years a lot of evidence has been collected in favour of EC and GC view. The aim of this Research Topic is twofold. First, it intends to give an idea of the field of embodied

and grounded cognition in its broadness. We therefore intend to invite scientists of different disciplines (anthropology, philosophy, linguistics, cognitive and social psychology, neuroscience, computer science) to submit their proposals. The second aim of this Research Topic is to focus on some challenges that in our opinion embodied and grounded theories of cognition need to face. First, we believe that one important challenge for EC and GC views is to account for the way the so-called abstract concepts and abstract words are represented. Evidence on the representation of concrete concepts and words is compelling, whereas evidence on abstract concepts representation is still too scarce and limited to restricted domains. We therefore welcome proposals dealing with this complex issue. Second, we think that embodied and grounded theories of cognition would need to formulate more precise hypotheses, and that in general within the field a larger theoretical effort should be made. It is striking that, even if a lot of work in the field of computational modelling and robotics starts from an embodied approach, experimental and modelling work on embodied cognition remain somehow separate. We therefore invite researchers to submit papers proposing models which might help to explain phenomena as well as to constrain and specify in more detail the predictions and the claims advanced within the framework of EC and GC theories.

**Natural Materials of the Holy Land and the Visual Translation of Place, 500-1500** Renana Bartal, Neta Bodner, Bianca Kuhnel, 2017-04-21 *Natural Materials of the Holy Land and the Visual Translation of Place, 500-1500*, focuses on the unique ways that natural materials carry the spirit of place. Since early Christianity, wood, earth, water and stone were taken from *loca sancta* to signify them elsewhere. Academic discourse has indiscriminately grouped material tokens from holy places and their containers with architectural and topographical emulations, two-dimensional images and bodily relics. However, unlike textual or visual representations, natural materials do not describe or interpret the Holy Land; they are part of it. Tangible and timeless, they realize the meaning of their place of origin in new locations. What makes earth, stones or bottled water transported from holy sites sacred? How do they become *pars pro toto*, signifying the whole from which they were taken? This book will examine natural media used for translating *loca sancta*, the processes of their sanctification and how, although inherently abstract, they become charged with meaning. It will address their metamorphosis, natural or induced; how they change the environment to which they are transported; their capacity to translate a static and distant site elsewhere; the effect of their relocation on users/viewers; and how their containers and staging are used to communicate their substance.
