Pathology of Wildlife and Zoo Animals Karen A. Terio,Denise McAloose,Judy St. Leger,2018-10-08 Pathology of Wildlife and Zoo Animals is a comprehensive resource that covers the pathology of wildlife and zoo species, including a wide scope of animals, disease types and geographic regions. It is the definitive book for students, biologists, scientists, physicians, veterinary clinicians and pathologists working with non-domestic species in a variety of settings. General chapters include information on performing necropsies, proper techniques to meet the specialized needs of forensic cases, laboratory diagnostics, and an introduction into basic principles of comparative clinical

pathology. The taxon-based chapters provide information about disease in related groups of animals and include descriptions of gross and histologic lesions, pathogenesis and diagnostics. For each group of animals, notable, unique gross and microscopic anatomical features are provided to further assist the reader in deciding whether differences from the domestic animal paradigm are normal. Additional online content, which includes text, images, and whole scanned glass slides of selected conditions, expands the published material resulting in a comprehensive approach to the topic. Presents a single resource for performing necropsies on a variety of taxa, including terrestrial and aquatic vertebrates and invertebrates Describes notable, unique gross and microscopic anatomical variations among species/taxa to assist in understanding normal features, in particular those that can be mistaken as being abnormal Provides consistent organization of chapters with descriptions of unique anatomic features, common non-infectious and infectious diseases following brief overviews of the taxonomic group Contains full-color, high quality illustrations of diseases Links to a large online library of scanned slides related to topics in the book that illustrate important histologic findings

Pediatric Ophthalmology and Strabismus Kenneth W. Wright, MD,Yi Ning J. Strube,2012-09-27

For over the past ten years Pediatric Ophthalmology and Strabismus has become the leading textbook in the specialty of pediatric ophthalmology and strabismus. A comprehensive, user-friendly text written and organized by leading pediatric ophthalmologists, this newly updated third edition will certainly live up to the top-selling, authoritative volume that preceded it. Both encyclopedic in scope and breadth, this new edition is now more illustrative than ever, and includes: - More than 680 detailed color photographs. - Tables, charts, and decision-making guidelines add to the practicality of the text. - A DVD with edited short videos of pediatric ophthalmology and strabismus surgery performed by experts in the field. Featured surgeries include: plastics, glaucoma, intraocular contact lens refractive, strabismus, and various techniques of cataract/IOL implantation. The third edition of Pediatric Ophthalmology and Strabismus also includes fully-revised and updated chapters to elucidate the latest

discoveries in pediatric ophthalmology and the fields of strabismus, ophthalmic genetics, and pediatric retina. More portable and highly illustrative, this extremely useful text is still a major reference in this field.

Barile's Clinical Toxicology Frank A. Barile, 2019-04-24 As with the two previous editions, Barile's Clinical Toxicology: Principles and Mechanisms, Third edition, examines the complex interactions associated with clinical toxicological events as a result of therapeutic drug administration or chemical exposure. With special emphasis placed on signs and symptoms of diseases and pathology caused by toxins and clinical drugs, the new edition, examines the complex interactions associated with clinical toxicological events as a result of therapeutic drug administration or chemical exposure. The new edition presents the latest, up-to-date protocols for managing various toxic ingestions, and the antidotes and treatments associated with their pathology. In addition, the effect of toxins on a limited number of body systems and drug-induced adverse drug reactions are also covered. KEY FEATURES

- Discusses source of the drug or chemical, pharmacological and toxicological mechanisms of action,

detection, identification, and treatment • Examines the complex interactions associated with clinical toxicological events • Emphasizes the signs and symptoms of diseases and pathology caused by toxins and clinical drugs • Covers effect of toxins on body systems and drug-induced adverse reactions • Offers a unique perspective for toxicology, pharmacology, pharmacy and health professions students The target audience for this book is undergraduate and graduate toxicology students, clinical pharmacy (Pharm.D.) students, emergency medical personnel, regulatory agencies, and other related health science professionals. It satisfies an essential need for a concise yet detailed authoritative, fundamental text addressing the current principles of clinical toxicology.
