Information Systems Security Rudrapatna K. Shyamasundar,Virendra Singh,Jaideep Vaidya,2017-12-08 This book constitutes the refereed proceedings of the 13th International Conference on Information Systems Security, ICISS 2017, held in Mumbai, India, in December 2017. The 17 revised full papers and 7 short papers presented together with 2 invited papers were carefully reviewed and selected from 73 submissions. The papers address the following topics: privacy/cryptography, systems security, security analysis, identity management and access control, security attacks and detection, network security.

Knowledge and Information Visualization Sigmar-Olaf Tergan,Tanja Keller,2005-06-28 formation. The basic ideas underlying knowledge visualization and information vi- alization are outlined. In a short preview of the contributions of this volume, the idea behind each approach and its contribution to the goals of the book are outlined. 2 The Basic Concepts of the Book Three basic concepts are the focus of this book: data, information, and kno- edge. There have been numerous attempts to define the terms data, information, and knowledge, among them, the OTEC Homepage Data, Information, Kno- edge, and Wisdom (Bellinger, Castro, & Mills, see <http://www.syste-thinking.org/dikw/dikw.htm>): Data are raw. They are symbols or isolated and non-interpreted facts. Data rep- sent a fact or statement of event without any relation to other data. Data simply exists and has no significance beyond its existence (in and of itself). It can exist in any form, usable or not. It does not have meaning of itself.

Essentials of Biostatistics in Public Health Lisa M. Sullivan,2023-02-28 Essentials of Biostatistics in Public Health, Fourth Edition provides a fundamental and engaging background for students learning to apply and appropriately interpret biostatistics applications in the field of public health. Many examples are drawn directly from the author's remarkable clinical experiences with the renowned Framingham Heart Study, making this text practical, interesting, and accessible for those with little mathematical background. The examples are real, relevant, and manageable in size so that students can easily focus on applications rather than become overwhelmed by computations. The Fourth Edition has been thoroughly updated, and now offers a new chapter on career opportunities in biostatistics and new case studies focused on COVID-19 within each chapter. This edition also includes free access to JMP® Student Subscription (a \$29.95 value). New cases based on COVID-19 highlight the importance and practical applications of biostatistics for addressing the pandemic.

Service Engineering & Management Tilo Böhmann,Ralf Knackstedt,Jan Marco Leimeister,Markus Nüttgens,Oliver Thomas,2012 Durch die wachsende Bedeutung von Dienstleistungen wird deren Entwicklung und Management zur Schlüsselkompetenz in vielen Unternehmen. Dies bringt aber Herausforderungen mit sich, die in der Wissenschaft noch unzureichend untersucht sind. Die Beiträge in diesem Band stellen aktuelle Forschungsergebnisse zu Modellen, Methoden und Werkzeugen vor, die die Entwicklung und das Management von Dienstleistungen unterstützen. Das Buch fasst die Beiträge zusammen, die im Rahmen der Teilkonferenz Service Engineering & Management der Multikonferenz Wirtschaftsinformatik (MKWI) 2012 in Braunschweig veröffentlicht wurden.

Sign Language Acquisition Anne Baker,Bencie Woll,2009-01-14 How children acquire a sign language and the stages of sign language development are extremely important topics in sign linguistics and deaf education, with studies in this field enabling assessment of an individual child's communicative skills in comparison to others. In order to do research in this area it is important to use the right methodological tools. The contributions to this volume address issues covering the basics of doing sign acquisition research, the use of assessment tools, problems of transcription, analyzing narratives and carrying out interaction studies. It serves as an ideal reference source for any researcher or student of sign languages who is planning to do such work. This volume was originally published as a Special Issue of Sign Language & Linguistics 8:1/2 (2005)

Murderers and Nerdy Girls Work Late Lisa Boero,2013-08 Quarterfinalist, 2013 Amazon Breakthrough Novel Award - Liz Howe, an intrepid young law student and small town Wisconsin girl, triumphantly secures a plum spot as a summer associate at a prestigious St. Louis law firm. But Liz soon discovers that she has a few small problems: the body in the stairwell; the embezzlement at her firm; and the fact that the man she wants is engaged to someone else. And just how is she supposed to chase a murder suspect in heels? Minor details. Liz's real problem is much bigger. Neurological defects don't tend to make you popular, and she has a doozy. She can't recognize faces. Not even her own. Fortunately, this is exactly the thing to turn Liz into the likeliest of unlikely detectives. She pays attention to all of the other details that normal people miss. Need someone to guess an occupation by the movement of the hands? Need someone to recognize a person by smell? Need someone to figure out that those shoes were bought on clearance at Macy's last summer? Liz is your detective. Now she just has to harness her unusual skills to solve the case, expose the embezzlement, bring the murderer to justice and get the guy. Nothing a nerdy girl can't handle.

Antagonists in the Church Kenneth C. Haugk,R. S. Perry,Kand Haugk,1988-01-01 This study guide enables church boards, study groups, clergy convocations and other groups to discuss key questions, share experiences, and learn valuable skills for dealing with antagonism.

Perspectives on Classifier Constructions in Sign Languages Karen Emmorey,2003-04-02 Classifier constructions are universal to sign languages and exhibit unique properties that arise from the nature of the visual-gestural modality. The major goals are to bring to light critical issues related to the study of classifier constructions and to present state-of-the-art linguistic and psycholinguistic analyses of these constructions. It is hoped that by doing so, more researchers will be inspired to investigate the nature of classifier constructions across signed languages and further explore the unique aspects of these forms. The papers in this volume discuss the following issues: *how sign language classifiers differ from spoken languages; *cross-linguistic variation in sign language classifier systems; *the role of gesture; *the nature of morpho-syntactic and phonological constraints on classifier constructions; *the grammaticization process for these forms; and *the acquisition of classifier forms. Divided into four parts, groups of papers focus on a particular set of issues, and commentary papers end each section.

Language, Gesture, and Space Karen Emmorey,Judy S. Reilly,2013-06-17 This book brings together papers which address a range of issues regarding the nature and structure of sign languages and other gestural systems, and how they exploit the space in which they are conveyed. The chapters focus on five pertinent areas reflecting different, but related research topics: * space in language and gesture, * point of view and referential shift, * morphosyntax of verbs in ASL, * gestural systems and sign language, and * language acquisition and gesture. Sign languages and gestural systems are produced in physical space; they manipulate spatial contrasts for linguistic and communicative purposes. In addition to exploring the different functions of space, researchers discuss similarities and differences between visual-gestural systems -- established sign languages, pidgin sign language (International Sign), homesign systems developed by deaf children with no sign language input, novel gesture systems invented by hearing nonsigners, and the gesticulation that accompanies speech. The development of gesture and sign language in children is also examined in both hearing and deaf children, charting the emergence of gesture (manual babbling), its use as a prelinguistic communicative device, and its transformation into language-like systems in homesigners. Finally, theoretical linguistic accounts of the structure of sign languages are provided in chapters dealing with the analysis of referential shift, the structure of narrative, the analysis of tense and the structure of the verb phrase in American Sign Language. Taken together, the chapters in this volume present a comprehensive picture of sign language and gesture research from a group of international scholars who investigate a range of communicative systems from formal sign languages to the gesticulation that accompanies speech.

Advances in Nano-Fertilizers and Nano-Pesticides in Agriculture Sudisha Jogaiah,Harikesh Bahadur Singh,Leonardo Fernandes Fraceto,Renata De Lima,2020-11-26 Advances in Nano-fertilizers and Nano-

pesticides in Agriculture: A Smart Delivery System for Crop Improvement explores the use of nanotechnology for the controlled delivery of pesticides, herbicides and fertilizers that improve the safety of products while also increasing the efficiency of food production and decreased environmental pollution. The development of nanodevices such as smart delivery systems to target specific sites, as well as nanocarriers for chemical controlled release are currently important aspects in novel agriculture and require a strong foundation of understanding, not only the technology, but also the resulting impacts. Fills key knowledge- gaps of bio-nanotechnology, how they interact with plant cells and their biological consequences Focuses on agro-nanotechnology which can be utilized for developing healthy seeds Explores the possibilities of macronutrient nano-based fertilizers

The Role of Natural Products in Drug Discovery J. Mulzer,R. Bohlmann,2013-04-17 Natural Products have been important sources of useful drugs from prehistoric times to the present. This book gives an overview about this field and provides important recent contributions to the discovery of new drugs generated by research on natural products. Total synthesis of natural products with interesting biological activities is paving the way for the preparation of new and improved analogs. The methods of combinatorial chemistry permit the selection of the best drug from a large number of candidates. Beyond synthesis and evaluation of organic molecules a number of new bioorganic methods are coming to the fore and will be discucced in this issue of the ERnst schering Research Foundation workshop proceedings.

Cognitive Tools for Learning Piet A.M. Kommers,David H. Jonassen,J. Terry Mayes,2012-12-06 Hypermedia technology needs a creative approach from the outset in the design of software to facilitate human thinking and learning. This book opens a discussion of the potential of hypermedia and related approaches to provide open exploratory learning environments. The papers in the book are based on contributions to a NATO Advanced Research Workshop held in July1990 and are grouped into six sections: - Semantic networking as cognitive tools, - Expert systems as cognitive tools, - Hypertext as cognitive tools, - Collaborative communication tools, - Microworlds: context-dependent cognitive tools, - Implementing cognitive tools. The book will be valuable for those who design, implement and evaluate learning programs and who seek to escape from rigid tactics like programmed instruction and behavioristic approaches. The book presents principles for exploratory systems that go beyond existing metaphors of instruction and provokes the reader to think in a new way about the cognitive level of human-computer interaction.

Language, Cognition, and the Brain Karen Emmorey,2001-11 Once signed languages are recognized as natural human languages, a world of exploration opens up. Signed languages provide a powerful tool for investigating the nature of human language and language processing, the relation between cognition and language, and the neural organization of language. The value of sign languages lies in their modality. Specifically, for perception, signed languages depend upon high-level vision and motion processing systems, and for production, they require the integration of motor systems involving the hands and face. These facts raise many questions: What impact does this different biological base have for grammatical systems? For online language processing? For the acquisition of language? How does it affect nonlinguistic cognitive structures and processing? Are the same neural systems involved? These are some of the questions that this book aims at addressing. The answers provide insight into what constrains grammatical form, language processing, linguistic working memory, and hemispheric specialization for language. The study of signed languages allows researchers to address questions about the nature of linguistic and cognitive systems that otherwise could not be easily addressed.

Small Business Management Timothy S. Hatten,2005-04 Hatten provides a balanced introduction to both entrepreneurship and small business management before turning his focus toward achieving and maintaining a sustainable competitive advantage as a small organization. Current issues including global opportunities, service, quality and technology are highlighted throughout the text, and the Third Edition features an increased emphasis on small business ownership by women and minority groups. Additional coverage is given to the new Small Business Administration size standards, creating a personalized business plan, and e-commerce. New! A full chapter is devoted to creating a business plan. Two complete plans written by undergraduate students appear in the text—one designed for a service business, the other for a retail establishment. Electronic Business Plan Templates are also available online. New! What Would You Do exercises provide realistic opportunities for students to think critically and realistically. New! Profile in Entrepreneurship boxes spotlight individuals who've created new products and businesses. New! Eduspace course management system. New! Coverage of small business ownership by women and minority groups has been increased throughout the text New! End of chapter questions (Comprehension Checks) have been added to each chapter. Author created supplements including the Instructors Resource Manual, Test Bank and PowerPoint slides, ensure seamless integration of the text and teaching resources. A shorter length accommodates one semester courses without sacrificing important topics.
