The Infinite-Dimensional Topology of Function Spaces J. van Mill,2002-05-24 In this book we study function spaces of low Borel complexity. Techniques from general topology, infinite-dimensional topology, functional analysis and descriptive set theory are primarily used for the study of these spaces. The mix of methods from several disciplines makes the subject particularly interesting. Among other things, a complete and self-contained proof of the Dobrowolski-Marciszewski-Mogilski Theorem that all function spaces of low Borel complexity are topologically homeomorphic, is presented. In order to understand what is going on, a solid background in infinite-dimensional topology is needed. And for that a fair amount of knowledge of dimension theory as well as ANR theory is needed. The necessary material was partially covered in our previous book 'Infinite-dimensional topology, prerequisites and introduction'. A selection of what was done there can be found here as well, but completely revised and at many places expanded with recent results. A 'scenic' route has been chosen towards the Dobrowolski-Marciszewski-Mogilski Theorem, linking the results needed for its proof to interesting recent research developments in dimension theory and infinite-dimensional topology. The first five chapters of this book are intended as a text for graduate courses in topology. For a course in dimension theory, Chapters 2 and 3 and part of Chapter 1 should be covered. For a course in infinite-dimensional topology, Chapters 1, 4 and 5. In Chapter 6, which deals with function spaces, recent research results are discussed. It could also be used for a graduate course in topology but its flavor is more that of a research monograph than of a textbook; it is therefore more suitable as a text for a research seminar. The book consequently has the character of both textbook and a research monograph. In Chapters 1 through 5, unless stated otherwise, all spaces under discussion are separable and metrizable. In Chapter 6 results for more general classes of spaces are presented. In Appendix A for easy reference and some basic facts that are important in the book have been collected. The book is not intended as a basis for a course in topology; its purpose is to collect knowledge about general topology. The exercises in the book serve three purposes: 1) to test the reader's understanding of the material 2) to supply proofs of statements that are used in the text, but are not proven there 3) to provide additional information not covered by the text. Solutions to selected exercises have been included in Appendix B. These exercises are important or difficult.

Sustainable Development Policy and Administration Gedeon M. Mudacumura,Desta Mebratu,M. Shamsul Haque,2017-09-25 Sustainable Development Policy and Administration provides a learning resource describing the major issues that are critical to understanding the multiple dimensions of sustainable development. The overall theme of each contributed chapter in this book is the urgent need to promote global sustainability while adding insights into the challenges facing the current and future generations. This volume brings together diverse contributions that cover the multiple facets of development, resulting in a rich reference for students, development managers, and others interested in this emerging field.

Neotropical Owls Paula L. Enriquez,2017-07-24 This book presents a comprehensive biological and ecological information about owls in the neotropic area. In addition the book covers topics such as threats and conservation strategies for these nocturnal birds of prey from 18 Neotropical countries. Owls are a good example of diversification processes and have developed evolutionary characteristics themselves. These species are found almost everywhere in the world but most of them are distributed in tropical areas and about a third of them live in the Neotropics. This biogeographic region has a high biodiversity and even share lineages of species from other continents because at some point all were part of Pangea. Although we still have much to know and understand about this diverse, scarcely studied and threatened group this work aims to be a precedent for future and further research on the subject.

Disease Pathways Anastasia P. Nesterova,Anton Yuryev,Eugene A. Klimov,Maria Zharkova,Maria Shkrob,Natalia V. Ivanikova,Sergey Sozin,Vladimir Sobolev,2019-10-18 Disease Pathways: An Atlas of Human Disease Signaling Pathways is designed to fill a void of illustrated reviews about the cellular mechanisms of human diseases. It covers 42 of the most common non-oncologic diseases and illustrates the connections between the molecular causes of the disease and its symptoms. This resource provides readers with detailed information about the disease molecular pathways, while keeping the presentation simple. Pathway models that aggregate the knowledge about protein-protein interactions have become indispensable tools in many areas of molecular biology, pharmacology, and medicine. In addition to disease pathways, the book includes a comprehensive overview of molecular signaling biology and application of pathway models in the analysis of big data for drug discovery and personalized medicine. This is a must-have reference for general biologists, biochemists, students, medical workers, and everyone interested in the

cellular and molecular mechanisms of human disease. Over 145 full-color illustrations of the molecular and cellular cascades underlying the disease pathology. Disease pathways are based on computational models from Elsevier’s Disease Pathway Collection, published for the first time outside of Pathway Studio® commercial software. Each relationship on the pathway models is supported by references to scientific articles and can be examined at freely available online resources.

Interdisciplinary Insights on Fraud Antônio Maia,José Antônio Moreira,Carlos Pimenta,2014-04-11 This book fills an essential gap in the existing literature by analyzing fraud, and the weakening of ethical relations as parts of an overall global process, in an interdisciplinary, international and multidimensional perspective. It provides an in-depth analysis of fraud in its multiple facets, including financial fraud (most notably related to banking), fiscal/tax fraud (tax compliance and the role of government in the process), and academic fraud (exams misconduct and plagiarism). It also presents a set of methods and empirical evidence on the prevention and combating of fraud in distinct settings, such as money laundering, fraudulent investments schemes, and public procurement mismanagement, and economies, including Brazil, Canada, France, and Portugal.
