Accessibility and Diversity in the 21st Century University Berg, Gary A., Venis, Linda, 2020-05-01 In higher education institutions across the world, rapid changes are occurring as the socio-economic composition of these universities is shifting. The participation of females, ethnic minority groups, and low-income students has increased exponentially, leading to major changes in student activities, curriculum, and overall campus culture. Significant research is a necessity for understanding the need of broader educational access and promoting a newly empowered diverse population of students in today's universities. Accessibility and Diversity in the 21st Century University is a pivotal reference source that provides vital research on the provision of higher educational access to a more diverse population with a specific focus on the growing population of women in the university, key intersections with race and sexual preference, and the experiences of low-income students, mid-career and reentry students, and special needs populations. While highlighting topics such as adult learning, race-based achievement gaps, and women's studies, this publication is ideally designed for educators, higher education faculty, deans, provosts, chancellors, policymakers, sociologists, anthropologists, researchers, scholars, and students seeking current research on modern advancements of diversity in higher education systems.

A National Security Staff for the 21st Century Jack A. LeCuyer, 2012 Our legacy 1947/1989 national security system is unsuited for the dynamic and complex global security environment that has developed since the end of the Cold War. Over time, the National Security Council has evolved from the very limited advisory group initially imagined by President Truman to that of a vast network of interagency groups that were developed since 1989. These interagency groups view themselves as deeply involved in integrating policy development, crisis management, and staffing for the President. However, the National Security Staff (NSS) and the national security system are relics of the industrial age -- vertical stovepipes -- in an age that demands that the management of the national security system be conducted at the strategic level. What is required is a true national security strategy based on ends, ways, and means; the alignment of resources with integrated national security missions; and the assessment and accountability of management functions that should be performed by a properly resourced NSS unburdened from the urgency of the 24/7 news cycle. The President's National Security Strategy of May 2010 calls for reform in many of these areas. Section 1072 of the 2012 Defense Authorization Act calls upon the President to outline the changes and resources that are needed in both the executive branch and in Congress to implement his national security strategy. The President's response to this legislative mandate can and should be the first step in a strategic partnership for transforming our national security system, in both the executive branch and the Congress, to that of a system that can meet and anticipate the challenges and opportunities for ensuring our security and well-being.

The Quantified Worker Ifeoma Ajunwa,2023-04-30 The information revolution has ushered in a data-driven reorganization of the workplace. Big data and AI are used to surveil workers and shift risk. Workplace wellness programs appraise our health. Personality job tests calibrate our mental state. The monitoring of social media and surveillance of the workplace measure our social behavior. With rich historical sources and contemporary examples, The Quantified Worker explores how the workforce science of today goes far beyond increasing efficiency and threatens to erase individual personhood. With exhaustive detail, Ifeoma Ajunwa shows how different forms of worker quantification are enabled, facilitated, and driven by technological advances. Timely and eye-opening, The Quantified Worker advocates for changes in the law that will mitigate the ill effects of the modern workplace.

Energy Security Challenges for the 21st Century Gal Luft,Anne Korin,2009-08-10 The impact of energy on global security and economy is clear and profound, and this is why in recent years energy security has become a source of concern to most countries. However, energy security means different things to different countries based on their geographic location, their endowment of resources their strategic and economic conditions. In this book, Gal Luft and Anne Korin with the help of twenty leading experts provide an overview of the world's energy system and its vulnerabilities that underlay growing concern over energy security. It hosts a debate about the feasibility of resource conflicts and covers issues such as the threat of terrorism to the global energy system, maritime security, the role of multinationals and non-state actors in energy security, the pathways to energy security through diversification of sources and the development of alternative energy sources. It delves into the various approaches selected producers, consumers and transit states have toward energy security and examines the domestic and foreign policy tradeoffs required to ensure safe and affordable energy supply. The explains the various pathways to energy security and the tradeoffs among them and demonstrates how all these factors can be integrated in a larger foreign and domestic policy framework. It also explores the future of nuclear power, the complex relations between energy security and environmental concerns and the role for decentralized energy as a way to enhance energy security.

Tribes and Territories in the 21st Century Paul Trowler,Murray Saunders,Veronica Bamber,2012-01-25 The 'tribes and territories' metaphor for the cultures of academic disciplines and their roots in different knowledge characteristics has been used by those interested in university life and work since the early 1990s. This book draws together research, data and theory to show how higher education has gone through major change since then and how social theory has evolved in parallel. Together these changes mean there is a need to re-theorise academic life in a way which reflects changed contexts in universities in the twenty-first century, and so a need for new metaphors. Using a social practice approach, the editors and contributors argue that disciplines are alive and well, but that in a turbulent environment where many other forces conditioning academic practices exist, their

influence is generally weaker than before. However, the social practice approach adopted in the book highlights how this influence is contextually contingent – how disciplines are deployed in different ways for different purposes and with varying degrees of purchase. This important book pulls together the latest thinking on the subject and offers a new framework for conceptualising the influences on academic practices in universities. It brings together a distinguished group of scholars from across the world to address questions such as: Have disciplines been displaced by inter-disciplinarity, having outlived their usefulness? Have other forces acting on the academy pushed disciplines into the background as factors shaping the practices of academics and students there? How significant are disciplinary differences in teaching and research practices? What is their significance in other areas of work in universities? This timely book addresses a pressing concern in modern education, and will be of great interest to university professionals, managers and policy-makers in the field of higher education.

Global Business Mahesh Joshi, James R. Klein, 2018-08-09 In the wake of the Brexit vote and the election of Donald Trump, globalization has found itself increasingly under the microscope. An active international discussion is underway, and the ideological viewpoint that the reversal of globalization and a return to protectionism and isolation will cure the world's ills is touted by many. In the midst of the growing prominence of international interconnectivity and contradicting attention attained by skewed misinformation about global impact, *Global Business* is a straightforward commentary on mega trends in globalization. With insights and observations from academics, practitioners, and practical thinkers from around the world *Global Business* demystifies the economic, social, and cultural impacts of globalism and globalization, and presents a balanced explanation of what is happening and how it affects everyone. It highlights that technology and change are not new, and explores the path taken to reach our current interconnected global state. It encourages a realistic examination of where we are and invites a dialogue on where we can go together.

Building Libraries for the 21st Century T.D. Webb, 2012-11-30 Despite calls for electronic, virtual, digital libraries without walls, the walled variety are still being built, some of them massive. This book explores the reasons for this contradiction by examining several notable new library facilities around the world to see how modern expectations for libraries are being translated into concrete and steel. More and more libraries are looking at change not as a dreaded hazard but as an opportunity that can itself be seized to strengthen the library in the areas of mission, technologies, facilities, funding, and organizational structure. Thirteen libraries are discussed—by a librarian or administrator who worked on the project. Each author writes about the design and building concerns that were particularly relevant to that library: philosophy, political issues, or any other concerns that affected planning, building, and services in the new facility. Introductory and concluding chapters identify underlying values and themes, tying everything together. The unique combinations of issues,

constraints, and opportunities show how libraries are planning to fit into the approaching era of virtual information delivery.

The SAGE Handbook of the 21st Century City Suzanne Hall, Ricky Burdett, 2017-04-27 The SAGE Handbook of the 21st Century City focuses on the dynamics and disruptions of the contemporary city in relation to capricious processes of global urbanisation, mutation and resistance. An international range of scholars engage with emerging urban conditions and inequalities in experimental ways, speaking to new ideas of what constitutes the urban, highlighting empirical explorations and expanding on contributions to policy and design. The handbook is organised around nine key themes, through which familiar analytic categories of race, gender and class, as well as binaries such as the urban/rural, are readdressed. These thematic sections together capture the volatile processes and intricacies of urbanisation that reveal the turbulent nature of our early twenty-first century: Hierarchy: Elites and Evictions Productivity: Over-investment and Abandonment Authority: Governance and Mobilisations Volatility: Disruption and Adaptation Conflict: Vulnerability and Insurgency Provisionality: Infrastructure and Incrementalism Mobility: Re-bordering and De-bordering Civility: Contestation and Encounter Design: Speculation and Imagination This is a provocative, inter-disciplinary handbook for all academics and researchers interested in contemporary urban studies.

State of The Global Workplace Gallup, 2017-12-19 Only 15% of employees worldwide are engaged at work. This represents a major barrier to productivity for organizations everywhere – and suggests a staggering waste of human potential. Why is this engagement number so low? There are many reasons – but resistance to rapid change is a big one, Gallup's research and experience have discovered. In particular, organizations have been slow to adapt to breakneck changes produced by information technology, globalization of markets for products and labor, the rise of the gig economy, and younger workers' unique demands. Gallup's 2017 State of the Global Workplace offers analytics and advice for organizational leaders in countries and regions around the globe who are trying to manage amid this rapid change. Grounded in decades of Gallup research and consulting worldwide -- and millions of interviews -- the report advises that leaders improve productivity by becoming far more employee-centered; build strengths-based

organizations to unleash workers' potential; and hire great managers to implement the positive change their organizations need not only to survive – but to thrive.
