This book will aim to explain some of the complexities of project management and managerial relationships with stakeholders by discussing the practice of stakeholder engagement, dialog, measurement and management and the consequences of this practice for reporting and productivity, and performance within project management.

It was founded in 1960 under the auspices of UNESCO. It is organized into several technical committees. This book represents the proceedings of the 2006 conference of technical committee 8 (TC8), which covers the field of information systems. The proceedings reflect not only the breadth and depth of the work of TC8, but also the international nature of the group, with authors from 18 countries being represented in the 21 papers (including two invited papers) and 2 panels. All submissions were rigorously refereed by at least two reviewers and an associate editor and following the review and resubmission process nearly 50% of submissions were accepted. This paper introduces the papers and panels presented at the conference and published in this volume. Project Benefit Realisation and Project Management Raymond C. Young, Vedran Zerjav, 2021-09-20 PROJECT BENEFIT REALISATION AND PROJECT MANAGEMENT Dispels the confusion between project management success and project success, showing how project sponsors can govern their projects to succeed in delivering the strategic benefits originally envisaged Project management success does not automatically lead to project success. Many large projects fail to live up to expectations, with between half and two-thirds of large projects either failing to deliver or delivering few strategic benefits. Traditional project management resources focus on delivering a project on time and on budget, yet they fail to supply top managers, many of whom find themselves in the role of accidental project sponsors, with guidance on how to govern their projects to succeed. Project Benefit Realisation and Project Management: The 6Q Governance Approach bridges the strategy to performance gap by providing boards, senior managers and project sponsors with the six critical questions necessary to diagnose the health of any project. Presenting a systematic framework developed from research cases of successful and unsuccessful projects in various types of organisations, this practical guide enables those in top management to determine if their strategy or policy is on track and to assess whether a project is likely to deliver the expected benefits. The text features real-world examples illustrating how concepts can be applied to different types of projects in engineering, construction, information technology, business transformation and many others. This must-have guide is designed to help top managers and other stakeholders: Clarify the link between business outcomes, benefits, and strategy to evaluate where effort should be directed Assess how much behavioural change is required to effectively implement strategy and realise desired benefits Select a project sponsor committed to influencing key stakeholders to make necessary changes and intercede to resolve issues as they arise Establish how success will be measured before a project begins, to gauge sponsor commitment and ensure project goals are not changed to match whatever is achieved Ask if the right culture is in place to ensure all relevant information is being reported Determine teams' ability to adapt and change plans in response to issues arising in the project Monitor if the project is on track to realising the benefits and have a process in place to cancel failing projects Project Benefit Realisation and Project Management: The 6Q Governance Approach is an indispensable volume for board members, project sponsors, project advisors and those in senior positions who find themselves in the role of accidental project sponsors.
