Coping and Prevention James A. Meurs, Ana Maria Rossi, Pamela L.

Perrewé, 2012-01-01 Continuous activity and high job demands surround corporate environments. These demands are considered to be key triggers for workers' stress-related symptoms and poor health. It has been estimated by the American Institute of Stress (AIS) that US\$ 300 billion/year are spent on conditions related to excessive stress levels. Of course, occupational stressors are an unavoidable part of working life. Experienced stress has helped us to survive for thousands of years and keeps us vigilant under critical situations. Of course, too much experienced stress can lead to serious psychological and physical health problems. This book is devoted to examining important issues related to coping with and preventing elevated occupational stress. This book also examines individual differences and organizational cultures that might exacerbate or mitigate experienced stress. If we consider all choices available, it is better to prevent than to treat. Prevention can be primary, when we prevent the stress-generating situation from occurring; secondary, when we provide alternatives to minimize the damage caused by the problem and tertiary, which involves containing losses that have occurred to prevent them from becoming more serious. This book on stress prevention and coping with stress is intended to assist occupational health professionals and academics to improve their abilities to help employees managing stress, but it also can be helpful for individual workers as they learn to better handle stressors at work. The research findings and views presented by these well-respected leaders in stress research provide tools for those currently experiencing workplace stress and supplies information concerning how stress can be prevented before it occurs.

Как написать электронную книгу-бестселлер Антон

Добровольский, 2018-06-15 Написание книги похоже на марафон, путешествие по миру или другой долгосрочный проект, о котором люди любят поговорить, но при этом немногие серьезно берутся за его исполнение. Вы должны доказать, что знаете, как воплотить свои мечты в реальность, и вас не должны пугать тяжелая работа и борьба, как с обстоятельствами, так и с самим собой. Если вы уверены, что можете написать книгу, то что мешает вам завоевать остальной мир?

Book Love Penny Kittle, 2013 Describes why secondary students don't read, and offers teachers practical advice and strategies for developing depth, stamina, and passion in adolescent readers.

Self-Organizing Maps Teuvo Kohonen, 2012-12-06 The second, revised edition of this book was suggested by the impressive sales of the first edition. Fortunately this enabled us to incorporate new important results that had just been obtained. The ASSOM (Adaptive-Subspace SOM) is a new architecture in which invariant-feature detectors emerge in an unsupervised learning process. Its basic principle was already introduced in the first edition, but the motivation and theoretical discussion in the second edition is more thorough and consequent. New material has been added to Sect. 5.9 and this section has been rewritten totally. Correspondingly, Sect. 1.4, which deals with adaptive subspace classifiers in general and constitutes the prerequisite for the ASSOM principle, has also been extended and rewritten totally. Another new SOM development is the WEBSOM, a two-layer architecture intended for the organization of very large collections of full-text documents such as those found in the Internet and World Wide Web. This architecture was published after the first edition came out. The idea and results seemed to be so important

that the new Sect. 7.8 has now been added to the second edition. Another addition that contains new results is Sect. 3.15, which describes the acceleration in the computing of very large SOMs. It was also felt that Chap. 7, which deals with 80M applications, had to be extended.

Conferring with Young Writers Kristin Ackerman, Jennifer McDonough, 2016 If you've ever sat down to confer with a child and felt at a loss for what to say or how to help move him or her forward as a writer, this book is for you. If you are a strong teacher of writing but are not seeing results from your students, this book is for you. Authors Kristin Ackerman and Jennifer McDonough have been teaching writing for several years and know that conferring can be a murky and messy process--perhaps the hardest component of all. Written from the lessons they've learned through hard-won classroom experience--their mistakes and challenges--*Conferring with Young Writers* is based on what Kristin and Jen call the three Fs frequency, focus, and follow-up. They've created a classroom

management system that offers routine and structure for giving the most effective feedback in a writing conference. This book will help writing teachers--and students--learn to break down and utilize the qualities that enable good writing: elaboration, voice, structure, conventions, and focus. The authors also provide the knowledge and skills it takes to confer well, which will help you improve as a writing teacher and give your students the confidence to think of themselves as writers.

Education for Life and Work National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Board on Testing and Assessment, Committee on Defining Deeper Learning and 21st Century Skills, 2013-01-18 Americans have long recognized that investments in public education contribute to the common good, enhancing national prosperity and supporting stable families, neighborhoods, and communities. Education is even more critical today, in the face of economic, environmental, and social challenges. Today's children can meet future challenges if their schooling and informal learning activities prepare them for adult roles as citizens, employees, managers, parents, volunteers, and entrepreneurs. To achieve their full potential as adults, young people need to develop a range of skills and knowledge that facilitate mastery and application of English, mathematics, and other school subjects. At the same time, business and political leaders are increasingly asking schools to develop skills such as problem solving, critical thinking, communication, collaboration, and self-management - often referred to as 21st century skills. Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century describes this important set of key skills that increase deeper learning, college and career readiness, student-centered learning, and higher order thinking. These labels include both cognitive and non-cognitive skills- such as critical thinking, problem solving, collaboration, effective communication, motivation, persistence, and learning to learn. 21st century skills also include creativity, innovation, and ethics that are important to later success and may be developed in formal or informal learning environments. This report also describes how these skills relate to each other and to more traditional academic skills and content in the key disciplines of reading, mathematics, and science. Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century summarizes the findings of the research that investigates the importance of such skills to success in education, work, and other areas of adult responsibility and that demonstrates the importance of developing these skills in K-16 education. In this report, features related to learning these skills are identified, which include teacher professional development, curriculum, assessment, after-school and out-of-school programs, and informal learning centers such as exhibits and museums.
