*Reactive Spring* Josh Long,2020-09-15 Microservices and big-data increasingly confront us with the limitations of traditional input/output. In traditional IO, work that is IO-bound dominates threads. This wouldn't be such a big deal if we could add more threads cheaply, but threads are expensive on the JVM, and most other platforms. Even if threads were cheap and infinitely scalable, we'd still be confronted with the faulty nature of networks. Things break, and they often do so in subtle, but non-exceptional ways. Traditional approaches to integration bury the faulty nature of networks behind overly simplifying abstractions. We need something better.Join Spring Developer Advocate Josh Long for an introduction to reactive programming in the Spring ecosystem, leveraging the reactive streams specification, Reactor, Spring Boot, Spring Cloud and so much more.This book will cover important concepts in reactive programming including project Reactor and the reactive streams specification, data access, web programming, RPC with protocols like RSocket, testing, and integration and composition, and more.

Global Aging and Challenges to Families Vern Bengtson,2018-01-16 The recent explosion in population ageing across the globe represents one of the most remarkable demographic changes in human history. Population ageing will profoundly affect families. Who will care for the growing numbers of tomorrows very old members of societies? Will it be state governments? The aged themselves? Their families? The purpose of this book is to examine consequences of global aging for families and intergenerational support, and for nations as they plan for the future.

*Sin & Magic* K. F. Breene,2019 I've agreed to work for a Demigod to find the spirit of his mother and release her before his vengeful father finds out and kills us all. Thankfully, Kieran has brought in a Necromancer to help - and also to help me learn to control my magic. But as we work deeper into magical San Francisco, I'm learning that there are far worse things than death.

*Origins of Human Language* Louis-Jean Boë,Joël Fagot,Pascal Perrier,Jean-Luc Schwartz,2017 This book proposes a detailed picture of the continuities and ruptures between communication in primates and language in humans. It explores a diversity of perspectives on the origins of language, including a fine description of vocal communication in animals, mainly in monkeys and apes, but also in birds, the study of vocal tract anatomy and cortical control of the vocal productions in monkeys and apes, the description of combinatorial structures and their social and communicative value, and the exploration of the cognitive environment in which language may have emerged from nonhuman primate vocal or gestural communication.

**Evidence-Based Interventional Pain Medicine** Jan Van Zundert,Jacob Patijn,Craig

Hartrick,Arno Lataster, Frank Huygen, Nagy Mekhail, Maarten van Kleef, 2011-10-19 Unrelieved chronic pain is a worldwide epidemic Chronic pain has been subject to multiple international initiatives through the World Health Organization. Interventional Pain Medicine, the use of minimally invasive techniques to relieve pain, is the best approach when simpler measures such as physical therapy or medications fail. However, these procedures can be associated with significant risk and expense. Establishing uniformity in diagnostic criteria and procedural performance can reduce both morbidity and unnecessary procedures, and hence healthcare expenditures. While other texts explain how to perform these procedures, little focus has been given to diagnostic considerations: if and when these procedures should be performed. Evidence-Based Interventional Pain Medicine focuses on a balance between effectiveness and safety of interventional management for specific diagnoses, across all areas of chronic pain including: Head, neck and shoulder pain Lower back pain Neuropathic pain syndromes Complex Regional Pain Syndrome Pain in patients with cancer Vascular and visceral pain Evidence-Based Interventional Pain Medicine provides essential knowledge for anyone who uses, or intends to use, interventional pain techniques.

**Kingpin** Kevin Poulsen, 2012-02-07 Former hacker Kevin Poulsen has, over the past decade, built a reputation as one of the top investigative reporters on the cybercrime beat. In *Kingpin*, he pours his unmatched access and expertise into book form for the first time, delivering a gripping cat-and-mouse narrative—and an unprecedented view into the twenty-first century's signature form of organized crime. The word spread through the hacking underground like some unstoppable new virus: Someone—some brilliant, audacious crook—had just staged a hostile takeover of an online criminal network that siphoned billions of dollars from the US economy. The FBI rushed to launch an ambitious undercover operation aimed at tracking down this new kingpin; other agencies around the world

deployed dozens of moles and double agents. Together, the cybercops lured numerous unsuspecting hackers into their clutches. . . . Yet at every turn, their main quarry displayed an uncanny ability to sniff out their snitches and see through their plots. The culprit they sought was the most unlikely of criminals: a brilliant programmer with a hippie ethic and a supervillain's double identity. As prominent "white-hat" hacker Max "Vision" Butler, he was a celebrity throughout the programming world, even serving as a consultant to the FBI. But as the black-hat "Iceman," he found in the world of data theft an irresistible opportunity to test his outsized abilities. He infiltrated thousands of computers around the country, sucking down millions of credit card numbers at will. He effortlessly hacked his fellow hackers, stealing their ill-gotten gains from under their noses. Together with a smooth-talking con artist, he ran a massive real-world crime ring. And for years, he did it all with seeming impunity, even as countless rivals ran afoul of police. Yet as he watched the fraudsters around him squabble, their ranks riddled with infiltrators, their methods inefficient, he began to see in their dysfunction the ultimate challenge: He would stage his coup and fix what was broken, run things as they should be run—even if it meant painting a bull's-eye on his forehead. Through the story of this criminal's remarkable rise, and of law enforcement's quest to track him down, Kingpin lays bare the workings of a silent crime wave still affecting millions of Americans. In these pages, we are ushered into vast online-fraud supermarkets stocked with credit card numbers, counterfeit checks, hacked bank accounts, dead drops, and fake passports. We learn the workings of the numerous hacks—browser exploits, phishing attacks, Trojan horses, and much more—these fraudsters use to ply their trade, and trace the complex routes by which they turn stolen data into millions of dollars. And thanks to Poulsen's remarkable access to both cops and criminals, we step inside the quiet, desperate arms race that law enforcement continues to fight with these scammers today. Ultimately, Kingpin is a

journey into an underworld of startling scope and power, one in which ordinary American teenagers work hand in hand with murderous Russian mobsters and where a simple Wi-Fi connection can unleash a torrent of gold worth millions.

*Aging in Sub-Saharan Africa* National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on Policy Research and Data Needs to Meet the Challenge of Aging in Africa, 2006-11-10 In sub-Saharan Africa, older people make up a relatively small fraction of the total population and are supported primarily by family and other kinship networks. They have traditionally been viewed as repositories of information and wisdom, and are critical pillars of the community but as the HIV/AIDS pandemic destroys family systems, the elderly increasingly have to deal with the loss of their own support while absorbing the additional responsibilities of caring for their orphaned grandchildren. *Aging in Sub-Saharan Africa* explores ways to promote U.S. research interests and to augment the sub-Saharan governments' capacity to address the many challenges posed by population aging. Five major themes are explored in the book such as the need for a basic definition of older person, the need for national governments to invest more in basic research and the coordination of data collection across countries, and the need for improved dialogue between local researchers and policy makers. This book makes three major recommendations: 1) the development of a research agenda 2) enhancing research opportunity and implementation and 3) the translation of research findings.

**Troubleshooting Cisco IP Telephony** Paul Giralt, Addis Hallmark, Anne Smith, 2002 In *The Implosion of Capitalism* world-renowned political economist Samir Amin connects the key events of our times - financial crisis, Eurozone implosion, the emerging BRIC nations and the rise of political Islam - identifying them as symptoms of a profound systemic crisis. In light of these major crises and tensions, Amin updates and modifies the classical definitions of social classes, political parties, social movements and ideology. In doing so he exposes the reality of monopoly capitalism in its contemporary global form. In a bravura conclusion, Amin argues that the current capitalist system is not viable and that implosion is unavoidable. *The Implosion of Capitalism* makes clear the stark choices facing humanity - and the urgent need for a more humane global order.

**Rising in the East** Rachel Keeton, 2011 In the west, the design of new towns has always been based on an ideal model in accordance with the ideas of that moment. In the case of the latest generation of new towns in Asia, however, only quantitative and marketing principles seem to play a role: the number of square metres, dwellings or people, or the greenest, most beautiful or most

technologically advanced town. Rising in the east shows which design principles these premises are based on.
