*Kindred* Octavia E. Butler,2022-09-20 The New York Times best-selling author's time-travel classic that makes us feel the horrors of American slavery and indicts our country's lack of progress on racial reconciliation The series adaption from FX premieres December 13 on Hulu. Developed for television by writer/executive producer Branden Jacobs-Jenkins (*Watchmen*), executive producers also include Joe Weisberg and Joel Fields (*The Americans*, *The Patient*), and Darren Aronofsky (*The Whale*). Janicza Bravo (*Zola*) is director and an executive producer of the pilot. *Kindred* stars Mallori Johnson, Micah Stock, Ryan Kwanten, and Gayle Rankin. "I lost an arm on my last trip home. My left arm." Dana's torment begins when she suddenly vanishes on her 26th birthday from California, 1976, and is dragged through time to antebellum Maryland to rescue a boy named Rufus, heir to a slaveowner's plantation. She soon realizes the purpose of her summons to the past: protect Rufus to ensure his assault of her Black ancestor so that she may one day be born. As she endures the traumas of slavery and the soul-crushing normalization of savagery, Dana fights to keep her autonomy and return to the present. Blazing the trail for neo-slavery narratives like Colson Whitehead's *The Underground Railroad* and Ta-Nehisi Coates's *The Water Dancer*, Butler takes one of speculative fiction's oldest tropes and infuses it with lasting depth and power. Dana not only experiences the cruelties of slavery on her skin but also grimly learns to accept it as a condition of her own existence in the present. "Where stories about American slavery are often gratuitous, reducing its horror to explicit violence and brutality, *Kindred* is controlled and precise" (New York Times).

**World Trade Report: The WTO and Preferential Trade Agreements: From Co-Existence to Coherence** World Trade Organization,2011-07 The ever-growing number of preferential trade agreements (PTAs) is a prominent feature of international trade. The World Trade Report 2011 describes the historical development of PTAs and the current landscape of agreements. It examines why PTAs are established, their economic effects, and the contents of the

agreements themselves. Finally it considers the interaction between PTAs and the multilateral trading system. Accumulated trade opening - at the multilateral, regional and unilateral level - has reduced the scope for offering preferential tariffs under PTAs. As a result, only a small fraction of global merchandise trade receives preferences and preferential tariffs are becoming less important in PTAs. The report reveals that more and more PTAs are going beyond preferential tariffs, with numerous non-tariff areas of a regulatory nature being included in the agreements. Global production networks may be prompting the emergence of these deep PTAs as good governance on a range of regulatory areas is far more important to these networks than further reductions in already low tariffs. Econometric evidence and case studies support this link between production networks and deep PTAs. The report ends by examining the challenge that deep PTAs present to the multilateral trading system and proposes a number of options for increasing coherence between these agreements and the trading system regulated by the WTO.

*Practising Virtue* David D. Caron, Stephan W. Schill, Abby Cohen Smutny, Epaminontas E. Triantafyllou, 2015

International arbitration has developed into a global system of adjudication, dealing with disputes arising from a variety of legal relationships: between states, between private commercial actors, and between private and public entities. It operates to a large extent according to its own rules and dynamics - a transnational justice system rather independent of domestic and international law. In response to its growing importance and use by disputing parties, international arbitration has become increasingly institutionalized, professionalized, and judicialized. At the same time, it has gained significance beyond specific disputes and indeed contributes to the shaping of law. Arbitrators have therefore become not only adjudicators, but transnational lawmakers. This has raised concerns over the legitimacy of international arbitration. *Practising Virtue* looks at international arbitration from the 'inside', with an emphasis on its transnational character. Instead of concentrating on the national and international law governing international arbitration, it focuses on those who practice international arbitration, in order to understand how it actually works, what its sources of authority are, and what demands of legitimacy it must meet. Putting those who practice arbitration into the centre of the system of international arbitration allows us to appreciate the way in which they contribute to the development of the law they apply. This book invites eminent arbitrators to reflect on the actual practice of international arbitration, and its contribution to the transnational justice system.

**Oer** Andrew Wesolek, Anne Langley, Jonathan Lashley, 2018-10 For many of us, the drive to affect positive change-- however vague or idiosyncratic our sense of this might be--has guided our work in higher education. We champion the pursuit of a college degree because few endeavors can match it in terms of advancing a person's economic mobility (Chetty, Friedman, Saez, Turner, and Yagan; 2017). Despite recent debates about the value of a college degree (Pew Research Center, 2017), the opportunities and financial stability awarded to those with college degrees remain apparent when they are compared to peers who have only graduated high school (Pew Research Center, 2014). And while more Americans have a college degree than ever before (Ryan and Bauman, 2016), access to a formal, post-secondary education continues to be elusive for some. Indeed, over the last ten years, analysts have

projected that the cost of attending college would keep 2.4 million low-to-moderate income, college-qualified high school graduates from completing a college degree (Advisory Committee on Student Financial Assistance, 2006). During that same period, college students in the United States saw expenses related to tuition and fees increase by 63 percent, school housing costs (excluding board) increase by 51 percent, textbook prices increase by 88 percent (Bureau of Labor, 2016). Because few students can afford a college education by salary alone, 44.2 million Americans have sought financial aid via student loans. As a result, total student loan debt is now topping \$1.45 trillion in the United States (Board of Governors of the Federal Reserve System, 2017), and student loan delinquency rates are averaging 11.2 percent (Federal Reserve Bank of New York, 2017). The burden of a student's financial decisions extends beyond the mere individual: society will inevitably carry the weight of this debt for years to come.

Selected Practice Recommendations for Contraceptive Use World Health Organization. Reproductive Health and Research,World Health Organization,World Health Organization. Family and Community Health,2005 This document is one of two evidence-based cornerstones of the World Health Organization's (WHO) new initiative to develop and implement evidence-based guidelines for family planning. The first cornerstone, the Medical eligibility criteria for contraceptive use (third edition) published in 2004, provides guidance for who can use contraceptive methods safely. This document, the Selected practice recommendations for contraceptive use (second edition), provides guidance for how to use contraceptive methods safely and effectively once they are deemed to be medically appropriate. The recommendations contained in this document are the product of a process that culminated in an expert Working Group meeting held at the World Health Organization, Geneva, 13-16 April 2004.

Harnessing Quality for Global Competitiveness in Eastern Europe and Central Asia Jean-Louis Racine,2011-05-05 Standards are everywhere, yet go mostly unnoticed. They define how products, processes, and people interact, assessing these entities' features and performance and signaling their level of quality and reliability. They can convey important benefits to trade, productivity, and technological progress and play an important role in the health and safety of individual consumers and the environment. Firms' ability to produce competitive products depends on the availability of adequate quality-support services. A "national quality infrastructure" denotes the chain of public and private services (standardization, metrology, inspection, testing, certification, and accreditation) needed to ascertain that products and services introduced in the marketplace meet defined requirements, whether demanded by authorities or by consumers. In much of Eastern Europe and Central Asia, national quality infrastructure systems are underdeveloped and not harmonized with those of their trading partners. This imbalance increases trade costs, hinders local firms' competitiveness, and weakens overall export

performance. The objective of Harnessing Quality for Global Competitiveness in Eastern Europe and Central Asia is to highlight the need to reform and modernize the institutions in the region toward better quality and standards. The book ties in with much of the work done in the World Bank on the business environment, trade facilitation, economic diversification, and enterprise innovation. The countries in the region can improve this situation, revising mandatory standards, streamlining technical regulations, and harmonizing their national quality infrastructure with those of regional and international trade partners. Most governments will need to invest strategically in their national quality infrastructure, including pooling services with neighboring countries and stimulating local awareness and demand for quality. Specifically for the countries of the former Soviet Union, the restructuring process will need to improve governance, thus eliminating conflicts of interest and providing technically credible services to the economy.

*De los recursos naturales a la economía del conocimiento* David M. De Ferranti, 2002 The study questions whether, after a decade of remarkable progress in trade reform, Latin America and the Caribbean really integrates into the global market, offering a promising rapid growth, and good jobs for its workers. For despite the incidence of the loosely called knowledge economy, the concern prevails that most countries' rich natural resources, still are the determining factor for exports. Policy recommendations include fostering openness to trade, market access, and foreign direct investment flows, in addition to building human capital, institutions, and public infrastructure, without disregarding the natural advantages. To this end, policymakers should aim at developing educational systems that provide quality education, focused on lifelong learning, and training activities to build human capital. Emphasis should follow on research and development (R&D) incentives, and innovations systems, arguing that countries should experiment with taxation incentives, and subsidies to promote both private, and public investments in R&D, (dependent on the institutional capacity of governments to enforce tax laws, and monitor the quality of investments). Moreover, evidence in this report, suggests that information, and communications technology (ICT) can reduce coordination costs, enabling an effective industrialization, and market access.
