Electoral Politics in Crisis After the Great Recession Eva H. Önnudóttir, Agnar Freyr Helgason, Ólafur Th. Harðarson, Hulda Thórisdóttir, 2021-09-06 This book examines to what extent politics in Iceland have been transformed in the aftermath of the 2008 financial crisis. The book focuses on whether the short-term sudden shock caused by the Great Recession has permanently transformed politics, political behaviour and the Icelandic party system or whether its effect was primarily transitory. These questions remain highly relevant to the wider field of political science, as the book examines under what circumstances sudden shocks lead to permanent changes in a political system. As such, the book situates the post-crisis Icelandic case both temporally and comparatively and evaluates to what extent the Iceland experience is reflective of broader patterns found in other Western democracies, particularly those other countries that were also hard hit by the Great Recession (e.g. Greece, Ireland, Portugal, Spain and Italy). This book will be of key interest to scholars and students of Nordic politics, Icelandic politics and society, electoral studies, political parties and party systems, representative democracy, political behaviour and more broadly to European and comparative politics. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Applied Supervised Learning with R Karthik Ramasubramanian, Jojo Moolayil, 2019-05-31 Learn the ropes of supervised machine learning with R by studying popular real-world use-cases, and understand how it drives object detection in driver less cars, customer churn, and loan default prediction. Key Features Study supervised learning algorithms by using real-world datasets Fine tune optimal parameters with hyperparameter optimization Select the best algorithm using the model evaluation framework Book Description R provides excellent visualization features that are essential for exploring data before using it in automated learning. *Applied Supervised Learning with R* helps you cover the complete process of employing R to develop applications using supervised machine learning algorithms for your business needs. The book starts by helping you develop your analytical thinking to create a problem statement using business inputs and domain research. You will then learn different evaluation metrics that compare various algorithms, and later progress to using these metrics to select the best algorithm for your problem. After finalizing the algorithm you want to use, you will study the hyperparameter optimization technique to fine-tune your set of optimal parameters. To prevent you from overfitting your model, a dedicated section will even demonstrate how you can

add various regularization terms. By the end of this book, you will have the advanced skills you need for modeling a supervised machine learning algorithm that precisely fulfills your business needs. What you will learn
Develop analytical thinking to precisely identify a business problem
Wrangle data with dplyr, tidyr, and reshape2
Visualize data with ggplot2
Validate your supervised machine learning model using k-fold
Optimize hyperparameters with grid and random search, and Bayesian optimization
Deploy your model on Amazon Web Services (AWS) Lambda with plumber
Improve your model's performance with feature selection and dimensionality reduction
Who this book is for
This book is specially designed for novice and intermediate-level data analysts, data scientists, and data engineers who want to explore different methods of supervised machine learning and its various use cases. Some background in statistics, probability, calculus, linear algebra, and programming will help you thoroughly understand and follow the content of this book.

Families Caring for an Aging America National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Family Caregiving for Older Adults, 2016-11-08 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. *Families Caring for an Aging America* examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

Populist Political Communication in Europe Toril Aalberg, Frank Esser, Carsten Reinemann, Jesper Stromback, Claes De Vreese, 2016-07-01 In an increasing number of countries around the world, populist leaders, political parties and movements have gained prominence and influence, either by electoral successes on their own or by influencing other political parties and the national political discourse. While it is widely acknowledged that the media and the role of communication more broadly are key to understanding the rise and success of populist leaders, parties and movements, there is however very little research on populist political communication, at least in the English-speaking research literature. Originating from a research project funded by the European Cooperation in the field of Scientific and Technical Research (COST), this book seeks to advance this research. It includes examinations of 24 European countries, and focuses on three areas within the context of populism and populist political communication: populist actors as communicators, the media and populism and citizens and populism.

Harnessing Quality for Global Competitiveness in Eastern Europe and Central Asia Jean-Louis Racine, 2011-05-05 Standards are everywhere, yet go mostly unnoticed. They define how products, processes, and people interact, assessing these entities' features and performance and signaling their level of quality and reliability. They can convey important benefits to trade, productivity, and technological progress and play an important role in the health and safety of individual consumers and the environment. Firms' ability to produce competitive products depends on the availability of adequate quality-support services. A "national quality infrastructure" denotes the chain of public and private services (standardization, metrology, inspection, testing, certification, and accreditation) needed to ascertain that products and services introduced in the marketplace meet defined requirements, whether demanded by authorities or by consumers.

In much of Eastern Europe and Central Asia, national quality infrastructure systems are underdeveloped and not harmonized with those of their trading partners. This imbalance increases trade costs, hinders local firms' competitiveness, and weakens overall export performance. The objective of *Harnessing Quality for Global Competitiveness in Eastern Europe and Central Asia* is to highlight the need to reform and modernize the institutions in the region toward better quality and standards. The book ties in with much of the work done in the World Bank on the business environment, trade facilitation, economic diversification, and enterprise innovation. The countries in the region can improve this situation, revising mandatory standards, streamlining technical regulations, and harmonizing their national quality infrastructure with those of regional and international trade partners. Most governments will need to invest strategically in their national quality infrastructure, including pooling services with neighboring countries and stimulating local awareness and demand for quality. Specifically for the countries of the former Soviet Union, the restructuring process will need to improve governance, thus eliminating conflicts of interest and providing technically credible services to the economy.

Why Americans Hate the News Media and How It Matters Jonathan M. Ladd, 2012 As recently as the early 1970s, the news media was one of the most respected institutions in the United States. Yet by the 1990s, this trust had all but evaporated. Why has confidence in the press declined so dramatically over the past 40 years? And has this change shaped the public's political behavior? This book examines waning public trust in the institutional news media within the context of the American political system and looks at how this lack of confidence has altered the ways people acquire political information and form electoral preferences. ... Drawing on historical evidence, experiments, and public opinion surveys, this book shows that in a world of endless news sources, citizens' trust in institutional media is more important than ever before.--

The Oxford Handbook of Political Communication Kate Kenski, Kathleen Hall Jamieson, 2017-06-23 Since its development shaped by the turmoil of the World Wars and suspicion of new technologies such as film and radio, political communication has become a hybrid field largely devoted to connecting the dots among political rhetoric, politicians and leaders, voters' opinions, and media exposure to better understand how any one aspect can affect the others. In *The Oxford Handbook of Political Communication* Kate Kenski and Kathleen Hall Jamieson bring together leading scholars, including founders of the field of political communication Elihu Katz, Jay Blumler, Doris Graber, Max McCombs, and Thomas Paterson, to review the major findings about subjects ranging from the effects of political advertising and debates and understandings and misunderstandings of agenda setting, framing, and cultivation to the changing contours of social media use in politics and the functions of the press in a democratic system. The essays in this volume reveal that political communication is a hybrid field with complex ancestry, permeable boundaries, and interests that overlap with those of related fields such as political sociology, public opinion, rhetoric, neuroscience, and the new hybrid on the quad, media psychology. This comprehensive review of the political communication literature is an indispensable reference for scholars and students interested in the study of how, why, when, and with what effect humans make sense of symbolic exchanges about sharing and shared power. The sixty-two chapters in *The Oxford Handbook of Political Communication* contain an overview of past scholarship while providing critical reflection of its relevance in a changing media landscape and offering agendas for future research and innovation.

Visual Information Communication Mao Lin Huang, Quang Vinh Nguyen, Kang Zhang, 2009-10-20 Visual communication through graphical and sign languages has long been conducted among human beings of different backgrounds and cultures, and in recent decades between human and machine. In today's

digital world, visual information is typically encoded with various metaphors commonly used in daily life to facilitate rapid comprehension and easy analysis during the communication process. Visual information communication generally encompasses information visualization, graphical user-interfaces, visual analytics, visual languages and multi-media processing. It has been successfully employed in knowledge discovery, end-user programming, modeling, rapid systems prototyping, education, and design activities by people of many disciplines including architects, artists, children, engineers, and scientists. In addition, visual information is increasingly being used to facilitate human-human communication through the Internet and Web technology, and electronic mobile devices. This manuscript provides the cutting-edge techniques, approaches and the latest ongoing researches in the context of visual information communication. It is a collection of 24 chapters selected from more than 60 submissions to the VINCI'09 - 2009 Visual Information Communications International Conference, that is held in Sydney Australia, September 2009. These chapters were selected through a stringent review process to ensure their high standard in quality, significance and relevance. Each chapter was reviewed by at least two international Program Committee members of VINCI'09. The book covers a broad range of contents in five key sub-areas of visual information communication, including.

The Indigenous World 2017 Kathe Jepsen, Kathrine Broch Hansen, 2017-05-30 In over sixty articles and country reports, *The Indigenous World 2017* gives a comprehensive update on the current situation of indigenous peoples and their human rights and reports on the most important developments in international processes of relevance to indigenous peoples during 2016. The yearbook is an essential source of information and an indispensable tool for those who need to be informed about the most recent issues and developments that have impacted indigenous peoples worldwide. *The Indigenous World* is produced by the International Work Group for Indigenous Affairs (IWGIA) in collaboration with indigenous and non-indigenous scholars and activists.

Journalistic Authority Matt Carlson, 2017-05-23 When we encounter a news story, why do we accept its version of events? Why do we even recognize it as news? A complicated set of cultural, structural, and technological relationships inform this interaction, and *Journalistic Authority* provides a relational theory for explaining how journalists attain authority. The book argues that authority is not a thing to be possessed or lost, but a relationship arising in the connections between those laying claim to being an authority and those who assent to it. Matt Carlson examines the practices journalists use to legitimate their work: professional orientation, development of specific news forms, and the personal narratives they circulate to support a privileged social place. He then considers journalists' relationships with the audiences, sources, technologies, and critics that shape journalistic authority in the contemporary media environment. Carlson argues that journalistic authority is always the product of complex and variable relationships. *Journalistic Authority* weaves together journalists' relationships with their audiences, sources, technologies, and critics to present a new model for understanding journalism while advocating for practices we need in an age of fake news and shifting norms.

One Billion Hungry Gordon Conway, 2012-10-15 Hunger is a daily reality for a billion people. More than six decades after the technological discoveries that led to the Green Revolution aimed at ending world hunger, regular food shortages, malnutrition, and poverty still plague vast swaths of the world. And with increasing food prices, climate change, resource inequality, and an ever-increasing global population, the future holds further challenges. In *One Billion Hungry*, Sir Gordon Conway, one of the world's foremost experts on global food needs, explains the many interrelated issues critical to our global food supply

from the science of agricultural advances to the politics of food security. He expands the discussion begun in his influential *The Doubly Green Revolution: Food for All in the Twenty-First Century*, emphasizing the essential combination of increased food production, environmental stability, and poverty reduction necessary to end endemic hunger on our planet. Conway addresses a series of urgent questions about global hunger: • How we will feed a growing global population in the face of a wide range of adverse factors, including climate change? • What contributions can the social and natural sciences make in finding solutions? • And how can we engage both government and the private sector to apply these solutions and achieve significant impact in the lives of the poor? Conway succeeds in sharing his informed optimism about our collective ability to address these fundamental challenges if we use technology paired with sustainable practices and strategic planning. Beginning with a definition of hunger and how it is calculated, and moving through issues topically both detailed and comprehensive, each chapter focuses on specific challenges and solutions, ranging in scope from the farmer's daily life to the global movement of food, money, and ideas. Drawing on the latest scientific research and the results of projects around the world, Conway addresses the concepts and realities of our global food needs: the legacy of the Green Revolution; the impact of market forces on food availability; the promise and perils of genetically modified foods; agricultural innovation in regard to crops, livestock, pest control, soil, and water; and the need to both adapt to and slow the rate of climate change. *One Billion Hungry* will be welcomed by all readers seeking a multifaceted understanding of our global food supply, food security, international agricultural development, and sustainability.

Right-Wing Populism in Europe Ruth Wodak, Brigitte Mral, Majid KhosraviNik, 2013-05-23 This volume offers a comparative survey of Far Right parties across Europe, examining in particular their changing political rhetoric. The contributors look at the development of two distinct forms of party development and discourse: The Haiderization and The Berlusconi model.

Trends and Issues in Global Tourism 2012 Roland Conrady, Martin Buck, 2012-01-28 This book offers insights into important trends and future scenarios in the global tourism and travel industry. Besides the general topics (aviation and hospitality industry, destination management, marketing, and distribution management) it analyses current challenges and impacts resulting especially from developments in social media, corporate social responsibility and eco-mobility. Sustainability in the global tourism sector and particularly eco-mobility is one of the top themes to-be and therefore a focus of this book. Among the contributors to the book are well-known notabilities from institutions such as the UNWTO and top executives of various segments of the tourism and travel industry. The articles are based on presentations and panel discussions presented at the world's largest tourism convention, the ITB Berlin Convention.

The Mommy Myth Susan Douglas, Meredith Michaels, 2005-02-08 Now in paperback, the provocative book that has ignited fiery debate and created a dialogue among women about the state of motherhood today. In *THE MOMMY MYTH*, Susan Douglas and Meredith Michaels turn their 'sharp, funny, and fed-up prose' (San Diego Union Tribune) toward the cult of the new momism, a trend in Western culture that suggests that women can only achieve contentment through the perfection of mothering. Even so, the standards of this ideal remain out of reach, no matter how hard women try to 'have it all'. *THE MOMMY MYTH* skilfully maps the distance travelled from the days when *THE FEMININE MYSTIQUE* demanded more for women than keeping house and raising children, to today's not-so-subtle pressure to reverse this trend. A must-read for every woman.

The SAGE Handbook of Political Communication Holli A Semetko, Margaret Scammell, 2012-04-03 This authoritative and comprehensive survey of political

communication draws together a team of the world's leading scholars to provide a state-of-the-art review that sets the agenda for future study. It is divided into five sections: Part One: explores the macro-level influences on political communication such as the media industry, new media, technology, and political systems Part Two: takes a grassroots perspective of the influences of social networks - real and online - on political communication Part Three: discusses methodological advances in political communication research Part Four: focuses on power and how it is conceptualized in political communication Part Five: provides an international, regional, and comparative understanding of political communication in its various contexts The SAGE Handbook of Political Communication is an essential benchmark publication for advanced students, researchers and practitioners in the fields of politics, media and communication, sociology and research methods.
