Mensch und Computer 2015 – Tagungsband Martin Pielot,Sarah Diefenbach,Niels Henze,2015-09-14 These conference proceedings include the specialized academic lecture and brief contributions presented at the Humans and Computers 2015 conference in Stuttgart. It provides multiple perspectives from research that collectively provide a kaleidoscope of ideas, theories, and methodologies. The conference bridges the gap between theory and practical implementation with numerous application-oriented essays.

Virtual and Networked Organizations, Emergent Technologies and Tools Goran D. Putnik,Maria Manuela Cruz-Cunha,2012-07-25 This book constitutes the thoroughly refereed post-conference proceedings of the First International Conference on Virtual and Networked Organizations, Emergent Technologies, and Tools, ViNOrg 2011, held in Ofir, Portugal, in July 2011. The 35 revised full papers presented were carefully reviewed and selected from over 60 initial submissions. The papers cover a wide range of topics, such as ubiquitous computing and organizations, cloud computing and architectures, grid computing, human-computer interfaces, serious games, data mining, Web services, cognitive systems, social networks and other emergent IT/IS approaches in various function domains, such as decision support systems, planning, design, control, negotiation, marketing, management and many other, in the context of virtual and networked enterprises and organizations.

The TOGAF® Standard, 10th Edition - Leader's Guide The Open Group,2022-04-24 This document is a TOGAF Series Guide: The TOGAF Leader's Guide to Establishing and Evolving an EA Capability. It has been developed and approved by The Open Group, and is part of the TOGAF Standard, 10th Edition. Written for the Enterprise Architecture Capability Leader, the person who is tasked to lead the effort to establish or evolve an Enterprise Architecture Capability, the Leader's Guide presents advice on establishing an Enterprise Architecture Capability that aligns to a set of requirements and expectations that are specific to each enterprise. It proposes an approach for the standing-up and enhancement of an enterprise's Enterprise Architecture Capability, based upon established best practices. This approach follows a configured path through the TOGAF Architecture Development Method (ADM). This document: • Introduces key topics of concern • Defines the terms related to the topic • Shows the terms that are related to an EA Capability • Discusses what the Leader needs to know • Describes what the Leader should do with this knowledge It covers the following topics: • An introduction to the topic, including an assessment of the state of EA, definitions, and key concepts used in the Guide • A narrative that is a companion to the TOGAF ADM, that leads the reader through a series of topics and related steps to assist in stepping back from the current operational context to seek a broader perspective • How to adopt an EA Capability, including the preparation and initiation activities required to establish or enhance the EA Capability • A mapping of how the TOGAF ADM can be used for architecting and establishing an EA Capability

Designing Innovations in Industrial Logistics Modelling A. Kusiak,M. Bielli,2021-05-30 Designing Innovations in Industrial Logistics Modelling describes practical methods for approaching the task of designing industrial logistics systems. It surveys the development of logistics models and their application in manufacturing to designing, planning, and implementing the movement of supplies, equipment, and products. This text/reference book discusses the combination of operation and production research to obtain solutions for designing and integrating advanced logistics systems. It provides the reader with a set of prescriptive and descriptive models and methods that have been developed exclusively for the purpose of designing, managing, and optimizing the architecture of such advanced systems. The design and application of new tools and methods is presented in such a way that emphasizes the competitiveness of manufacturing industries, and case studies are presented in a manner that demonstrates successful models and methods in advanced industrial logistics systems. In addition, Designing Innovations in Industrial Logistics Modelling explains the various formal tools and methodologies employed in evaluating new programs and covers program management and dynamic evaluation techniques.

College Pathways to the Science Education Standards Eleanor D. Siebert, William J. McIntosh, 2001 This book targets students who are going to be K-12 teachers and points out the responsibilities that both science and education faculty members face. These responsibilities not only include providing fundamental information and skills related to teaching, but also mentoring teachers to reflect their understanding. The National Science Education Standards specifically address grades K-12; however, these standards have a great significance for higher education in that they also address systematic issues of teacher preparation and professional development. This document discusses ways in which the Standards are meaningful to higher education. Chapters 1 and 3 focus on the teaching and assessment standards. Chapter 2 concerns professional development standards. Chapter 4 addresses content standards. Chapter 5 discusses science education program standards. Chapter 6 describes the science education system standards. (YDS)

4th Party Cyber Logistics for Air Cargo Sung-Chi Chu, Lawrence C. Leung, Yer Van Hui, Waiman Cheung, 2006-04-11 4th Party Cyber Logistics For Air Cargo is a technical discussion for researchers and practitioners to understand the issues, models, and future directions of air cargo logistics in the cyber era. This book introduces the many aspects of planning and control of air cargo logistics processes in an e-Business environment. The authors approach this subject matter from the perspective of the logistics service providers. There is tremendous potential of achieving industry-wide collaboration between agents of the air cargo industry via an e-Business community platform. At the same time, there are many intellectually challenging problems regarding the architecture, ownership, decision support environment, and knowledge management of such an e-Business platform. The authors provide an evolutionary view to conceptualize the developments of websites where e-Commerce activities and e-Business activities co-exist. Four Web eras are detailed, providing an impetus for the development of frameworks of an e-Business platform for air cargo logistics, or e-Platform. The conceptual framework captures the new elements in cyber logistics and what the framework can do for the industry.
