The Praetorian STARShip : the untold story of the Combat Talon ,2001 Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son

Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

Legacies Steven Lubar,Kathleen M. Kendrick,2014-06-03 The Smithsonian Institution has been America's museum since 1846. What do its vast collections -- from the ruby slippers to a piece of Plymouth Rock, first ladies' gowns to patchwork quilts, a Model T Ford to a customized Ford LTD low rider -- tell Americans about themselves? In this lavishly illustrated guide to the Smithsonian's National Museum of American History, Steven Lubar and Kathleen M. Kendrick tell the stories behind more than 250 of the museum's treasures, many of them never before photographed for publication. These stories not only reveal what America as a nation has decided to save and why but also speak to

changing visions of national identity. As the authors demonstrate, views of history change over time, methods of historical investigation evolve and improve, and America's understanding of the past matures. Shifts in focus and attitude lie at the hearth of Legacies, which is organized around four concepts of what a national museum of history can be: a treasure house, a shrine to the famous, a palace of progress, and a mirror of the nation. Thus, the museum collects cherished or precious objects, houses celebrity memorabilia, documents technological advances, and reflects visitors' own lives. Taking examples from science and technology, politics, decorative arts, military history, ethnic heritage, popular culture and everyday life, the authors provide historical context for the work of the Smithsonian and shed new light on what is important, and who is included, in American history. Throughout its history, Lubar and Kendrick conclude, the museum has played a vital role in both shaping and reflecting America's sense of itself as a nation.

Red Thunder John Varley,2020-09-22 “The heart-pounding space race is on . . . in this riveting SF thriller” from the Hugo and Nebula Award–winning author of *Red Lightning* and *Rolling Thunder* (Publishers Weekly, starred review). As Chinese and US spacecraft compete to be the first to land on Mars, a former astronaut, his cousin, and four teens from Florida decide to take matters into their own hands. If they can quickly build their own space-worthy ship using scrap metal, appliances, and power tools, they have a chance to come from behind—thanks to an inventive new power source that can propel them to the Red Planet within three days. No guts, no glory . . . “Varley’s great strength is in his characterizations, but in *Red Thunder* he also shows a strong sense of place. . . . If you are willing to simply fantasize about fleeing your office cubicle and becoming a heroic space explorer, this novel

will fulfill your wishes.” —The Washington Post “Fast paced . . . Engaging characters.” —Rocky Mountain News “Full of little gems of wit and intelligence.” —Booklist “[A] fun-filled adventure. Varley matches a serious literary style with an outrageous plot, and he’s one of the few writers in the field who could make it work.” —Chronicle

The Lost Starship Vaughn Heppner, 2014-08-30 Ten thousand years ago, a single alien super-ship survived a desperate battle. The vessel's dying crew set the AI on automatic to defend the smashed rubble of their planet. Legend has it the faithful ship continues to patrol the empty battlefield, obeying its last order throughout the lonely centuries. In the here and now, Earth needs a miracle. Out of the Beyond invade the New Men, stronger, faster and smarter than the old. Their superior warships and advanced technology destroy every fleet sent to stop them. Their spies have infiltrated the government and traitors plague Earth's military. Captain Maddox of Star Watch Intelligence wonders if the ancient legend could be true. Would such an old starship be able to face the technology of the New Men? On the run from killers, Maddox searches for a group of talented misfits. He seeks Keith Maker, a drunken

ex-strikefighter ace, Doctor Dana Rich the clone thief stuck on a prison planet and Lieutenant Valerie Noonan, the only person to have faced the New Men in battle and survived to tell about it. Maddox has to find a place hidden in the Beyond and bring back a ship no one can enter. If he fails, the New Men will replace the old. If he succeeds, humanity might just have a fighting chance...
