The Praetorian STARShip : the untold story of the Combat Talon ,2001 Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son

Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

Legacies Steven Lubar,Kathleen M. Kendrick,2014-06-03 The Smithsonian Institution has been America's museum since 1846. What do its vast collections -- from the ruby slippers to a piece of Plymouth Rock, first ladies' gowns to patchwork quilts, a Model T Ford to a customized Ford LTD low rider -- tell Americans about themselves? In this lavishly illustrated guide to the Smithsonian's National Museum of American History, Steven Lubar and Kathleen M. Kendrick tell the stories behind more than 250 of the museum's treasures, many of them never before photographed for publication. These stories not only reveal what America as a nation has decided to save and why but also speak to changing visions of national identity. As the authors demonstrate, views of history change over time, methods of historical investigation evolve and improve, and America's understanding of the past matures. Shifts in focus and attitude lie at the hearth of *Legacies*, which is organized around four

concepts of what a national museum of history can be: a treasure house, a shrine to the famous, a palace of progress, and a mirror of the nation. Thus, the museum collects cherished or precious objects, houses celebrity memorabilia, documents technological advances, and reflects visitors' own lives. Taking examples from science and technology, politics, decorative arts, military history, ethnic heritage, popular culture and everyday life, the authors provide historical context for the work of the Smithsonian and shed new light on what is important, and who is included, in American history. Throughout its history, Lubar and Kendrick conclude, the museum has played a vital role in both shaping and reflecting America's sense of itself as a nation.
