Startup Accelerators Richard Busulwa, Naomi Birdthistle, Steve Dunn, 2020-01-22 The must-read guidebook for entrepreneurs looking to get into accelerator programs and to build and scale their startups with speed. Accelerator programs have become one of the most powerful and valuable resources for entrepreneurs seeking to learn rapidly, build powerful networks, raise capital, build their startups and do this at speed and scale. In recent years, the number of accelerator programs around the world has grown at an incredible rate, propelling startups such as Airbnb, Uber, Dropbox, Reddit, and others — many to billion-dollar valuations. The number of accelerators, the differences in accelerator program offerings and the unique benefits and costs of different accelerator locations makes choosing the right accelerator a challenge. Selecting the wrong accelerator, failing to be accepted in the right one, or not fully taking advantage of all the accelerator has to offer can be costly, sometimes fatal. With the stakes so high, entrepreneurs need to understand all their options, choose carefully and do the right things to maximize their chances of success. *Startup Accelerators* is the go-to guide for any entrepreneur, providing a firsthand look into the acceptance criteria and inner workings of different accelerator programs. Written by entrepreneurs for entrepreneurs, this indispensable resource explains what different accelerator programs offer, how to get accepted, what to do during the program, how to raise money during accelerators, what to do after the program ends, and much more. Packed with real-world case studies and advice from leading experts on startup accelerator programs, this one-stop resource provides step-by-step guidance on the entire accelerator process. Reveals how accelerators help founders navigate different challenges in the startup journey. Describes the differences in the benefits and costs of different accelerator programs. Explains how to prepare accelerator applications. Discloses what actions to take during an accelerator to make the most of it. Depicts case studies of entrepreneurs' accelerator applications, experiences and outcomes across different accelerators. Features interviews with accelerator program managers, founders who went through accelerators, and investors in companies going through or having gone through accelerators. Includes insightful data and reflections from entrepreneurship education researchers and academics. *Startup Accelerators: A Field Guide* will prove to be invaluable for startup founders considering or going through accelerators, as well as aspiring entrepreneurs, educators, and other startup accelerator stakeholders.

Startup CEO Matt Blumberg, 2020-08-04 You're only a startup CEO once. Do it well with *Startup CEO*, a master class in building a business. —Dick Costolo, Former CEO, Twitter Being a startup CEO is a job like no other: it's difficult, risky, stressful, lonely, and often learned through trial and error. As a startup CEO seeing things for the first time, you're likely to make mistakes, fail, get things wrong, and feel like you don't have any control over outcomes. Author Matt Blumberg has been there, and in *Startup CEO* he shares his experience, mistakes, and lessons learned as he guided Return Path from a handful of employees and no revenues to over \$100 million in revenues and 500 employees. *Startup CEO* is not a memoir of Return Path's 20-year journey but a thoughtful CEO-focused book that provides first-time CEOs with advice, tools, and approaches for the situations that startup CEOs will face. You'll learn: How to tell your story to new hires, investors, and customers for greater alignment. How to create a values-based culture for speed and engagement. How to create business and personal operating systems so that you can balance your life and grow your company at the same time. How to develop, lead, and leverage your board of directors for greater impact. How to ensure that your company is bought, not sold, when you exit. *Startup CEO* is the field guide every CEO needs throughout the growth of their company.

Environmental, Health, and Business Opportunities in the New Meat Alternatives Market Bogueva, Diana, Marinova, Dora, Raphaely, Talia, Schmidinger, Kurt, 2018-12-28 There are various innovations and new technologies being produced in the energy, transportation, and building industries to combat climate change and improve environmental performance, but another way to combat this is examining the world's food resources. Currently, there are global challenges associated with livestock and meat consumption, giving way to resource scarcity and the inability to sustain animal agriculture. *Environmental, Health, and Business Opportunities in the New Meat Alternatives Market* is a pivotal reference source that provides vital research on the development of plant-based foods and nutritional outcomes. Through analyzing innovative and disruptive trends in the food industry, it presents opportunities utilizing meat alternatives to create a more engaged consumer, a stronger economy, and a better environment. Highlighting topics such as meat consumption, nutrition, health, and gender perspectives, this book is ideally designed for policymakers, economists, health professionals, nutritionists, technology developers, academicians, and graduate-level students.

Fashion & Luxury Marketing Michael R. Solomon, Mona Mrad, 2022-04-14 Written by marketing experts, this authoritative and comprehensive full-colour textbook made up of both accessible research and theory, real-world examples and case studies including Prada, Gucci and Burberry, provides students with an overview of the global fashion industry and fashion marketing, strategy, branding, communications, retailing and distribution, as well as the psychological factors involved in consuming fashion and luxury. The role of social media, celebrities and influencers such as Kim Kardashian and Lil Miquela are discussed, as is the ever-increasing role of ethical

fashion and sustainability. The authors also offer an expanded view of fashion and luxury by moving beyond just clothing and apparel to include other fashionable and luxurious products and services, including technology. Packed with attractive visuals from fashion and culture, and accompanied by chapter summaries, questions and exercises, this textbook is essential reading for students studying fashion, luxury, marketing, management, retailing, branding and communications. Also provided for educators are supporting PowerPoint slides and an instructor's manual to support use of the textbook with students. Suitable for Fashion Marketing/Fashion Consumer Behaviour modules as well as a general text for Fashion Marketing programmes. The text will also appeal to Luxury programmes (MBA etc) and Retail Marketing modules (UG).

Power Management for Wearable Electronic Devices Dima Kilani, Baker Mohammad, Mohammad Alhawari, Hani Saleh, Mohammed Ismail, 2020-01-17 This book describes power management integrated circuits (PMIC), for power converters and voltage regulators necessary for energy efficient and small form factor systems. The authors discuss state-of-the-art PMICs not only for battery powered wearable devices, but also energy harvesting-based devices. The circuits presented support voltage scaling to reduce the overall average power consumption of a wearable device, resulting in longer device operating time. The discussion includes many designs, control techniques and approaches to distribute efficiently the power among different blocks in the device. • Demonstrates for readers how to innovate in designing power management integrated circuits (PMIC) suitable for wearable devices, powered by either battery or harvesting energy; • Introduces a dual outputs switched capacitor, using a single voltage regulator to minimize the area overhead and discusses the effect of having more than two outputs on the area and power efficiency; • Introduces a novel clock-less digital LDO regulator that eliminates the use of the clocked comparator and serial shift register in the conventional design; • Presents experimental results of energy harvesting-based power management units (PMU), using different combinations of power converters and voltage regulators, providing a guide for designers to select the appropriate option based on device requirements.

Flexible Energy Conversion and Storage Devices Chunyi Zhi, Liming Dai, 2018-06-28 Provides in-depth knowledge of flexible energy conversion and storage devices-covering aspects from materials to technologies Written by leading experts on various critical issues in this emerging field, this book reviews the recent progresses on flexible energy conversion and storage devices, such as batteries, supercapacitors, solar cells, and fuel cells. It introduces not only the basic principles and strategies to make a device flexible, but also the applicable materials and technologies, such as polymers, carbon materials, nanotechnologies and textile technologies. It also discusses the perspectives for different devices. Flexible Energy Conversion and Storage Devices contains chapters, which are all written by top researchers who have been actively working in the field to deliver recent advances in areas from materials syntheses, through fundamental principles, to device applications. It covers flexible all-solid state supercapacitors; fiber/yarn based flexible supercapacitors; flexible lithium and sodium ion batteries; flexible diversified and zinc ion batteries; flexible Mg, alkaline, silver-zinc, and lithium sulfur batteries; flexible fuel cells; flexible nanodielectric materials with high permittivity for power energy storage; flexible dye sensitized solar cells; flexible perovskite solar cells; flexible organic solar cells; flexible quantum dot-sensitized solar cells; flexible triboelectric nanogenerators; flexible thermoelectric devices; and flexible electrodes for water-splitting. -Covers the timely and innovative field of flexible devices which are regarded as the next generation of electronic devices -Provides a highly application-oriented approach that covers various flexible devices used for energy conversion and storage -Fosters an understanding of the scientific basis of flexible energy devices, and extends this knowledge to the development, construction, and application of functional energy systems -Stimulates and advances the research and development of this intriguing field Flexible Energy Conversion and Storage Devices is an excellent book for scientists, electrochemists, solid state chemists, solid state physicists, polymer chemists, and

electronics engineers.

Business Booster Today Magazine Sue Baumgaertner-Bartsch, Christian Bartsch, 2018-07-22 This monthly journal discusses different success stories that showcase how entrepreneurs and startups have gone from 0 to 100 in no big time. The July 2018 N.23 is an edition focused on the Asian region. The Cover Feature: Vikas Malkani is a wisdom, wealth & business coach. Prof. N. Rajalingam, Prof. S. Madhavan, Prof. P. Ravi, Dr. T. Helan, Dr. G. Magesh Kuttalam, Dr. M. Bhoopal, Dr. K. N. Marimuthu, The buzz word USD 5 Trillion size of Indian economy in the next five years is more than the current size of the economy of Japan & Germany. It is both ambitious and inspiring. Achieving this dream, as a country, particularly in the Post COVID 19 Pandemic season demands a high degree of creativity in addition to the hard and smart works. It requires accelerating the current pace of innovation and development in addition to the up-gradation of the systems and infrastructure so as to provide a better eco-system than now. The intent to achieve this mission definitely requires quite a good number of passionate entrepreneurs venturing their startups in plethora of fields and industries thereby requires the widening of the startup highway. To make this happen, it requires changes, right from policy level to that of grass root. It also requires to lift the spirit of young and old citizens living both in rural and urban areas of the country. This virtual conference, in its endeavour, is attempting to provide space for the think tanks from the industry and the academia to share their creative insights. This would turn the challenges thrown by this global epidemic and inspire the participants to prompt and be instrumental in taking the mission of initiating start-up for achieving the USD 5 Trillion economy of India in the Post COVID 19 world.

A Practical Guide for Startup Valuation Sinem Derindere Köseoğlu, 2023-09-25 This book sheds new light on the most important contemporary and emerging startup valuation topics. Drawing on the first-hand professional experience of practitioners, professionals, and startup experts from various fields of finance, combined with a sound academic foundation, it offers a practical guide to startup valuation and presents applications, practical examples, and case studies of real startup ecosystems. The book discusses pressing questions, such as: Why are startups in California higher valued than those in New York? Or why do startups based in London receive higher valuations than those in Paris, Berlin, or Milan, even when they are based in similarly-sized economies, share the same industries, and often even have the same investors? Answering these questions, the authors present key topics, such as hierarchical and segmented approaches to startup valuation, business plans, and sensitivity analysis, many methods such as venture capital valuation, first Chicago valuation, scorecard valuation, Dave Berkus valuation, risk factor summation valuation, and discounted cash flow valuation, in addition to business valuation by data envelopment analysis and real options analysis, as well as critical conceptual issues in the valuation such as expected returns of the venture capital and price versus value concepts, among others. The book will help angel investors, venture capitalists, institutional investors, crowd-based fractional investors, and investment fund professionals understand how to use basic and advanced analytics for a more precise valuation that helps them craft their long-term capital-raising strategy and keep their funding requests in perspective. It will also appeal to students and scholars of finance and business interested in a better understanding of startup valuation.

The Rise and Impact of Fintech in Latin America Mr. Bas B. Bakker, Weicheng Lian, Yang Liu, Mariusz A. Sumlinski, Yuanchen Yang, Dmitry Vasilyev, 2023-03-29 In the past decade, fintech has shaken up the financial sector in Latin America providing innovations in lending, payments, insurance, and regulation and compliance. This paper examines this development by focusing on both fintech services and regulation. Exploring fintech's macro-critical impact using country- and bank-level data, we find that booming financial technologies in Latin America have helped boost competition in the banking sector and inclusion. Additionally, we demonstrate that fintech firms in Latin America experienced robust growth even during the pandemic supported by external funding. Finally, we discuss how regulators are addressing the risks associated with financial technologies and how they are leveraging fintech tools in their supervisory activities.

Startup Asia Rebecca A. Fannin, 2011-09-26 Find out where the new innovation hot spots are, what the next consumer waves will be, and where to catch them Asia's innovation hot spots are fast emerging as first-choice destinations for bright, young entrepreneurs. From Taiwan to Singapore, technology center hubs are forming to rival the original Silicon Valley. Startup Asia gives you a close-up view into the key growth trends shaping entrepreneurship in China and India, plus the new frontier market of Vietnam. Showing how entrepreneurs and investors can start up in Asia and go global, the book provides a first-hand, on-the-ground tour of the new technology centers that are gaining momentum all over Asia. Interviews with the most successful venture capitalists and entrepreneurs reveal their winning strategies and show how a new generation of entrepreneurs in China and India are no longer looking to the West for their cues—but are instead crafting their own local business models and success strategies. Shows entrepreneurs and investors how they can pursue their dreams of launching successful start-ups in Asia Reveals that many of the same venture investors that first funded young businesses in Silicon Valley moved into China, then India, and are now finding their way to Vietnam Addresses the risks of doing business in Asia's developing markets, including lack of intellectual property protection, political and regulatory shifts, bribery, and corruption From high-profile Forbes contributor Rebecca Fannin, Startup Asia is the essential guide for anyone looking to trek into this new frontier.

Boost Your STEAM Program with Great Literature and Activities Liz Knowles, Martha Smith, 2018-06-01 You've created a STEAM program in your library, but how do you work literacy into the curriculum? With this collection of resource recommendations, direction for program development, and activities, you'll have students reading proficiently in no time. Many schools and libraries are implementing STEAM programs in the school library makerspace to promote problem solving by allowing students to create their own solutions to a problem through trial and error. In order to enhance literacy development in the STEAM program, however, they need resources for integrating literature into the curriculum. In this collection of resources for doing just that, veteran education professionals and practiced coauthors Liz Knowles and Martha Smith bring readers over eight hundred recommended and annotated books and web resources, selected based on research on successfully integrating STEAM and literacy programs and organized by the five STEAM areas. Titles are complemented by discussion questions and problem-solving activities that will aid educators in both adding and using the best literature to their STEAM programs for encouraging learning. In addition to promoting literacy, these resources will help to develop creativity, lateral thinking skills, and confidence in students.

Ultra-Low-Power and Ultra-Low-Cost Short-Range Wireless Receivers in Nanoscale CMOS Zhicheng Lin, Pui-In Mak (Elvis), Rui Paulo Martins, 2015-07-25 This book provides readers with a state-of-the-art description of techniques to be used for ultra-low-power (ULP) and ultra-low-cost (ULC), short-range wireless receivers. Readers will learn what is required to deploy these receivers in short-range wireless sensor networks, which are proliferating widely to serve the internet of things (IoT) for "smart cities." The authors address key challenges involved with the technology and the typical tradeoffs between ULP and ULC. Three design examples with advanced circuit techniques are described in order to address these trade-offs, which special focus on cost minimization. These three techniques enable respectively, cascading of radio frequency (RF) and baseband (BB) circuits under an ultra-low-voltage (ULV) supply, cascading of RF and BB circuits in current domain for current reuse and a novel function-reuse receiver architecture, suitable for ULV and multi-band ULP applications such as the sub-GHz ZigBee.
