Open-Source Robotics and Process Control Cookbook Lewin Edwards,2011-08-30 In this practical reference, popular author Lewin Edwards shows how to develop robust, dependable real-time systems for robotics and other control applications, using open-source tools. It demonstrates efficient and low-cost embedded hardware and software design techniques, based on Linux as the development platform and operating system and the Atmel AVR as the primary microcontroller. The book provides comprehensive examples of sensor, actuator and control applications and circuits, along with source code for a number of projects. It walks the reader through the process of setting up the Linux-based controller, from creating a custom kernel to customizing the BIOS, to implementing graphical control interfaces. Including detailed design information on: · ESBUS PC-host interface · Host-module communications protocol · A speed-controlled DC motor with tach feedback and thermal cut-off · A stepper motor controller · A two-axis attitude sensor using a MEMS accelerometer · Infrared remote control in Linux using LIRC · Machine vision using Video4Linux The first-ever book on using open source technology for robotics design! Covers hot topics such as GPS navigation, 3-D sensing, and machine vision, all using a Linux platform!

Birth of a Nation Gerard Loughran,2010-02-12 Launched in Nairobi in 1960, three years before the birth of independent Kenya, the Nation group of

newspapers grew up sharing the struggles of an infant nation, suffering the pain of its failures and rejoicing in its successes. Marking its 50th anniversary in 2010, the Nation looks back on its performance as the standard-bearer for journalistic integrity and how far it fell short or supported the loyalty demanded by its founding slogan 'The Truth shall make you free'. The Aga Khan was still a student at Harvard University when he decided that an honest and independent newspaper would be a crucial contribution to East Africa's peaceful transition to democracy. The Sunday Nation and Daily Nation were launched in 1960 when independence for Kenya was not far over the horizon. They quickly established a reputation for honesty and fair-mindedness, while shocking the colonial and settler establishment by calling for the release of the man who could become the nation's first prime minister, Jomo Kenyatta, and early negotiations for 'Uhuru'. The history of the 'Nation' papers and that of Kenya are closely intertwined; in the heat of its printing presses and philosophical struggles, that story is told here: from committed beginnings to its position today as East Africa's leading newspaper group.

Receptor Tyrosine Kinases: Family and Subfamilies Deric L. Wheeler, Yosef Yarden, 2015-07-31 This book devotes a chapter to each RTK family and the multiple receptors within each family, thoroughly covering all of the RTKs. The chapters all follow the same structure, presenting this essential information in an accessible and user-friendly format. Each chapter covers one specific family of receptors and begins with a general introduction to that family and a comprehensive discussion of that receptor's family in development and human disease. Following are in-depth analyses of each family's receptors with discussions on the gene, protein, ligands, activation, and signaling pathways along with discussion of receptor processing and signal attenuation. Further, cross talk with other receptors systems, post-translational modification and specific unique characteristics to each RTK are discussed. Because it isolates and explains each family, this book is an essential companion volume to *Receptor Tyrosine Kinases: Structure, Functions and Role in Human Disease*, by the same authors, which talks about RTKs more generally and without the family-by-family detail.

Global Migrants, Local Culture Laura Tabili, 2011-04-05 Employing the first analysis of the entire population of any British town, this book examines how overseas migrants affected society and culture in South Shields near Newcastle-upon-Tyne. Resituating Britain within global processes of migration and cultural change, it recasts British society pre-1940 as culturally and racially dynamic and diverse.

Recognition, Evaluation, and Control of Indoor Mold Bradley Prezant, Donald M. Weekes, J. David Miller, 2008

Crop Improvement Siti Nor Akmar Abdullah, Ho Chai-Ling, Carol Wagstaff, 2017-10-17 The book covers the latest development in the biosciences field covering key topics in crop improvement including 'omic approaches to improving sustainable crop production, advancement in marker technology, strategies in genetic manipulation, crop quality and sustainability and plant microbe interaction detailing on proven technologies to

address critical issue for agricultural sustainability which are beneficial for researchers and students. The book also includes aspects of preserving crops after harvest as this is a key factor in promoting sustainable crop quality in terms of addressing waste, choosing the appropriate packaging and moving crops through the food and industrial supply chain. An important strategy to overcome the challenges in providing food for the world population in a sustainable manner is through concerted efforts by crop scientists to embrace new technologies in increasing yield, quality and improving food safety while minimizing adverse environmental impact of the agricultural activities. Most of the proven molecular and genetic technologies in crop science have been tested and verified in model plants such as Arabidopsis and tomato. The technologies, when deployed on various plant species of importance for human nutrition and industrial applications, including cereals, vegetables, fruits, herbs, fibre and oil crops, face many challenges, not only due to their longer life cycle but many other physiological and environmental factors affecting yield and quality of plant products. Furthermore, major impacts on crop production due to catastrophic diseases and global climate change needs urgent and innovative solutions. Therefore a systematic approach, employing various leading-edge technologies that enable the functional elucidation of key pathway genes via 'omics tools, genome wide association with desired phenotypes and development of cost effective and practicable molecular tools for selection, is vital. The International Conference on Crop Improvement was held to address these and other pressing issues. This volume summarizes the keynote presentations from the meeting and highlights additional discussions that are critical to crop improvement in a challenging time.

Normal Graeme Cameron, 2016-03-29 The truth is I hurt people. It's what I do. It's all I do. It's all I've ever done. He lives in your community, he shops in your grocery store, he drives beside you on the highway. What you don't know is that he has an elaborate cage built into a secret basement under his garage, and the food he's shopping for is to feed a young woman he's holding there against her will in a string of many, unaware of the fate that awaits her. This is how it's been for a long time. It's normal and it works. Perfectly. Then he meets the checkout girl from the 24-hour grocery, and she changes everything. One small problem he still has someone trapped in his garage. Discovering his humanity couldn't have come at a worse time.

The Code of Trust Robin Dreeke, Cameron Stauth, 2017-08-08 A counterintelligence expert shows readers how to use trust to achieve anything in business and in life. Robin Dreeke is a 28-year veteran of federal service, including the United States Naval Academy, United States Marine Corps. He served most recently as a senior agent in the FBI, with 20 years of experience. He was, until recently, the head of the Counterintelligence Behavioral Analysis Program, where his primary mission was to thwart the efforts of foreign spies, and to recruit American spies. His core approach in this mission was to inspire reasonable, well-founded trust among people who could provide valuable information. The Code of Trust is based on the system Dreeke devised, tested, and implemented during years of field work at the highest levels of national security. Applying his system first to himself, he rose up through federal law enforcement, and then taught his system to law enforcement and military officials throughout the country, and later to private sector clients. The Code of Trust has since elevated executives to leadership, and changed the culture of entire companies, making them happier and more productive, as morale soared. Inspiring trust is not a trick, nor is it an arcane art. It's an important, character-building endeavor that requires only a sincere desire to be helpful and sensitive, and the ambition to be more successful at work and at home. The Code of Trust is based on 5 simple principles: 1) Suspend Your Ego 2) Be Nonjudgmental 3) Honor Reason 4) Validate Others 5) Be Generous To be successful with this system, a reader needs only the willingness to spend eight to ten hours learning a method of trust-building that took Robin Dreeke almost a lifetime to create.

Building in Big Brother Lance J. Hoffman, 2012-12-06 The announcement of the Clipper chip by the U.S. Government in April 1993 set off a frenzy of discussions about cryptography policy in the technological community. The shock waves from it ultimately included front page treatment in The New York Times, repeated questions to the Vice President, creation of several new newsgroups on the Internet, and some very productive public discussions

about striking the balance between national security, law enforcement, and civil liberties. We still don't have good answers for some of the questions that have been raised. As the Global Information Infrastructure is being built, we are writing portions of the Constitution for Cyberspace. I've been fortunate to have a front row seat and to share much of this with my students. The original reading and selection of materials was made by the first cohort of students* in The George Washington University Accelerated Master of Science Program in Telecommunications and Computers at the Ashburn, Virginia campus. They worked many long hours-reading, debating, and selecting materials for this book. In addition, Bob Patton spent a great deal of time scanning and editing the material. Nestor Torres prepared the index. And Harish Nalinakshan provided an enormous amount of technical and administrative assistance and kept the project on track as new developments took place in the debate and new papers and legislation reflected these. As with most readings books, some of the selections cover similar material. We have tried to hold this duplication to an acceptable level.

New Technologies, Development and Application II Isak Karabegović, 2019-04-23 This book features papers focusing on the implementation of new and future technologies, which were presented at the International Conference on New Technologies, Development and Application, held at the Academy of Science and Arts of Bosnia and Herzegovina in Sarajevo on 27th-29th June 2019. It covers a wide range of future technologies and technical disciplines, including complex systems such as Industry 4.0; robotics; mechatronics systems; automation; manufacturing; cyber-physical and autonomous systems; sensors; networks; control, energy, automotive and biological systems; vehicular networking and connected vehicles; effectiveness and logistics systems, smart grids, as well as nonlinear, power, social and economic systems. We are currently experiencing the Fourth Industrial Revolution "Industry 4.0", and its implementation will improve many aspects of human life in all segments, and lead to changes in business paradigms and production models. Further, new business methods are emerging, transforming production systems, transport, delivery, and consumption, which need to be monitored and implemented by every company involved in the global market.

Embedded Linux Primer Christopher Hallinan, 2010-10-26 Up-to-the-Minute, Complete Guidance for Developing Embedded Solutions with Linux Linux has emerged as today's #1 operating system for embedded products. Christopher Hallinan's Embedded Linux Primer has proven itself as the definitive real-world guide to building efficient, high-value, embedded systems with Linux. Now, Hallinan has thoroughly updated this highly praised book for the newest Linux kernels, capabilities, tools, and hardware support, including advanced multicore processors. Drawing on more than a decade of embedded Linux experience, Hallinan helps you rapidly climb the learning curve, whether you're moving from legacy environments or you're new to embedded programming. Hallinan addresses today's most important development challenges and demonstrates how to solve the problems you're most likely to encounter. You'll learn how to build a modern, efficient embedded Linux development environment, and then utilize it as productively as possible. Hallinan offers up-to-date guidance on everything from kernel configuration and initialization to bootloaders, device drivers to file systems, and BusyBox utilities to real-time configuration and system analysis. This edition adds entirely new chapters on UDEV, USB, and open source build systems. Tour the typical embedded system and development environment and understand its concepts and components. Understand the Linux kernel and userspace initialization processes. Preview bootloaders, with specific emphasis on U-Boot. Configure the Memory Technology Devices (MTD) subsystem to interface with flash (and other) memory devices. Make the most of BusyBox and latest open source development tools. Learn from expanded and updated coverage of kernel debugging. Build and analyze real-time systems with Linux. Learn to configure device files and driver loading with UDEV. Walk through detailed coverage of the USB subsystem. Introduces the latest open source embedded Linux build systems. Reference appendices include U-Boot and BusyBox commands.

Performances of Capitalism, Crises and Resistance Marilena Zaroulia, Philip Hager, 2015-07-27 Discussing crises through diverse examples, including the UK's National Theatre, public art installations, Occupy LSX, repatriation ceremonies and performances of the everyday, this book asks how

performance captures and resists what is considered (politically, ideologically, culturally or socially) 'inside' or 'outside' Europe.
