Into the Breach J. A. Karam, 2010-04-01 Into the Breach is the true story of paramedics, emergency medical technicians, and heavy-rescue specialists fighting to control trauma and medical emergencies in one of America's toughest and most violent cities: Newark, New Jersey. A riveting account that hauls readers on a first-hand tour of street medicine today, Into the Breach shows what really happens inside an ambulance and some of the diverse and bizarre places EMS workers tread. Through authentic accounts, every facet of emergency care is on display—from the first 911 call to patient discharge or death, including an exclusive look at what is perhaps the biggest decontamination operation ever conducted, which crews performed for victims of the September 11, 2001 terrorist attack. A hybrid profession that blends public safety and public health, EMS attracts careerists and volunteers from all sectors of society—from Boy Scouts and housewives to Fortune 500 vice presidents and work-fare recipients. The men and women that make up the Newark EMS graveyard shift, one of the busiest, full-time teams in the nation, are quintessential EMS workers: intense, irreverent, hard-working action junkies who crave autonomy and the instant gratification of solving critical problems in real time. This unflinching profile hones in on award-winning EMS workers as well as those who pollute the industry, ironically, sometimes one and the same. Into the Breach offers an unusual opportunity to bear witness to unimaginable suffering, heroic stoicism, and the inventiveness of American EMS workers fighting to save lives.

Warbreaker Brandon Sanderson, 2009-06-09 From #1 New York Times bestselling author Brandon Sanderson, Warbreaker is the story of two sisters, who happen to be princesses, the God King one of them has to marry, the lesser god who

doesn't like his job, and the immortal who's still trying to undo the mistakes he made hundreds of years ago. Their world is one in which those who die in glory return as gods to live confined to a pantheon in Hallandren's capital city and where a power known as BioChromatic magic is based on an essence known as breath that can only be collected one unit at a time from individual people. By using breath and drawing upon the color in everyday objects, all manner of miracles and mischief can be accomplished. It will take considerable quantities of each to resolve all the challenges facing Vivenna and Siri, princesses of Idris; Susebron the God King; Lightsong, reluctant god of bravery, and mysterious Vasher, the Warbreaker. Kill Anything That Moves Nick Turse, 2013-01-15 Based on classified documents and first-person interviews, a controversial history of the Vietnam War argues that American acts of violence against millions of Vietnamese civilians were a pervasive and systematic part of the war and that soldiers were deliberately trained and ordered to conduct hate-based slaughter campaigns.

Toward an Anthropological Theory of Value D. Graeber, 2001-12-13 Now a widely cited classic, this innovative book is the first comprehensive synthesis of economic, political, and cultural theories of value. David Graeber reexamines a century of anthropological thought about value and exchange, in large measure to find a way out of ongoing quandaries in current social theory, which have become critical at the present moment of ideological collapse in the face of Neoliberalism. Rooted in an engaged, dynamic realism, Graeber argues that projects of cultural comparison are in a sense necessarily revolutionary projects: He attempts to synthesize the best insights of Karl Marx and Marcel Mauss, arguing that these figures represent two extreme, but ultimately complementary, possibilities in the shape such a project might take. Graeber breathes new life into the classic anthropological texts on exchange, value, and economy. He rethinks the cases of Iroquois wampum, Pacific kula exchanges, and the Kwakiutl potlatch within the flow of world historical processes, and recasts value as a model of human meaning-making, which far exceeds rationalist/reductive economist paradigms.

In particular he looks at the influence of the ideologies, strategies and tactics of terrorist groups, and describes how these are restricted by the terrorists' resources, by protective and anti-terrorist measures, by the society within which the terrorists operate, and by the nature of the terrorists and their supporters. He concludes that terrorists' target selection is often both explicable and logical.

A Distant Light Henry W. Kendall, 2000 A collection of essays by a Nobel Prize Laureate on a wide range of problems facing the world, and the role of scientists in solving them. Kendall was one of a group of physicists who founded the Union of Concerned Scientists (UCS) and is currently chairman of its board of directors. UCS is today a voice of authority in US government science policy, particularly with regard to environment issues. Together, these essays represent both the successes and failures of science to impact public policy, and offer practical guidelines for involvement in science policy. They are roughly chronological, organised by subject with introductions, beginning with the controversies on nuclear power safety and Three Mile Island, then followed by sections on national security issues, global environmental and resource problems, and radioactive cleanup. Kendall's Nobel Prize lecture is also included (and is the only really technical material in the book), while the photos are from a 1992 exhibition of his work.
