☐ **New Trading Dimensions** Bill M. Williams, 1998-10-06 H☐ ndler und erfahrene Privatanleger kommen immer mehr zu dem Schlu☐ , da☐ die traditionellen Prognosemethoden der fundamentalen oder technischen Analyse offenbar zu widerspr☐ chlichen Ergebnissen kommen. Bei den fundamentalen Analysten geht der Markt eher schwach, bei den technischen Analysten geht er fester. Die Folge von solch gegens☐ tzlichen Signalen ist, da☐ viele H☐ ndler und Anleger sich auf eine Kombination von wissenschaftlicher Theorie und Anlagepsychologie st☐ tzen. Bill Williams zeigt hier neue Perspektiven der Marktbeobachtung auf. Er kombiniert Elemente traditioneller technischer Chartmethoden mit Chaostheorie und Psychologie. Das Ergebnis ist ein komplexes, f☐ nfdimensionales Handelsprogramm mit ausf☐ hrlichen Erl☐ uterungen und Beispielen zu Bereichen wie Fraktalanalyse, Oszillatoren und psychologischen Aspekten. ☐ **Dynamic Trading Indicators** Mark Helweg, David Stendahl, 2002-10-15 Using the insights that stem from value charts and price action profiles, Dynamic Trading Indicators shows traders how to develop systems and whole trading programs that implement these exciting new tools. Through an in-depth exploration of how to effectively use these new technical indicators in a complete trading system, Dynamic Trading Indicators provides a framework that allows readers to obtain a view of what a stock will most likely do next. This innovation in chart design opens up new vistas for traders and unlocks the door to unlimited profits. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered—some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future. Mark W. Helweg has worked and traded on the floor of the Chicago Board of Trade and, earlier in his career, partnered with an international CTA with over \$40 million under management to research new trading system technology. David C. Stendahl is cofounder of RINA Systems, a software provider for systematic traders. Stendahl is the author of Profit Strategies: Unlocking Trading Performance with Money Management.

☐ **Beyond Technical Analysis** Tushar S. Chande, 1996-12-27 A bulletproof trading system is essential for trading success. You also need an effective system for trading to implement that trading system consistently. Otherwise, your trading experience will be stressful at best and insanely inconsistent at worst. Though you can always get a canned black-box trading system, few traders ever stick with them for long: experts agree that the ideal system for each trader is unique to his or her trading style—proprietary systems created by the individual. Now acclaimed system developer Tushar Chande shows you how to create real-world systems that meet your trading needs. A stimulating mix of cutting-edge techniques, timeless principles, and practical guidelines, Beyond Technical Analysis offers a comprehensive methodology to develop and implement your own system, bridging the gap between analysis and execution. Chande begins with a crucial first step: assessing your trading beliefs. As he points out, Your beliefs about price action must be at the core of your trading system. This allows the trading system to reflect your personality, and you are more likely to succeed with such a system over the long run. Once you've pinpointed your beliefs, you can then build effective systems around them. To help you construct and use these systems, Chande starts with the basics and ends at the state of the art. With easy-to-read charts and numerous examples, Chande explores the following: Foundations: diagnosing market trends, the perils of optimization, setting initial stops, selecting data, choosing orders, and understanding the summary test results New systems: trend following, pattern-based, trend/anti-trend, inter-market, filtered and extraordinary market opportunity systems, plus variations Equity curve analysis: measuring smoothness, portfolio strategies, monthly equity curves, and triggering effects Money management: risk of ruin, projecting drawdowns, changing bet size Data scrambling: a new method to generate synthetic data for testing A system for trading: starting, risk control, compliance, full traceability To foster consistent execution, Beyond Technical Analysis provides software that enables you to paper trade your system. A demo disk of Chande's Secure Trade Management software and data scrambling utility will let you test your system on true out-of-sample data and track your emotions and P☐ L as you transition the system from computer table to trading desk. A complete, concise, and thorough reference, Beyond Technical Analysis takes you step-by-step through the intricacies of customized system design, from initial concept through actual implementation. Acclaim for Tushar Chande's revolutionary approach for developing and implementing your own winning trading system Tushar Chande provides insightful but clear-cut techniques which will enlighten the savant as well as the newcomer. I would urge traders of all levels of experience to apply Chande's tremendously useful strategies! — Charles Le Beau President, Island View Financial Group Inc., author, Computer Analysis of the Futures Market The chapter on 'Equity Curve Analysis' alone will share with you concepts which have cost large trading houses millions of dollars to discover. —Murray A. Ruggiero, Jr. Contributing Editor, Futures Magazine President,
