Sustainable Squirrel Conservation Moriz Steiner, Falk Huettmann, 2023-06-29 This book attempts to move the family of squirrels (Sciuridae) out of the shadow of large charismatic mammals and to highlight management failures with the goal of moving towards an improved conservation approach. Particular attention is paid to the influence of taxonomic science on squirrel conservation. In addition, the authors show how human-driven climate change, global change and modern politics are shaping global squirrel populations as well as their surrounding environments and ecosystems. Squirrels are widespread around the globe, naturally occurring on every continent except Antarctica and Oceania, and they are certainly among the animals most commonly encountered in everyday life. Despite this, the authors of this volume identify worrying gaps in squirrel conservation. Squirrels are often hunted, trapped, poached, and stressed, and management strategies and legislation are often devised in the absence of proper knowledge of issues such as population sizes, taxonomies, and trends. Together, this can result in severe population declines and even species extinction. By assessing their taxonomic situation, ecology, the evolution and divergence of Sciuridae around the globe, and squirrels' well-being across habitats, the authors set a baseline from which to launch future investigations into the conservation of squirrels and other species. Additionally, the authors highlight the influences of climate change, unsustainable growth, and various man-made threats to the future of this family.

Invisible Capitalism Hiroshi Tasaka,2010-01 After the global economic crisis, many people are feeling that capitalism must mature toward the future. Then, what is maturity of capitalism? To know the answer, we should ask this question: What is maturity of the human mind? The answer to this question is clear. To become able to see invisible values. As the human mind matures, it becomes able to see invisible values. Such as wisdom inexpressible in words, human relationships through sympathy, trust between humans, reputation in the world, cultures of organizations or societies, and so forth. If so, what is maturity of capitalism? The answer to this question is also clear. To become the capitalism that emphasizes invisible capital. Then, how can we realize this? By taking off old glasses and look around. The old glasses of monetary economy. If we do so, we become able to see that five paradigm shifts are occurring in the economic principles that underlie capitalism. In this book, you will find insightful and encouraging vision of the evolution of capitalism in the future. Hiroshi Tasaka Dr. Hiroshi Tasaka is a Philosopher and a Poet speaking about the philosophy of life and work, of management and business. He is also speaking about the vision for the future society and the paradigm shift in human society. He is the author of more than 50 books, including The Age of Paradigm Shift; The Five Laws to Foresee the Future; Wisdom of Complexity; The Gaia Perspective; Ecology of Mind; What Will Happen in the Knowledge Society?; A New Paradigm of Strategic Thinking; Management of Complex Systems; Management of Tacit Knowing; The Evolution of The Professional; The Philosophy of Work; Why Do We Work?; What is the Reward of Working?; What is Success in Life?; and To the Summit - Why Should You Embrace an Ideal in Your Heart?. Dr. Tasaka is a Professor at Tama University in Tokyo, the President of both Think Tank SophiaBank and The Japan Social Entrepreneur Forum. He was nominated as a member of US-Japan Innovators by the Japan Society in New York in 2006 and was invited as a member of the Global Agenda Council of the World Economic Forum (Davos Conference) in 2008. tasaka@hiroshitasaka.jp
