Terrorist Use of Cyberspace and Cyber Terrorism: New Challenges and Responses M.N.

Ogun,2015-10-08 ICT plays a crucial role in the pursuit of modernization in the countries of Slovenia, Croatia, Albania and Bulgaria, which form the South Eastern European (SEE) region., The quest for Euro-Atlantic integration and the undeniable necessity for direct foreign investment have encouraged the SEE countries to invest in the development of cyber technology, and it has become the dominant area for social, economic and political interaction within the region. This has had both positive and negative consequences. This book presents the proceedings of the NATO Advanced Training Course (ATC), held in Ohrid, former Yugoslav Republic of Macedonia, in December 2014. The ATC addressed serious concerns about terrorist use of cyber technology in South Eastern Europe, which not only has the potential to destabilize regional efforts to create a platform for increased development by creating a breeding ground for the training of extremists and the launching of cyber attacks, but also represents a direct and indirect threat to the security and stability of other NATO partner countries. The book will be of interest to all those involved in countering the threat posed by terrorist use of the Internet worldwide.

Advances in Soft Computing Rajkumar Roy,Takeshi Furuhashi,Pravir K. Chawdhry,2012-12-06

Advances in Soft Computing contains the most recent developments in the field of soft computing in engineering design and manufacture. The book comprises a selection of papers that were first presented in June 1998 at the 3rd On-line World Conference on Soft Computing in Engineering Design and Manufacturing. Amongst these are four invited papers by World-renowned researchers in the field. Soft computing is a collection of methodologies which aim to exploit tolerance for imprecision, uncertainty and partial truth to achieve tractability, robustness and low solution cost. The area of applications of soft computing is extensive. Principally the constituents of soft computing are: fuzzy computing, neuro-computing, genetic computing and probabilistic computing. The topics in this book are well focused on engineering design and manufacturing. This broad collection of 43 research papers, has been arranged into nine parts by the editors. These include: Design Support Systems, Intelligent Control, Data Mining and New Topics in EA basics. The papers on evolutionary design and optimisation are of particular interest. Innovative techniques are explored and the reader is introduced to new, highly advanced research results. The editors present a unique collection of papers that provide a comprehensive overview of current developments in soft computing research around the world.
