Agreeing and Implementing the Doha Round of the WTO Harald Hohmann, 2008-11-10 The Doha Round is the first major trade negotiation round under the WTO since the failure of the Seattle Ministerial in 1999. The Doha discussions and results will have a large impact on the future of international trade law. Leading scholars and practitioners from three continents comment on four such areas in this book. Firstly, poverty eradication, capacity building, and special and differential treatment are required to change for WTO law to be accepted globally; this may lead to a reinterpretation of WTO law. Secondly, the major trade policy concerns, the global concept of competition, and the impacts of trade facilitation and of sustainability of trade liberalization are examined. The third topic is the improvement of the dispute settlement through, for example, a relaxation of tensions between the judicial and diplomatic models. Finally, possible solutions for the balance between free trade, environmental protection and human rights are explored.

Innovation, Catch-up and Sustainable Development Andreas Pyka, Keun Lee, 2021-11-16 This volume presents selected contributions from the 2018 conference of the International Schumpeter Society (ISS). The selected chapters in this volume reflect the state-of-the-art of Schumpeterian economics dedicated to the three conference topics innovation, catch-up, and sustainability. Innovation is driving catch-up processes and is the condition for a transformation towards higher degrees of sustainability. Therefore, Schumpeterian economics has to play a key role in these most challenging fields of human societies' development in the 21st century. The three topics are well suited to capture the great variety of issues, which have the potential to shape the scientific discussion in economics and related disciplines in the years to come. The presented contributions show the broadness and high standard of Schumpeterian analysis. The ideas of dynamics, heterogeneity, novelty, and innovation as well as transformation are the most attractive fields in economics today and offer the most prolific interdisciplinary connections now and for the years to come when humankind, our global society, has to master the transition towards sustainable economic systems by solving the grand challenges and wicked problems with which we are confronted today. Therefore, the book is a must-read for scholars, researchers, and students, interested in a better understanding of innovation, catch-up, and sustainability, and Schumpeterian economics in general.
