Metallurgical Effects at High Strain Rates R. Rohde,1973-09-01 A conference on Metallurgical Effects at High Strain Rates was held at Albuquerque, New Mexico, February 5 through 8, 1973, under joint sponsorship of Sandia Laboratories and the Physical Metallurgy Committee of The Metallurgical Society of AIME. This book presents the written proceedings of the meeting. The purpose of the conference was to gather scientists from diverse disciplines and stimulate interdisciplinary discussions on key areas of materials response at high strain rates. In this spirit, it was similar to one of the first highly successful conferences on this subject held in 1960, in Estes Park, Colorado, on The Response of Metals to High Velocity Deformation. The 1973 conference was able to demonstrate rather directly the increased understanding of high strain rate effects in metals that has evolved over a

period of roughly 12 years. In keeping with the interdisciplinary nature of the meeting, the first day was devoted to a tutorial session of invited papers to provide attendees of diverse backgrounds with a common basis of understanding. Sessions were then held with themes centered around key areas of the high strain rate behavior of metals.

Management Teams R Meredith Belbin,2012-07-26 Meredith Belbin's work on teams has become part of everyday language in organizations all over the world. All kinds of teams and team behaviours are covered. At the end of the book is a self-perception inventory so that readers can match their own personalities to particular team roles. Management Teams is required reading for managers concerned with achieving results by getting the best from their key personnel.

Product Design for Manufacture and Assembly Geoffrey Boothroyd,Peter Dewhurst,Winston A. Facets of Power Saunders, Richard, Nyamunda, Tinashe, 2016-04-18 The diamond fields of Chiadzwa, among the world's largest sources of rough diamonds have been at the centre of struggles for power in Zimbabwe since their discovery in 2006. Against the backdrop of a turbulent political economy, control of Chiadzwa's diamonds was hotly contested. By 2007 a new case of 'blood diamonds' had emerged, in which the country's security forces engaged with informal miners and black market dealers in the exploitation of rough diamonds, violently disrupting local communities and looting a key national resource. The formalisation of diamond mining in 2010 introduced new forms of large-scale theft, displacement and rights abuses. Facets of Power is the first comprehensive account of the emergence, meaning and profound impact of Chiadzwa's diamonds. Drawing on new fieldwork and published sources, the contributors present a graphic and accessibly written narrative of corruption and greed, as well as resistance by those who have suffered at the hands of the mineral's secretive and violent beneficiaries. If the lessons of resistance have been mostly disheartening ones, they also point towards more effective strategies for managing public resources, and mounting democratic challenges to elites whose power is sustained by preying on them.
