The Strategic Leader John Pisapia,2009-08-01 This book helps leaders focus on, and achieve, their main purpose - the development and maintenance of a high performing organization. You will find the habits, actions, and tactics that have worked in that crucible and what I believe will continue to work under the dynamic conditions leaders face today. The book is framed around six habits gleaned from leaders who have successfully answered the following questions. Do I need to think differently? What is the environment telling me? Where are we going and where do we need to go? How do I position myself and/or my organization, team and individuals to take advantage of opportunities presented by the environment? How do I multiply myself through other people? How do I find and turn talent into performance? How do I ignite the soul of followers to achieve greatness beyond what anyone imagined possible? How do I know if we are succeeding? How do we continually adapt to change and maintain profitability and our competitive advantage? The Strategic leader answers those questions by identifying the actions and tactics used to establish a holistic learning approach to leading. It accomplishes its objective by describing how strategic leaders use new actions and tactics -jumping the curve, minimum specifications, organizational fitness, generative conversations, chunking change, lighting the way, running for daylight, bonding, bridging, bartering, and institution building - to create direction, establish alignment and commitment, in order to produce results in a dynamic globalizing world. In the first section you will discover the value of the leader's Wheel to develop a high performing organization. In the following chapters you will discovering the six habits that enable you to turn the Wheel: acquiring a strategic mindset, artistry, anticipating, articulating, aligning and assuring. Your path to discover these secrets will be aided by two original self assessment tools: The Strategic Thinking Questionnaire (STQ) and the Strategic Leadership Questionnaire (SLQ) which are available to those who purchase the book.

Open Labs and Innovation Management Valérie Mérindol,David W. Versailles,2022-11-17 This book examines returns on experience and managerial practices to generate deeper collaboration, intensify co-creation, support start-ups and established companies to explore, develop and accelerate their projects thanks to open labs (living labs, fab labs, coworking spaces, third spaces, etc). Open labs are the beatbox to create a rhythm in ecosystems and make all stakeholders move forward, faster, together. This book proposes a framework to understand how open labs, innovation hubs and collaborative spaces contribute to ecosystems. The book looks beyond the short-term effects of open labs and identifies four main dimensions: communities, physical spaces, events, and portfolios of services offered to private businesses, entrepreneurs, and start-ups, established companies, or public institutions. Drawing on extensive field research lasting over five years, with more than 40 cases and more than 200 interviews plus direct observation within different environments, this edited book investigates how managers run these labs, and how 'users' or 'clients' evolve when benefitting from their services. All chapters analyse how an actual management impacts the dynamics of communities, how it shapes the co-evolution between open labs and their ecosystems, and how the management of the physical space impacts the mission of the lab and its role in the ecosystem. Open Labs and Innovation Research is written for scholars and researchers within the fields of innovation studies and management science. This book can also inform teaching, public policy making, and professional practice.

Mega-Events and Globalization Richard Gruneau, John Horne, 2015-10-05 Since the turn of the twenty first century, there has been a trend for urban mega events to be awarded to cities and nations in the East and Global South. Such events have been viewed as economic stimulant as well as opportunities to promote national identity, gain greater international recognition and exercise a form of 'soft power.' However, there has also been on-going controversy about the value, impact and legacy of global mega events in these cities and nations. This book provides a critical examination of the ambition for spectacle that has emerged across the East and Global South. The chapters explore the theoretical and conceptual issues associated with mega-events and new forms of globalization, from the critical political economy of mega-events in a changing world order to the contested social and economic legacies of mega-events and the widespread opposition that increasingly accompanies these events. The book also explores questions of urban development and governance, the role of new communications technologies in global economic expansion, the high security State, and the growing global influence of international non-governmental organizations. This book offers a rich collection of original theoretical contributions and global case studies from leading international scholars from the social sciences and humanities. It offers a fresh and unique interdisciplinary perspective that synthesizes cutting edge research on mega-events and urban spectacles while simultaneously contributing to a broader understanding of the dynamics of global capitalism and international political power in the early twenty first century.

Leading and Managing Innovation Russell D. Archibald, Shane Archibald, 2016-11-30 The primary cause of many project failures is that responsible executives, because of their lack of knowledge in project management, fail to demand that their managers and staff properly utilize the well-proven best practices, processes, systems, and tools that are now available in this field. This book remedies this situation by providing executives at all levels with the understanding and knowledge needed to best take advantage of the power of effective project management and thereby lead and manage innovations within their enterprise. In *Leading and Managing Innovation: What Every Executive Team Must Know about Project, Program, and Portfolio Management*, Second Edition, the authors present concise descriptions of The key concepts underlying project and program management The important characteristics of projects and programs How projects and programs are best governed and managed How to determine if the desired benefits have actually been achieved The book presents a list of 31 reasonable demands that executives can and must place on their staff members to ensure excellence in the way their programs and projects are created, selected for funding, planned, and executed. Placing these demands communicates to the entire enterprise that top management understands what it takes to achieve the best performance possible and fully supports the continuous improvement needed to ensure continued success. *Leading and Managing Innovation* explains how to measure the project management maturity level of an enterprise, benchmark against competitors, and identify where project management improvements are required. It discusses the many ways that an enterprise can derive substantial success and competitive advantage from increasing its project management maturity level. A helpful quick reference summary of all of the book's key information is included in the final chapter. Armed with this information, you will be well-qualified to give excellent direction to your managers and staff to ensure that your vital capability in the field of project management—and how you manage innovation—is equal to or better than that of your competitors.

Australia's Metropolitan Imperative Richard Tomlinson, Marcus Spiller, 2018-07 Since the early 1990s there has been a global trend towards governmental devolution. However, in Australia, alongside deregulation, public-private partnerships and privatisation, there has been increasing centralisation rather than decentralisation of

urban governance. Australian state governments are responsible for the planning, management and much of the funding of the cities, but the Commonwealth government has on occasion asserted much the same role. Disjointed policy and funding priorities between levels of government have compromised metropolitan economies, fairness and the environment. Australia's Metropolitan Imperative: An Agenda for Governance Reform makes the case that metropolitan governments would promote the economic competitiveness of Australia's cities and enable more effective and democratic planning and management. The contributors explore the global metropolitan 'renaissance', document the history of metropolitan debate in Australia and demonstrate metropolitan governance failures. They then discuss the merits of establishing metropolitan governments, including economic, fiscal, transport, land use, housing and environmental benefits. The book will be a useful resource for those engaged in strategic, transport and land use planning, and a core reference for students and academics of urban governance and government.

Collaboration Strategy Felix Barber, Michael Goold, 2014-09-25 Current strategy thinking focuses on what to do, not how to motivate employees, suppliers and business partners to do it. Whether working with employees or with external suppliers, companies are increasingly stumbling with implementing strategy. But why is this happening? And how can we address it? Collaboration Strategy argues that motivating people and companies is fundamental to business success. In the activities that matter most in today's economy – design, development, marketing, sales, projects – it is hard to define just what you want done. Setting up business activities to get the results you want becomes a strategic challenge. In industries from pharmaceuticals to fashion, software to stock exchanges, new ways of working with partners that break down traditional company boundaries and establish new roles and relationships have enabled businesses to grow rapidly and achieve superior profits. At the heart of this book, Felix Barber and Michael Goold have combined their considerable expertise to present a complete and original 'collaboration framework' based on their findings over a seven year period in which they interviewed over 200 businesses. The framework explains how to set up to get the results you want for a range of different activities and industries. They present the 10 requirements needed for profitable collaboration, and use real-life scenarios to apply their framework and analysis, offering a menu of tactics to address the most common problems in setting up collaboration with partners. Essentially, you must design a basis for working together, or 'collaboration,' with your employees and suppliers that will get them to do what you want.

Mega-Regional Trade Agreements Thilo Renmann, 2017-07-20 This book provides an in-depth analysis of Mega-Regionals, the new generation of trans-regional free-trade agreements (FTAs) currently under negotiation, and their effect on the future of international economic law. The main focus centres on the EU-US Transatlantic Trade and Investment Partnership (TTIP), the Trans-Pacific Partnership (TPP) and the EU-Canada Comprehensive Economic and Trade Agreement (CETA), but the findings are also applicable to similar agreements under negotiation, such as the Regional Comprehensive Economic Partnership (RCEP). The specific features of Mega-Regional Trade Agreements raise a number of issues with respect to their potential effect on the current system of international trade and investment law. These include the consequences of Mega-Regionals for the most-favoured-nation (MFN) principle, their relation to the multilateral system of the World Trade Organization (WTO), their democratic legitimacy and their interaction with existing bilateral investment treaties (BITs). The book is intended for academics and practitioners working in the field of international economic law.

Automotive Global Value Chain Wilson Kia Onn Wong, 2017-08-09 Today, some suppliers have grown increasingly powerful and in certain cases, earn revenues that rival or even exceed that of their automaker clients. In the pre-globalisation period, automakers wielded absolute power over their significantly smaller suppliers. This book reveals the upending of this relationship, with the gradual shift in the balance of power from automakers to their suppliers in this era of globalisation. The book examines how suppliers in the global tyres, seats, constant velocity joints (hereafter 'CVJs'), braking systems and automotive semiconductor industries have evolved into powerful oligopolies through a mix of acquisition and organic growth strategies. It also highlights how joint ventures could be strategically deployed as springboards to acquisition, as they enable firms to familiarise themselves with their partners' markets and operations. Moreover, the book analyses the disruption stirred by the entry of well-resourced technology titans into this industry and their inevitable clash with the traditional incumbents. This book is an invaluable reference for anyone interested in learning more about the automakers' and now their suppliers' relentless quest to create market-dominating intelligent driving systems.
