Making Strategy Fran Ackermann,Colin Eden,2011-09-19 Electronic Inspection Copy available for instructors here 'Demystifies strategy making while at the same time deepening our understanding of what the process entails. Their work is a marvellous guide for those striving to make sense of complexity' - Karl E. Weick, Rensis Likert Distinguished University Professor of Organizational Behavior and Psychology, University of Michigan 'This book is at the very cutting edge of strategic management theory and yet also of immense practical use. It is truly a rare and stunning achievement' -John M Bryson, McKnight Presidential Professor of Planning and Public Affairs, Hubert H. Humphrey Institute of Public Affairs, University of Minnesota 'Using this book enabled me to facilitate a multicultural team of seven managers so that they very quickly got to grips with the challenges and opportunities facing the organization and developed a realistic workable strategy, whilst at the same time building a real sense of team cohesion and the feeling that individuals had been listened to' -Alison Devine, Director, British Council, Taipai This lucid and highly-accessible text addresses the challenges of how to build a robust and implementable strategy. Strategy making is seen as something relevant to managers of departments, divisions, SME's, as well as the top management teams of public and for-profit organizations. Four key routes to creating a strategy are discussed. These routes, when taken together, provide a powerful means for agreeing a negotiated strategy, and comprise: strategic issue management, agreeing organizational purpose, competitiveness from the exploitation and protection of distinctiveness, and the strategic management of stakeholders. The designs have been used extensively, in a wide range of countries, by management teams in all types of organisations. Companion materials available here

Strategy Mapping for Learning Organizations Phil Jones,2016-04-01 How can we ensure our strategy will succeed, especially in changing and uncertain times? The answer, as explained in Strategy Mapping for Learning Organizations, is to become a more responsive organization - one that captures its strategy in strategy maps, learns from that strategy and can adapt to deliver results. For anyone involved in managing strategy and performance, applying the powerful strategy mapping techniques will move your balanced scorecard from an operational tool to one of strategy and change. It will help you capture, communicate and manage your strategy more effectively. However, strategy can no longer be simply a top down, annual process. It needs to be more iterative, emergent and involving. Many agile organizations have adopted rolling plans and budgets. To bring greater agility into the wider strategy and performance management processes requires the tools and techniques described in Strategy Mapping for Learning Organizations. Phil Jones provides a detailed guide to developing, rolling out and managing with modern strategy maps and scorecards, building in agility and learning. His book incorporates the latest strategic thinking and models. It places the balanced scorecard in a wider governance context that includes the management of risk and environmental and social responsibility. Fully illustrated with examples from many different organizations, this book will help you deliver your strategy better.

Strategy Maps Robert S. Kaplan,David P. Norton,2004 The authors of The Balanced Scorecard and The Strategy-Focused Organization present a blueprint any organization can follow to align processes, people, and information technology for superior performance.

Visible Thinking John M. Bryson,Fran Ackermann,Colin Eden,Charles B. Finn,2004-08-20 Causal mapping is a tool that enables you to make sense of challenging situations so that you can get more out of them. A causal map is a word and arrow diagram in which ideas and actions are causally linked with one another through the use of arrows. Typically, only specialists such as physical or social scientists and operations researchers know about causal mapping and the tool is therefore not widely known or its broad applicability understood. Until now there has been no guidance available on how to make use of the tool for more general purposes. This book lets managers understand the theory and practice of causal mapping in layman's terms for use in both individual and group settings. It shows managers how to develop and use action-oriented strategy maps and logic models in business decision making. The authors show how causal mapping can be used as a tool to make sense of challenging situations and develop effective business responses.

Visual Strategy John M. Bryson,Fran Ackermann,Colin Eden,2014-07-28 Strategic planning becomes visual with strategy maps and the tools, techniques, and guidance for turning them into effective action. Developed as a companion workbook to John Bryson's best-selling Strategic Planning in Public and Nonprofit Organizations, Visual Strategy: A Workbook for Strategy Mapping in Public and Nonprofit Organizations, goes beyond making the case for good and effective strategic planning to making strategy visual through effective strategy mapping. Strategy mapping prevents groups of people from talking over one another and going around in circles. It helps people speak and be heard, produce lots of ideas and understand how they fit together, make use of causal reasoning, and clarify ultimately what they want to do in terms of mission, goals, strategies, and actions. Strategy mapping can join process and content in such a way that good ideas worth implementing are found and the agreements and comments needed to implement them are reached. The result is living strategic plans that act as useful guides to action. With detailed examples, actual strategy maps, process guidelines and hand-drawn illustrations, the book will help leaders, managers, students and other professionals see patterns across mission, goals, strategies and actions while helping to identify areas of alignment and misalignment and determine, real time, where elements are needed, missing or not useful in a strategic plan. For leaders and managers of public and nonprofit organizations, facilitators and consultants, professors and students of strategic planning, strategic management, strategic mapping, and public policy, professional development workshops focused on strategic planning and strategy mapping.

Tools for Strategy Henri Hakala,Tero Vuorinen,2020-09-24 This Element discusses the concept and applications of strategy tools. Strategy tools are frameworks, techniques, and methods that help individuals and organizations to create their strategies. After a brief overview of different ideas on strategy and strategic thinking, we move on to define and discuss what strategy tools are and elaborate on the promise and perils of using them to implement strategic management. We review the most commonly used, classic tools and techniques, but also less well-known tools of the strategy trade, as proposed by scholars writing in the leading strategy journals. We conclude by offering suggestions on how to improve strategic design and the effectiveness of the resultant strategy through the selective use of the most appropriate tools. Overall, this Element provides a quick overview of the tools that are available to those tasked with creating organizational strategies and making strategic decisions.

<u>The Strategy Map for General Electric Medical Systems, 2002</u> Nadine Pahl,2009-03-27 Research Paper (undergraduate) from the year 2008 in the subject Business economics - Business Management, Corporate Governance, grade: 1,3, University of Applied Sciences Berlin (Master of Business Administration), course: Strategic Management, language: English, abstract: If you take the words of a former General Electrics (GE) employee to define strategy, William E. Rothschild said, "What do you want to achieve or avoid? The answers to this question are objectives. How will you go about achieving your desired results? The answer to this you can call strategy." This statement not only highlights the need for strategy but also the need to bring strategy to fruition. Companies should not only devise strategy but also successfully clarify and execute their strategies. This means that a company has to be able to measure its strategic success. Unfortunately, company strategy is not always transparent or understood in the same way by a company's key players. Sun Tzu, a Chinese military strategist who wrote the military treatise The Art of War, praised this aspect for strategies in war as follows: "All men can see these tactics whereby I conquer, but what none can see is the strategy out of which victory is evolved". The Strategy Map created by Kaplan and Norton is to facilitate corporate strategy development and execution providing a missing link between strategy formulation and strategy implementation by identifying the key internal processes that drive strategic success and by aligning investment in people, technology and organizational capital for the greatest impact. The first part of the assignment describes in detail the theoretical framework of Strategy Maps. The second part uses the theory to describe and visualize the Strategy Map of General Electric Medical Systems (GEMS) – the world's leading manufacturer of diagnostic imaging equipment. This practical approach is based on the publication of Tarun Khanna about GEMS in the Harvard Business School Press in February 2003. In conclusion, there is a brief up-to-date situation on GEMS after 2002 and some statements to the authors' experience in creating the GEMS Strategy Map.

Strategy Maps ,2018 More than a decade ago, Robert S. Kaplan and David P. Norton introduced the Balanced Scorecard, a revolutionary performance measurement system that allowed organizations to quantify intangible assets such as people, information, and customer relationships. Then, in The Strategy-Focused Organization, Kaplan and Norton showed how organizations achieved breakthrough performance with a management system that put the Balanced Scorecard into action. Now, using their ongoing research with hundreds of Balanced Scorecard adopters across the globe, the authors have created a powerful new tool--the strategy map--that enables companies to describe the links between intangible assets and value creation with a clarity and precision never before possible. Kaplan and Norton argue that the most critical aspect of strategy--implementing it in a way that ensures sustained value creation--depends on managing four key internal processes: operations, customer relationships, innovation, and regulatory and social processes. The authors show how companies can use strategy maps to link those processes to desired outcomes; evaluate, measure, and improve the processes most critical to success; and target investments in human, informational, and organizational capital. Providing a visual aha! for executives everywhere who can't figure out why their strategy isn't working, Strategy Maps is a blueprint any organization can follow to align processes, people, and information technology for superior performance.
