Its about using pertinent information to make smart decisions, and doing it fast enough to keep your business ahead of the curve. Plain and simple, most strategic planning efforts fail because they can't keep up with the evolving demands of the market. Standing apart from the piles of discarded management wisdom, Making Sense of Strategy provides real, practical insights and advice for 21st-century businesses. Top strategy consultant Tony Manning cuts through layer after layer of guru babble to bring the reader only the most genuinely valuable information: the questions that need to be asked, the principles that every organization and its people must adopt, and the tools that every company needs in order to develop their core business strategies and create profit. Mannings refreshingly streamlined approach to strategy encompasses: * The value of shared ideas * The importance of creating and sustaining unique communities for your products or services * The link between a companys values and those of its customers and shareholders * And why strategic management is ultimately a conversation, one that empowers its participants with a sense of purpose and ownership. - The Platform of Agile Management Willy Sussland, 2017-09-11 Facing the amplitude and the acceleration of changes, management must also change, and it must become alert, adaptable, and agile. The children of the Internet, the likes of Google, Amazon, Facebook and Tesla, are born agile, and they challenge the traditional organizations that have long lost their original agility. The latter may have innovated externally i.e. on the market-oriented part of their organization. Yet, internally their mindset, their models, and their methods have remained tightly trapped in traditional tenets. Confronted with the need for deep changes, an increasing number of business-leaders launch change-management programs, yet, conceived and carried out in traditional ways, up to 70% of them result in partial or total failure. Management cannot innovate itself, it needs people with the right motivation and with the right mind-set. However, stuck in the old system, people can only keep working in the old ways and means. Thus, the leadership must start by replacing a traditional system with a new and agile one, which will unbridle entrepreneurship. The Platform of Agile Management and the Program to Implement It combines 3 principles that help to innovate thinking, 3 paradigms to innovate behaviours, and 3 practices to innovate and to accelerate actions. The proposed platform is comprehensive, connective, and congenial. It is implemented with an agile program that combines top down push by the leadership with the bottom up pulled by the people. Then, the proposed platform will generate continuous improvements and innovations of the performance drivers.

- Emperitive Strategies for Academic Entrepreneurship: Commercialization of Research-Based Products Szopa, Anna, 2015-09-21 In recent years, the pace of technological growth—from the very first stages of research and development to full-scale industrial implementation—has quickened at an exponential rate. To better keep pace with rapidly-changing market demands, the gap between university research incubators and public-sector start-up companies has undergone a marked contraction. Competitive Strategies for Academic Entrepreneurship: Commercialization of Research-Based Products seeks to fill the gap in research between universities and the public, and offers cutting-edge insight into the current state of the field. Charting a course that moves from discussions of academic resistance and implications for knowledge-transfer theory to current case-studies of academic/industrial launch-pads like COTEC's Technology Commercialization Accelerator and the Maryland Industrial Partnerships program, this publication targets an audience of academicians, administrators, researchers, entrepreneurs, and established professionals, and seeks to provide insight into the mechanisms by which the research of today becomes the household names of tomorrow.
