*Strategy Workshop Toolkit* Paul Christodoulou,2010-06 Top-down strategy is no longer appropriate in decentralised organisations. Strategy is now more 'middle-up', created by senior managers via intense, workshop-based initiatives. Strategy workshops can be challenging. They require careful preparation and imaginative orchestration so that facts, experience and gut-feel merge to create innovative strategic concepts. Furthermore, high political stakes can make these critical events feel like herding wild cats. Badly run workshops can result in frustration and strategic paralysis. Well-run workshops can result in fresh ideas, joined-up thinking, a motivated team and, ultimately, significant business benefits. This book provides a practical toolkit to assist the strategy leader in planning and executing successful strategy workshops. The author, Paul Christodoulou, has over 20 years' experience as a strategy leader working in international business based in the UK, USA and Europe.

*Advanced Information Systems Engineering Workshops* Andreas Metzger,Anne Persson,2017-06-01 This book constitutes the thoroughly refereed proceedings of three international workshops held in Essen, Germany, in conjunction with the 29th International Conference on Advanced Information Systems Engineering, CAiSE 2017, in June 2017. The 11 full papers presented were carefully reviewed and selected from 27 submissions. The workshops were the 4th International Workshop on Advances in Services Design Based on the Notion of Capability (ASDENCA); the 5th International Workshop on Cognitive Aspects of Information Systems Engineering (COGNISE); and the First International Workshop on Teaching for Smart Information Systems – Smart Information Systems for Teaching (T4SIS4T), which took place as a dedicated session under the umbrella of the COGNISE workshop.

**Business Models and Strategies for Open Source Projects** Monaco, Francisco José,2023-07-17 Since its emergence in the mid-1980s through the protagonism of free software and open source movements, the concept of freely shareable technology has steadily established itself in the following decades to enter the 21st century as a leading industrial paradigm. From the original ambit of software technology, the principles of collaborative construction of publicly accessible knowledge grounding the open source paradigm have been extended to embrace any intellectual artifact made available under non-exclusive rights of utilization, development, and distribution. It is noteworthy, however, that whilst on one hand it is not difficult to enumerate advantages of the use of open source products by individuals and organizations—whether related to cost reduction, socio-technological inclusion, governance of technology development, security and privacy transparency, among others—on the other hand, it is not as immediate to identify their motivation to develop open source technology. While there may surely be initiatives driven by either ethical grounds, personal avocation, or public policies, those reasons alone do not explain the lasting success of many large community-driven projects, nor why large commercial enterprises massively invest in open source development. *Business Models and Strategies for Open Source Projects* investigates the rationales and the strategy underlying companies' decisions to produce and release open source products as well as which business models have succeeded. Covering topics such as embedded systems, open source ecosystems, and software companies, this premier reference source is a valuable resource for entrepreneurs, business leaders and managers, students and educators of higher education, librarians, software developers, researchers, and academicians.

**Digital Product Management, Technology and Practice: Interdisciplinary Perspectives** Strader, Troy J.,2010-09-30 This book covers a wide range of digital product management issues and offers some insight into real-world practice and research findings on the technical, operational, and strategic challenges that face digital product managers and researchers now and in the next several decades--Provided by publisher.

*Maximizing Commerce and Marketing Strategies through Micro-Blogging* Burkhalter, Janée N.,2015-05-31 The Internet is quickly becoming a commonly used tool for business-customer interaction. Social media platforms that were once typically reserved for personal use are now becoming a vital part of a business's strategy. *Maximizing Commerce and Marketing Strategies through Micro-Blogging* examines the various methods and benefits of using micro-blogs within a business context, bringing together the best tools and tactics necessary to properly incorporate this approach. Highlighting current empirical research and insights from various disciplines, this book is an essential reference source for academics, graduate students, social media strategists, and business professionals interested in the positive use of social media in business environments.

*Domain-Specific Program Generation* Christian Lengauer,Don Batory,Charles Consel,Martin Odersky,2004-05-24 Program generation holds the promise of helping to bridge the gap between application-level problem solutions and efficient implementations at the level of today's source programs as written in C or Java. Thus, program generation can substantially contribute to reducing production cost and time-to-market in future software production, while improving the quality and stability of the product. This book is about domain-specific program generation; it is the outcome of a Dagstuhl seminar on the topic held in March 2003. After an introductory preface by the volume editors, the 18 carefully reviewed revised full papers presented are organized into topical sections on - surveys of domain-specific programming technologies - domain-specific programming languages - tool support for program generation - domain-specific techniques for program optimization

*Agile Processes in Software Engineering and Extreme Programming – Workshops* Peggy Gregory,Philippe Kruchten,2021 This open access book constitutes papers from the 5 research workshops, the poster presentations, as well as two panel discussions which were presented at XP 2021, the 22nd International Conference on Agile Software Development, which was held online during June 14-18, 2021. XP is the premier agile software development conference combining research and practice. It is a unique forum where agile researchers, practitioners, thought leaders, coaches, and trainers get together to present and discuss their most recent innovations, research results, experiences, concerns, challenges, and trends. XP conferences provide an informal environment to learn and trigger discussions and welcome both people new to agile and seasoned agile practitioners. The 18 papers included in this volume were carefully reviewed and selected from overall 37 submissions. They stem from the following workshops: 3rd International Workshop on Agile Transformation 9th International Workshop on Large-Scale Agile Development 1st International Workshop on Agile Sustainability 4th International Workshop on Software-Intensive Business 2nd International Workshop on Agility with Microservices Programming.

**Model Driven Architecture for Reverse Engineering Technologies: Strategic Directions and System Evolution** Favre, Liliana,2010-01-31 This book proposes an integration of classical compiler techniques, metamodeling techniques and algebraic specification techniques to make a significant impact on the automation of MDA-based reverse engineering processes--Provided by publisher.

**Information and Software Technologies** Giedre Dregvaite,Robertas Damasevicius,2014-09-11 This book constitutes the refereed proceedings of the 20th International Conference on Information and Software Technologies, ICIST 2014, held in Druskininkai, Lithuania, in October 2014. The 34 papers presented were carefully reviewed and selected from 68 submissions. The papers are organized in topical sections such as information systems; business intelligence for information and software systems; software engineering; information technology applications.

**Computerworld** ,1982-06-07 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. **The Alcalde** ,2003-05 As the magazine of the Texas Exes, The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years. The Alcalde serves as an intellectual crossroads where UT's luminaries - artists, engineers, executives, musicians, attorneys, journalists, lawmakers, and professors among them - meet bimonthly to exchange ideas. Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater. The magazine's unique name is Spanish for mayor or chief magistrate; the nickname of the governor who signed UT into existence was The Old Alcalde.
