Strategy in Action Rachel E. Curtis, Elizabeth A. City, 2009-09-01 How can we systemically improve the quality of classroom instruction and the learning and achievement of students? In an era when isolated examples of excellence are not good enough, we need systems that support improvement and excellence for all. This book describes how systems can effectively engage in this complex, challenging, and crucial work. The authors explore three core competencies of high-performing school systems: (1) understanding what the work is—a deep understanding of the core business of facilitating learning, a vision of what that looks like, and an awareness of where the system is in relation to that vision; (2) knowing how to do the work—a theory of action for improving instruction, a focus on key strategies, and effective alignment of resources; and (3) building the individual and organizational “habits of mind” that foster continuous improvement. Each chapter includes examples that illustrate key concepts in action, questions to spur self-assessment in key areas of competence, and tools and resources for building capacity at different levels and stages of development.

Security Strategy Bill Stackpole, Eric Oksendahl, 2010-10-13 Addressing the diminished understanding of the value of security on the executive side and a lack of good business processes on the security side, *Security Strategy: From Requirements to Reality* explains how to select, develop, and deploy the security strategy best suited to your organization. It clarifies the purpose and place of strategy in an information security program and arms security managers and practitioners with a set of security tactics to support the implementation of strategic planning initiatives, goals, and objectives. The book focuses on

security strategy planning and execution to provide a clear and comprehensive look at the structures and tools needed to build a security program that enables and enhances business processes. Divided into two parts, the first part considers business strategy and the second part details specific tactics. The information in both sections will help security practitioners and managers develop a viable synergy that will allow security to take its place as a valued partner and contributor to the success and profitability of the enterprise. Confusing strategies and tactics all too often keep organizations from properly implementing an effective information protection strategy. This versatile reference presents information in a way that makes it accessible and applicable to organizations of all sizes. Complete with checklists of the physical security requirements that organizations should consider when evaluating or designing facilities, it provides the tools and understanding to enable your company to achieve the operational efficiencies, cost reductions, and brand enhancements that are possible when an effective security strategy is put into action.

Case Studies in Strategic Management: A Practical Approach Sanjay Mohapatra, 2011

Human Resources and Tourism Darren Lee-Ross, Josephine Pryce, 2010 This book combines theoretical and practical aspects of applied human resources management using a critical lens. It is both a descriptive and analytical journey through the tourism sector which, due to its nature, may be described as a relatively deregulated and eclectic industry. In such a context, human resource practice as presented in this book reflects these extremes.

Global Surgery Mark A. Hardy, Beth R. Hochman, 2023-07-24 Few books have been published to assist local and visiting clinicians in addressing opportunities to expand surgical care in low- and middle-income countries. With contributions from international experts and surgical leaders, this book serves as a valuable resource for local and visiting faculty, trainees, and students in their endeavors to deliver surgical services in existing facilities as well as to develop new infrastructures for specialized surgical care. This book presents an anthology of important lessons gleaned from the experiences of participants in selected academic global surgery centers and existing partnerships all over the world.

Contributing authors summarize methods to build partnerships and expand capacity with a focus not only on how to, but also on what worked, what didn't work, and what could be done differently. They discuss specific examples ranging from implementing colon cancer screening to building a transplant program. In addition, several chapters describe approaches to diagnosis and management of specific surgical pathologies in limited resource environments as a complement to standard surgical texts in general surgery, thoracic surgery, neurosurgery, urology, obstetrics and gynecology, orthopedics, and surgery for contractures and burns. Practical and user-friendly, *Global Surgery* encapsulates the increasing enthusiasm of young faculty, trainees and medical students to improve access to surgical care in the world's low- and middle-income countries.

While FOSS development, education, and business potentials may appear as a phenomenon for the developed world, a sizable number of developing countries have implemented FOSS policies of their own. Empirical and anecdotal evidence continues to demonstrate the potential of FOSS technologies for giving people the opportunity to participate actively in the development and shaping of their own technology, stimulating the growth of indigenous software industries, creating local jobs, and lowering technology acquisition and deployment costs.

Each chapter is chockfull of helpful tools including checklists, sample lecture notes, writing assignments, and grading criteria. To make it easier to customize this material, these tools are available on an accompanying CD along with a rating sheet for choosing a textbook, a student grade-record sheet, a sample statement on academic integrity and a pool of less-than-perfect test items to hone item-writing skills. Balance Scorecard Dian Syariati, Kristin Rosalina, Narulita Rahmi Azriani, Syaiful Iqbal, 2011-04-02 Dunia bisnis di era perdagangan global mengalami pergerakan yang sangat ekstrim. Perubahan cara pandang pelaku bisnis terhadap dunia usaha dan persaingan pun mengalami suatu perubahan. Revolusi industri yang digagas di Inggris pada abad sembilan belas tergantikan oleh revolusi teknologi informasi pada era globalisasi. Menurut Nugroho dalam Ciptani (2000), pergeseran tingkat persaingan bisnis dari industrial competition ke information competition disebut pergeseran paradigma. Saat ini, kekuatan utama perusahaan dalam persaingan bisnis tidak hanya bertumpu pada sumber daya alam dan sumber daya manusia melainkan juga bertumpu pada perkembangan teknologi informasi. Hanya perusahaan yang menguasai teknologi informasi dengan maksimum yang mampu bertahan bahkan berkembang di tengah ketatnya persaingan pasar bebas. Selanjutnya, Ciptani (2000) mengemukakan bahwa pergeseran paradigma dari industrial

competition ke information competition juga akan mengubah alat ukur dan acuan yang dipakai oleh perusahaan untuk mengukur kinerjanya. Perkembangan dunia bisnis yang mengiringi perkembangan teknologi informasi menyebabkan ukuran keberhasilan pencapaian suatu entitas bisnis mengalami perubahan. Ukuran keberhasilan pencapaian suatu entitas bisnis mengalami sebuah pergeseran dan perkembangan. Kaplan dan Norton (1992) menyatakan "the traditional financial performance measures worked well for the industrial era but they are out of step with the skills and competencies companies are trying to master today." Pada abad industri, ukuran finansial perusahaan yang berbasis pada data historis menjadi satu-satunya ukuran keberhasilan. Akan tetapi, pada era persaingan pasar bebas yang dinamis ukuran nonfinansial tidak hanya berorientasi pada data historis. Orientasi masa depan mulai diperhitungkan dan ditempatkan pada posisi utama sebagai penilaian terhadap kinerja sebuah entitas bisnis. Hal ini disebabkan ukuran finansial tidak cukup andal untuk dapat mengimbangi pergerakan dunia bisnis di era teknologi informasi yang terjadi saat ini.
