The Brazilian Jiu Jitsu Globetrotter Christian Graugart,2012-11-13 I didn't care about what would happen. He might win the match, but he could never beat me. I was living my dream, traveling the world with complete freedom. Nothing could put me down. The play button was pressed again. My opponent took my back and I tapped to a bow and arrow choke. I laughed and shook his hand, as I stood back up. I was out of the competition. Everything was perfect. Life couldn't be better. After a training partner commits suicide, Christian Graugart feels obliged to do something with his life. Starting his own gym, dedicating almost all his time to the art of BJJ, alters everything, including the way he sees himself. The Brazilian Jiu Jitsu Globetrotter is not only a story about traveling and training in martial arts. It's about all the things that can happen to you if you choose to truly stay alive until you actually die.

Citizenship, Democracy and Belonging in Suburban Britain David Jeevendrampillai,2021-10-12 A study of the conditions of being a citizen, belonging and democracy in suburban Britain, this book focuses on understanding how a community takes on the social responsibility and pressures of being a good citizen through what they call 'stupid' events, festivals and parades. Building a community is perceived to be an important and necessary act to enable resilience against the perceived threats of neoliberal socio-economic life such as isolation, selfishness and loss of community. Citizenship, Democracy and Belonging in Suburban Britain explores how authoritative knowledge is developed, maintained and deployed by this group as they encounter other 'social projects', such as the local council planning committee or academic projects researching participation in urban planning. The activists, who call themselves the 'Seething Villagers', model their community activity on the mythical ancient village of Seething where moral tales of how to work together, love others and be a community are laid out in the Seething Tales. These tales include Seething 'facts' such as the fact that the ancient Mountain of Seething was destroyed by a giant. The assertion of fact is central to the mechanisms of play and the refusal of expertise at the heart of the Seething community. The book also stands as a reflexive critique on anthropological practice, as the author examines their role in mobilising knowledge and speaking on behalf of others. Citizenship, Democracy and Belonging in Suburban Britain is of interest to anthropologists, urban studies scholars, geographers and those interested in the notions of democracy, inclusion, citizenship and anthropological practice.

Fried Joan Z. Borysenko, Ph.D.,2011-01-01 This Is an Invitation to Take Your Power Back! What happened to the spark you had as a child that powered curiosity, engagement with life, and creativity? Has it burned out? Are you feeling emotionally and physically exhausted and cynical, wondering if you've got what it takes to make it in this rapidly changing world? Burnout looks a lot like depression, but it's not a biological bogeyman that medication or simple stress management can cure. It's a disorder of hope and will that sucks the life out of competent, idealistic, hardworking people like you; and it will be an ongoing challenge for you to take your power back! In this breakthrough work, Joan Borysenko, Ph.D.—a Harvard-trained medical scientist, psychologist, and renowned pioneer in stress and health—straddles psychology, biology, and soul in a completely fresh approach to burnout. Joan's deeply human (and often amusing) personal accounts of burnout and recovery; the science of helplessness, hopelessness, and empowerment; and the rich wisdom of people who have gone from fried to revived—including many of Joan's vibrant community of 5,000 Facebook Friends—make this powerful and practical book a must-read for our times.

The Story of Beautiful Girl Rachel Simon,2011-05-04 The most compelling, resonating novel I've read in years... A breathtakingly beautiful, yet heart-wrenchingly aching story that, despite its cruelty and humanity, uplifts the reader. - Omaha World-Herald NEW YORK TIMES BESTSELLER It is 1968. Lennie, a young white woman with a developmental disability, and Homan, an African American deaf man, are locked away in an institution, the School for the Incurable and Feeble-minded, and have been left to languish, forgotten. Deeply in love, they escape, and find refuge in the farmhouse of Martha, a retired schoolteacher and widow. But the couple is not alone-Lennie has just given birth to a baby girl. When the authorities catch up to them that same night, Homan escapes into the darkness, and Lennie is caught. But before she is forced back into the institution, she whispers two words to Martha: Hide her. And so begins the 40-year epic journey of Lennie, Homan, Martha, and baby Julia-lives divided by seemingly insurmountable obstacles, yet drawn together by a secret pact and extraordinary love.

Born to Bark Stanley Coren,2010-11-02 For Christmas the woman who would become my wife bought me a dog—a little terrier. The next year her Christmas gift to me was a shotgun. Most of the people in my family believe that those two gifts were not unrelated. So begins *Born to Bark*, the charming new memoir by psychologist and beloved dog expert Stan Coren of his relationship with an irrepressible gray Cairn terrier named Flint. Stan immediately loved the pup for his friendly nature and indefatigable spirit, though his wife soon found the dog's unpredictable exuberance difficult to deal with, to say the least. Even though Flint drove Stan's wife up the wall, he became the joy of Stan's life. The key to unlocking this psychologist-author's way of looking at dog behavior, Flint also became the inspiration behind Coren's classic, *The Intelligence of Dogs*. Undeterred by Flint's irrepressible behavior (and by the breeder's warning that he might be untrainable), Coren set out to prove that his furry companion could pass muster with the best of them. He persevered in training the unruly dog and even ventured into the competitive circles of obedience trials in dog shows, where Flint eventually made canine history as the highest-scoring Cairn terrier in obedience competition up to that time. (Stan chose not to tell his wife that the highest-ranking obedience dog of that year, a border collie, earned a total score that was fifty times higher.) The longest-running popular expert on human-dog bonding, Coren has enlivened his respected books and theories about dogs with accounts of his own experiences in training, living with, loving, and trying to understand them. A consummate storyteller, Coren now tells the wry, poignant, goofy, and good-hearted tale of his life with the dog who (in the words of his own book titles) taught him *How to Speak Dog* and *How Dogs Think* and whose antics made him ask *Why Does My Dog Act That Way?* Illustrated with Coren's own delightful line drawings and photos, and interwoven with his heartfelt anecdotes of other beloved dogs from his earlier life, *Born to Bark* is an irresistible good dog/bad dog tale of this extraordinary, willful pooch and his profound impact on his master's insights into canine behavior as a research psychologist and on his outlook on life as a whole.

Assessing the People's Liberation Army in the Hu Jintao Era Roy Kamphausen,David

Lai, Travis Tanner, 2014-06-14 It is my pleasure to introduce this 2013 publication by the Strategic Studies Institute (SSI) of the U.S. Army War College, the National Bureau of Asian Research (NBR), and the United States Pacific Command, focusing on A Retrospective of the People's Liberation Army in the Hu Jintao Era (2002-12). The papers in this book provide a valuable and insightful review of the People's Liberation Army's (PLA) many impressive advances over the past decade. Solid scholarship on changes taking place in the PLA helps us understand how the Chinese view the employment of military power to support broader policy aims. A historical review of patterns and developments in training, operations, acquisitions, and political military relations can greatly assist that understanding. The outstanding work in this jointly sponsored study is an important contribution toward this end. This volume provides unique insights into the PLA's achievements over the span of Hu Jintao's tenure...

The Pawprints of History Stanley Coren, 2002 In a rollicking, anecdote-rich collection, psychologist and canine authority Coren explores the historical contributions made by man's best friend. 20 photos throughout.

Learning from Megadisasters Federica Ranghieri, Mikio Ishiwatari, 2014-06-26 While not all natural disasters can be avoided, their impact on a population can be mitigated through effective planning and preparedness. These are the lessons to be learned from Japan's own megadisaster: the Great East Japan Earthquake of 2011, the first disaster ever recorded that included an earthquake, a tsunami, a nuclear power plant accident, a power supply failure, and a large-scale disruption of supply chains. It is a sad fact that poor communities are often hardest hit and take the longest to recover from disaster. Disaster risk management (DRM) should therefore be taken into account as a major development challenge, and countries must shift from a tradition of response to a culture of prevention and resilience. *Learning from Megadisasters: Lessons from the Great East Japan Earthquake* consolidates a set of 36 Knowledge Notes, research results of a joint study undertaken by the Government of Japan and the World Bank. These notes highlight key lessons learned in seven DRM thematic clusters—structural measures; nonstructural measures; emergency response; reconstruction planning; hazard and risk information and decision making; the economics of disaster risk, risk management, and risk financing; and recovery and relocation. Aimed at sharing Japanese cutting-edge knowledge with practitioners and decision makers, this book provides valuable guidance to other disaster-prone countries for mainstreaming DRM in their development policies and weathering their own natural disasters.

The Mathematical Sciences in 2025 National Research Council, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee on the Mathematical Sciences in 2025, 2013-06-13 The mathematical sciences are part of nearly all aspects of everyday life-the discipline has underpinned such beneficial modern capabilities as Internet search, medical imaging, computer animation, numerical weather predictions, and all types of digital communications. The Mathematical Sciences in 2025 examines the current state of the mathematical sciences and explores the changes needed for the discipline to be in a strong position and able to maximize its contribution to the nation in 2025. It finds the vitality of the discipline excellent and that it contributes in expanding ways to most areas of science and engineering, as well as to the nation as a whole, and recommends that training for future generations of mathematical scientists should be re-assessed in light of the increasingly cross-disciplinary nature of the mathematical sciences. In addition, because of the valuable interplay between ideas and people from all parts of the mathematical sciences, the report emphasizes that universities and the government need to continue to invest in the full spectrum of the mathematical sciences in order for the whole enterprise to continue to flourish long-term.

The Leadership Challenge James M. Kouzes, Barry Z. Posner, 1996-12-06 Completely revised and updated I not only enjoyed it...I found myself constantly nodding and saying to myself, 'That's right! That's how it's done! That's what it feels like!' You certainly captured the essence of what I've found is at the heart of transforming leadership. -- Robert D. Haas, chairman and CEO, Levi Strauss & Co. The leadership book that outshines them all, updated for today's new business realities. With an expanded research base of 60,000 leaders, this second edition captures the continuing interest in leadership as a critical aspect of human organizations. It offers a broader scope of leaders in every industry and walk of life, including the education and nonprofit fields, and examines the era's hottest issues -- the new cynicism, the electronic global village, evolving employee-employer relationships -- in keeping pace with our ever-changing world. The classic five-point guide to better leadership, however, remains as useful as ever.

Foresight for Science, Technology and Innovation Ian Miles, Ozcan Saritas, Alexander Sokolov, 2016-08-29 Decision-makers at all levels are being confronted with novel complexities and uncertainties and face long-term challenges which require foresight about long-term future prospects, assumptions, and strategies. This book explores how foresight studies can be systematically undertaken and used in this context. It explicates why and how methods like horizon scanning, scenario planning, and roadmapping should be applied when dealing with high levels of uncertainty. The scope of the book moves beyond "narrow" technology foresight, towards addressing systemic interrelations between social, technological, economic, environmental, and political systems. Applications of foresight tools to such fields as energy, cities, health, transportation, education, and sustainability are considered as well as enabling technologies including nano-, bio-, and information technologies and cognitive sciences. The approaches will be illustrated with specific actual cases.

Leave the Gun, Take the Cannoli Mark Seal, 2021-10-19 This "wickedly pacey page-turner" (Total Film) unfurls the behind-the-scenes story of the making of *The Godfather*, fifty years after the classic film's original release. The story of how *The Godfather* was made is as dramatic, operatic, and entertaining as the film itself. Over the years, many versions of various aspects of the movie's fiery

creation have been told—sometimes conflicting, but always compelling. Mark Seal sifts through the evidence, has extensive new conversations with director Francis Ford Coppola and several heretofore silent sources, and complements them with colorful interviews with key players including actors Al Pacino, James Caan, Talia Shire, and others to write “the definitive look at the making of an American classic” (Library Journal, starred review). On top of the usual complications of filmmaking, the creators of *The Godfather* had to contend with the real-life members of its subject matter: the Mob. During production of the movie, location permits were inexplicably revoked, author Mario Puzo got into a public brawl with an irate Frank Sinatra, producer Al Ruddy’s car was found riddled with bullets, men with “connections” vied to be in the cast, and some were given film roles. As Seal notes, this is the tale of a “movie that revolutionized filmmaking, saved Paramount Pictures, minted a new generation of movie stars, made its struggling author Mario Puzo rich and famous, and sparked a war between two of the mightiest powers in America: the sharks of Hollywood and the highest echelons of the Mob.” “For fans of books about moviemaking, this is a definite must-read” (Booklist).
