The Challenge of Improving Water and Sanitation Services in Less Developed Countries Dale Whittington, W. Michael Hanemann, Claudia Sadoff, Marc Jeuland, 2009 This paper argues that there are many challenges to designing and implementing water and sanitation interventions that actually deliver economic benefits to the households in developing countries. Perhaps most critical to successful water and sanitation investments is to discover and implement forms of service and payment mechanisms that will render the improvements worthwhile for those who must pay for them. In this paper, we argue that, in many cases, the conventional network technologies of water supply and sanitation will fail this test, and that poor households need alternative, non-network technologies. However, it will not necessarily be the case that specific non-network improved water supply and/or sanitation technologies will always be seen as worthwhile by those who must pay for them. We argue that there is no easy panacea to resolve this situation. For any intervention, the outcome is likely to be context-dependent. An intervention that works well in one locality may fail miserably in another. For any given technology, the outcome will depend on economic and social conditions, including how it is implemented, by whom, and often on the extent to which complementary behavioral, institutional and organizational changes also occur. For this reason, we warn against excessive generalization: one cannot, in our view, say that one intervention yields a rate of return of x% while another yields a return of y%, because the economic returns are likely to vary with local circumstances. More important is to identify the circumstances under which an intervention is more or less likely to succeed. Also for this reason, when we analyze a few selected water and sanitation interventions, we employ a probabilistic rather than a deterministic analysis to emphasize that real world outcomes are likely to vary substantially.

Mems Packaging Lee Yung-cheng, Cheng Yu-ting, Ramadoss Ramesh, 2018-01-03 MEMS sensors and actuators are enabling components for smartphones, AR/VR, and wearable electronics. MEMS packaging is recognized as one of the most critical activities to design and manufacture reliable MEMS. A unique challenge to MEMS packaging is how to protect moving MEMS devices during manufacturing and operation. With the introduction of wafer level capping and encapsulation processes, this barrier is removed successfully. In addition, MEMS devices should be integrated with their electronic chips with the smallest footprint possible. As a result, 3D packaging is applied to connect the devices vertically for the most effective integration. Such 3D packaging also paves the way for further heterogeneous integration of MEMS devices, electronics, and other functional devices. This book consists of chapters written by leaders developing products in a MEMS industrial setting and faculty members conducting research in an academic setting. After an introduction chapter, the practical issues are covered: through-silicon vias (TSVs), vertical interconnects, wafer level packaging, motion sensor-to-CMOS bonding, and use of printed circuit board technology to fabricate MEMS. These chapters are written by leaders developing MEMS products. Then, fundamental issues are discussed, topics including encapsulation of MEMS,

heterogenous integration, microfluidics, solder bonding, localized sealing, microsprings, and reliability. Contents: Introduction to MEMS Packaging (Y C Lee, Ramesh Ramadoss and Nils Hoivik)Silex's TSV Technology: Overview of Processes and MEMS Applications (Tomas Bauer and Thorbjörn Ebefors)Vertical Interconnects for High-end MEMS (Maaïke M Visser Taklo and Sigurd Moe)Using Wafer-Level Packaging to Improve Sensor Manufacturability and Cost (Paul Pickering, Collin Twanow and Dean Spicer)Nasiri Fabrication Process for Low-Cost Motion Sensors in the Consumer Market (Steven Nasiri, Ramesh Ramadoss and Sandra Winkler)PCB Based MEMS and Microfluidics (Ramesh Ramadoss, Antonio Luque and Carmen Aracil)Single Wafer Encapsulation of MEMS Resonators (Janna Rodriguez and Thomas Kenny)Heterogeneous Integration and Wafer-Level Packaging of MEMS (Masayoshi Esashi and Shuji Tanaka)Packaging of Membrane-Based Polymer Microfluidic Systems (Yu-Chuan Su)Wafer-Level Solder Bonding by Using Localized Induction Heating (Hsueh-An Yang, Chiung-Wen Lin and Weileun Fang)Localized Sealing Schemes for MEMS Packaging (Y T Cheng, Y C Su and Liwei Lin)Microsprings for High-Density Flip-Chip Packaging (Eugene M Chow and Christopher L Chua)MEMS Reliability (Chien-Ming Huang, Arvind Sai SarathiVasan, Yunhan Huang, Ravi Doraiswami, Michael Osterman and Michael Pecht) Readership: Researchers and graduate students participating in research, R&D, and manufacturing of MEMS products; professionals associated with the integration for systems represented by smartphones, AR/VR, and wearable electronics. Keywords: MEMS;Packaging;Microelectromechanical Systems;Reliability;Microstructures;Sensors;ActuatorsReview: Key Features: The book covers engineering topics critical to product development as well as research topics critical to integration for future MEMS-enabled systemsIt is a major resource for those participating in MEMS and for every professional associated with the integration for systems represented by smartphones, AR/VR and wearable electronics

At the end of the line Georgina Sinclair,2017-03-01 Colonial policing and the imperial endgame is the first comprehensive study of the colonial police and their complex role within Britain's long and turbulent process of decolonisation, a time characterised by political upheaval and colonial conflict. The Colonial Police Service was created in 1936 in order to standardise all imperial police forces and mould colonial policing to the British model. From the British Caribbean to the Middle East, the Mediterranean to British Colonial Africa and on to Southeast Asia, colonial police forces struggled with the unrest and conflict that stemmed from Britain's withdrawal from its empire. As the shadow of decolonisation grew ever longer, so colonial police forces reverted back to their traditional role as a colony's first line of defence. At the same time, as tensions increased throughout the empire, so too did the power of the police through the development of police intelligence systems and counter-insurgency units. Colonial policing and the imperial endgame controversially asserts that it was coercion rather than consent which was more commonly associated with the work of police forces during this period of political dislocation. Georgina Sinclair's focussed study of colonial policing during this period facilitates a greater understanding of the processes of decolonisation.

No known political or social objective, but has proven treacherous when retained by government in the past. The Atlantic World D'Maris Coffman, Adrian Leonard, William O'Reilly, 2014-12-05 As the meeting point between Europe, colonial America, and Africa, the history of the Atlantic world is a constantly shifting arena, but one which has been a focus of huge and vibrant debate for many years. In over thirty chapters, all written by experts in the field, *The Atlantic World* takes up these debates and gathers together key, original scholarship to provide an authoritative survey of this increasingly popular area of world history. The book takes a thematic approach to topics including exploration, migration and cultural encounters. In the first chapters, scholars examine the interactions between groups which converged in the Atlantic world, such as slaves, European migrants and Native Americans. The volume then considers questions such as finance, money and commerce in the Atlantic world, as well as warfare, government and religion. The collection closes with chapters examining how ideas circulated across and around the Atlantic and beyond. It presents the Atlantic as a shared space in which commodities and ideas were exchanged and traded, and examines the impact that these exchanges had on both people and places. Including an introductory essay from the editors which defines the field, and lavishly illustrated with paintings, drawings and maps this accessible volume is invaluable reading for all students and scholars of this broad sweep of world history.

Inside the Mind of Toyota Satoshi Hino, 2005-11-28 Winner of a Shingo Research and Professional Publication Award Toyota's sustained growth attracts the attention of economists and industrialists around the world eager to learn the secrets of Toyota's lasting success. In *Inside the Mind of Toyota: Management Principles for Enduring Growth*, Satoshi Hino examines the source of Toyota's strength: the fundamental thinking and management structures that lie beneath the creation of its famed Toyota Production System. From the perspective of a professional with 30 years experience in the auto industry, Hino presents a fresh and detailed analysis of Toyota's essential management system, from its very beginnings into the 21st century. The ultimate goal is not simply to mimic Toyota's formula, but to learn from it and, in doing so, surpass it. From the Translator's Foreword: Unlike most Toyota watchers, Hino urges us to set our sights not on replicating Toyota's success, but on surpassing it. This point is crucial, because it moves our attention away from slavish imitation of what is visible on the surface and challenges us to tap into deeper and more powerful mechanisms of excellence. This is not a cookbook and it is not 'Toyota Lite.' It deserves serious study, application and experimentation. Learn how Toyota thinks, Hino is telling us. Learn Toyota's strengths, make them your own and then exceed them. —Andrew Dillon, September

Means of Exchange Dagfinn Skre,2008 This second volume, based on the excavations of the Viking town Kaupang 2000-2003, presents find types used in economic transactions - coins, hacksilver, ingots, weights and balances. Changes in type and volume of economic transactions at Kaupang and in Scandinavia are discussed, and the economic mentality of Viking crafts- and tradesmen is explored. Earlier, the study of Viking silver currency was based mainly on hoards containing coins and hacksilver. In this volume, the combined study of the find types mentioned, as well as the sophisticated chronology of settlements finds from sites like Kaupang, gives a completely new insight into economy and exchange. In the early 9th century, silver and goods seem to have come to Kaupang mainly from the Carolingian world. Silver, weighed with locally produced lead weights, was used as currency on a limited scale. The old e unit was easily convertible to Carolingian units. After the mid-9th century this early system was altered. The increased availability of silver caused by the import of Islamic coins, as well as the introduction in most of Scandinavia in the 860s/870s of standardized weights of probable Islamic origin, paved the way from then on for an increasing use of silver as payment. These studies demonstrate that sites like Kaupang led the way in economic development in Scandinavia. The urban environment promoted an economic mentality which contributed significantly to the fundamental transformation of Scandinavian culture and society, which culminated in the region's integration in Christian Europe in the High Middle Ages.

Colonial Policing and the Imperial Endgame 1945-1980 Georgina Sinclair,2006 Colonial Policing and the Imperial Endgame is the first comprehensive study of the colonial police and their complex role within Britain's long and turbulent process of decolonisation, a time characterised by political upheaval and colonial conflict.
