Recording Studio Design Philip Newell,2013-04-26 Philip Newell's comprehensive reference work contains pearls of wisdom which anyone involved in sound recording will want to apply to their own studio design. He discusses the fundamentals of good studio acoustics and monitoring in an exhaustive yet accessible manner. Recording Studio Design covers the basic principles, their application in practical circumstances, and the reasons for their importance to the daily success of recording studios. All issues are approached from the premise that most readers will be more interested in how these things affect their daily lives rather than wishing to make an in-depth study of pure acoustics. Therefore frequent reference is made to examples of actual studios, their various design problems and solutions. Because of the importance of good acoustics to the success of most studios, and because of the financial burden which failure may impose, getting things right first time is essential. The advice contained in Recording Studio Design offers workable ways to improve the success rate of any studio, large or small.

Recording Studio Design Philip Richard Newell,2008 Essential for anyone building, renovating or maintaining a recording studio; includes 3 whole new chapters on foldback, electrical supplies and analogue interfacing; new sections on cinema soundtrack mixing rooms and TV voice rooms. Covering acoustics, electro-acoustics and psychoacoustics Newell uses real world studios, their problems and solutions, to provide the foundations for successful studio design and maintenance. -back cover.

RA The Book Vol 1 Roger D'Arcy,Hugh Flynn,2015-02-02 RA:The Book - The Recording Architecture Book of Studio Design was first published as a single, hardcover volume in 2011 and which has sold in over fifty countries to critical acclaim. A necessarily

large format dictated by the detailed drawings it contained, RA:The Book was unavoidably heavy and costly to produce and ship. This iBook version is the first of three stand alone volumes which will hopefully make this essential guide to recording studio design more accessible. It includes a new introduction with previously unavailable photographs. The following description is for the original hardcover: Established by Roger D'Arcy and Hugh Flynn on April 1st 1987 Recording Architecture has risen to become one of the premier recording studio design companies in the world. First Commissioned by ex Def Leppard guitarist Pete Willis for Blue Room studios In Sheffield swiftly followed by projects such as Hulgrave Hall, for composer Keith Hopwood the company has grown to design key installations around the world. Now for the first time they will be publishing a history of these ground breaking designs covering all aspects of architectural, acoustic and interior design of these studios and spaces specifically related to sound on a project by project basis. In a Career spanning Three decades Recording Architecture has virtually unrivalled experience in the design of studios which range in size and purpose from classical orchestral, residential, mixing, mastering, post production, film dubbing, video editing and rehearsal studios over 40 countries worldwide. Stating his desire to expand awareness with the new book Roger D Arcy states Over the years, and perhaps surprisingly, the only available books on recording studio design seem to have been written by individuals with little or no qualified background in Architecture or design in the field - we are trying show the detailed architectural/acoustic input behind a successful design with each studio study showing drawings in large format . This is not a theoretical guide but a detailed presentation of tried and tested techniques as applied to real, built projects in many of the case studies, the actual drawings issued for construction are reproduced. The examples illustrate not only what we think should be done but what was in fact physically (and successfully) implemented in a wide variety of situations from small, private project studios to large, commercial land mark studios such as Lansdowne and CTS. Examples range in scope from individual spaces and rooms to multi studio facilities and cover the two principal strands of recording and mixing: MUSIC studios recording (tracking), mixing and mastering (including cutting) project to orchestral in scale examples have been taken from the private, commercial and educational sectors. POST PRODUCTION studios voice over (dubbing), FX recording (Foley), film mix studios (dubbing theatres) from small voice over studios for TV to large Dolby Premier Certified film mix theatres. Contents include hundreds of photographs together with detailed plans and construction drawings - including comprehensive specifications of materials and techniques - showing exactly how these environments were created.

Design Studio Vol. 1: Everything Needs to Change Sofie Pelsmakers,Nick Newman,2021-03-31 Want to keep up with emerging design thinking and issues worldwide? Design Studio is a new thematic series that distils the most topical work and ideas from schools and practices globally. The first volume launches with a statement: Everything Needs to Change. Exploring architecture and the climate emergency, editors Sofie Pelsmakers (author of Environmental Design Sourcebook) and Nick Newman (climate activist and Director at Studio Bark), are channelling the message of Greta Thunberg to inspire, enthuse and inform the next generation of architects. Featuring articles, building profiles and case studies from a range of leading voices, it explores solutions to climatic, environmental and social challenges. It urges readers to radically rethink what it means to be an architect in an era of climate crisis, and what the role of the architect is or can be. Discover how using local materials, working with nature, radical design processes, transformative learning and activism can help us find hope in the burning world. Together, we can force change for a more sustainable and equitable tomorrow. This first volume is produced in four unique fluorescent colours – green, red, yellow and purple – to be your own poster for change.
