**Stykz** Hardmod Carlyle Nicolao,2012-01 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Stykz is a freeware multi-platform stick-figure animation program, developed and maintained by Sons of Thunder Software, Inc. It is similar to the popular Pivot Stickfigure Animator and builds upon many of the features from it, also adding its own functionality. Version 1.0 for Windows and Macintosh has been recently released. A version for Linux is being developed and is in an internal beta phase, and will be released as a Public Beta when it is ready. Near the middle of 2007, Ken Ray, a freelance software developer and consultant, began writing Stykz after discovering the limitations of Pivot, and the fact that there was no solution available for Macintosh users.

*Multimídia digital na escola* Elenice Larroza Andersen,2016-05-09 O que é produção multimídia? Como trabalhar com essas produções de forma real em sala de aula? Que softwares estão disponíveis gratuitamente para esse trabalho? Como avaliar as produções em multimídia dos alunos? Essas são algumas questões que este livro procura ajudar o professor a responder. As condições tecnológicas da atualidade põem à disposição uma gama variada de recursos para a produção de gêneros que integram palavra, imagem, som e movimento. Com a ampliação da oferta de serviços de banda larga de Internet, impulsionou-se o acesso a esses recursos e, hoje, presenciamos um aumento expressivo de produções em multimídia. E produzir em multimídia não é mais uma ação restrita a profissionais especializados, mas é uma realidade também para os nossos alunos. Na sociedade contemporânea, presenciamos um processo de inclusão baseado no acesso aos meios de comunicação de massa e à internet. Por isso, uma educação de qualidade requer o uso de tecnologias da informação e da comunicação no processo de ensino-aprendizagem. Nessa perspectiva, o livro Multimídia Digital na Escola reúne estudos sobre a inserção de novas tecnologias no ambiente escolar, explorando várias estratégias de uso do computador para a produção multimídia na educação básica. Na contramão de publicações excessivamente teóricas e utópicas sobre o uso dessas novas tecnologias, os textos aqui apresentados relacionam teoria a práticas reais em sala de aula. Seu diferencial consiste em discutir, de modo acessível ao professor, experiências autênticas de desenvolvimento de projetos de ensino, em contextos escolares diversos, a partir do uso de softwares livres, ampliando o leque de possibilidades reais de uso dessas ferramentas nas escolas. Apresenta, ainda, estudos que auxiliam o professor na escolha de softwares livres para a sala de aula e no processo de avaliação das produções multimídia de seus alunos.

Multiple Intelligences in the Classroom, 4th Edition Thomas Armstrong,2017-11-22 In the decades since it was first introduced, Howard Gardner's multiple intelligences (MI) theory has transformed how people think about learning the world over. Educators using the theory have achieved remarkable success in helping all students, including those who learn in nontraditional ways, to navigate school (and life outside it) with confidence and success. Within the context of classroom instruction, no author besides Gardner has done more to popularize MI theory than Thomas Armstrong, whose best seller *Multiple Intelligences in the Classroom* has become a bona fide education classic in its own right. This expanded fourth edition provides educators at all levels with everything they need to apply MI theory to curriculum development, lesson planning, assessment, special education, cognitive skills, career development, educational policy, and more. In addition to the many strategies, templates, and examples that have made Armstrong's book so enduringly popular, this edition is updated to examine how emerging neurodiversity research, trends toward greater instructional personalization, and rapidly evolving virtual learning tools have affected the use of MI theory to enhance student achievement. It also includes brand-new lesson plans aligned to nationwide standards and a revised list of resources for further study.

**La realidad audiovisual como nuevo vehículo de comunicación** José Muñoz Jiménez, Silvia Martínez Martínez, Beatriz Peña Acuña, 2019-04-18 La Universidad se encuentra en pleno progreso desde su tiempo cero; de hecho, halla su carta de naturaleza en la necesidad de mejorar el medio que la nutre y por y para el que existe: la sociedad. Rompiendo las viejas membranas de la enseñanza imperante hasta el siglo XX, las nuevas (r)evoluciones de contenidos y fórmulas, como lo fuera el EEES (o Plan Bolonia) o las TIC, suponen la respuesta a esas actualizadas necesidades docentes y curriculares. Las Humanidades, las Artes, las Ciencias sociales y la Docencia se reescriben, hibridando, gracias a los nuevos lenguajes y herramientas, contenidos otrora lejanos. La nueva Academia es poliédrica, ínter y multidisciplinar, dialógica y colaborativa. En este estado de cosas la colección Herramientas universitarias se erige como atalaya para agrupar bajo su égida al más amplio conjunto de autores internacionales que iluminen, con sus investigaciones, la panoplia de contenidos que conforman el mundo científico donde nace el futuro. La calidad intelectual queda refrendada mediante la rigurosa implantación del habitual proceso garante, basado en la revisión o arbitraje por pares ciegos (peer review) de estos capítulos, sin renunciar a la más antigua tradición universitaria que obliga al opositor de lo publicado, a soportar el peso de la prueba. Este doble modelo de evaluación, a priori y a posteriori, garantiza la calidad del contenido de los textos de esta colección. Pertenecer a la Academia, y en ello radica orgullosamente su valía, supone que todos sus miembros responden a una ambición irrenunciable: mostrar que el conjunto de sus trabajos conforma la vanguardia científica internacional. El texto que aquí

se presenta está auspiciado por el Fórum Internacional de Comunicación y Relaciones Públicas (Fórum XXI), la Sociedad Española de Estudios de la Comunicación Iberoamericana (SEECI), la Asociación cultural Historia de los Sistemas Informativos y el Grupo Complutense (nº 931.791) de Investigación en Comunicación Concilium.
