Spiekermann, 2012-10-29 This volume serves up a combination of broad questions, theoretical approaches, and manifold case studies to explore how people have sought to understand markets and thereby reduce risk, whether they have approached this challenge with a practical view based on their own business acumen or used the tools of scholarship.

Have you been diagnosed with a so-called incurable pain condition such as herniated discs, arthritis, multiple sclerosis, migraine, nerve damage, or fibromyalgia? This unique natural pain relief guide integrates mind, body, and spirit in the healing process, and can help you discover multiple natural pain relief strategies you can use to heal your pain - with or without your doctor's consent; use cutting-edge energy tools to quickly reduce or eliminate pain symptoms within minutes; reduce and reverse the inflammation in your body caused by stress, toxins and trauma; rewire your brain and nervous system in order to reactivate your body's innate healing potential; harness the power of the mind to remove obstacles to healing; and reconnect with your Spirit and Higher Self so that you can experience healing as a joyful journey. "Guide to Healing Chronic Pain is an absolute must-read not only for anyone suffering from chronic pain, but also for anyone wanting to stay perfectly healthy for the rest of his or her life. In the book, Dr. Karen Kan has set a new precedent of health care for Western physicians to follow in the twenty-first century and beyond. Taking the reader on a thorough exploration of drug-free, innovative, and alternative medicine modalities such as infrared nanotechnology patches (acupuncture without needles), grounding, energy healing, nutritional therapy, Qi and nervous system balancing, detoxification, and EMF pollution shielding, Dr. Kan synthesizes ancient Eastern healing techniques with cutting-edge science. Dr. Kan's balanced 'Spirit-Mind-Body' approach to healing chronic pain is not only revolutionary but is exactly what is needed now in Western medicine. Dr. Karen Kan is indeed a role model for the Next Human physician." -Jason Lincoln Jeffers, spiritual teacher and author of *The Next Human*

Swift Viewing Charles R. Acland, 2012-01-02 Acland looks back at the strange history of subliminal seduction: a theory first propagated in the late 1950s by marketing researcher James Vicary, who claimed that movie audiences bought more refreshments if advertising messages too quick to be noticed were inserted into movies. The study was soon proven false, but that hasn't kept the concept from having a long afterlife in the popular imagination.

21st Century Dead Christopher Golden, 2012-07-17 The Stoker-award winning editor of the acclaimed, eclectic anthology *The New Dead* returns with *21st Century Dead*, and an all-new lineup of authors from all corners of the fiction world, shining a dark light on our fascination with tales of death and resurrection... with ZOMBIES! The stellar stories in this volume includes a tale set in the world of Daniel H. Wilson's *Robopocalypse*, the first published fiction by *Sons of Anarchy* creator Kurt Sutter, and a tale of love, family, and resurrection from the legendary Orson Scott Card. This new volume also includes stories also from other award-winning and New York Times bestselling authors, such as: Simon R. Green, Chelsea Cain, Jonathan Maberry, Duane Swierczynski, Caitlin Kittredge, Brian Keene, Amber Benson, John Skipp, S. G. Browne, Thomas E. Sniegowski, Hollywood screenwriter Stephen Susco, National Book Award nominee Dan Chaon, and more!

Informational and Decisional Privacy Madeleine Schachter, 2003 *Informational and Decisional Privacy* explores conceptualizations of privacy rights and interests. Part I covers fundamental principles of privacy law, tracing the historical evolution of privacy rights and reviewing common law and constitutional analytical models. Part II deals with access to information, including through the Internet, considering interests in transparency and

self-regulatory, regulatory, and legislative regimes; access to various types of information (such as to information pertaining to identity, healthcare, communicative attributes, and governmental data and records); and unsolicited access (such as the receipt of subliminal messages and spam e-mail communications). Part III discusses disclosure of information, in the context of false statements, publication of accurate but highly embarrassing facts, and breaches of confidence. Duties to disclose information, in the context of informed consent and in the face of an imminent peril, also are reviewed, as are proprietary interests in private information and in somatic matter. Part IV explores autonomous decision-making, focusing on reproductive and procreative issues, including regulation of contraceptives and abortion; and end of life issues, including decisions to refuse life-saving treatment, requests for physician-assisted suicide, and efforts by proxies to withdraw or withhold life supporting measures. Informational and Decisional Privacy is designed to be used as a prerequisite or sequel to Law of Internet Speech, also by Madeleine Schachter. Separate teacher's manuals accompany both texts.

In the Mind's Eye National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Techniques for the Enhancement of Human Performance, 1992-02-01 The archer stands and pulls back the bow, visualizing the path of the arrow to the target. Does this mental exercise enhance performance? Can we all use such techniques to improve performance in our daily lives? In the Mind's Eye addresses these and other intriguing questions. This volume considers basic issues of performance, exploring how techniques for quick learning affect long-term retention, whether an expert's behavior can serve as a model for beginners, if team performance is the sum of individual members' performances, and whether subliminal learning has a basis in science. The book also considers meditation and some other pain control techniques. Deceit and the ability to detect deception are explored in detail. In the area of self-assessment techniques for career development, the volume evaluates the widely used Myers-Briggs Type Indicator.

The Hidden Persuaders Vance Packard, 2007 A discussion of how modern advertising attempts to control our thoughts and desires in order to make us buy the products it produces. Exploring the use of consumer motivational research and other psychological techniques, including subliminal tactics, this book shows how advertisers secretly manipulate mass desire for consumer goods and products. In addition, Packard also discusses advertising in politics, predicting the way image and personality rapidly came to overshadow real issues in the televised age.

Digital Modernism Jessica Pressman, 2014-01-03 While most critical studies of born-digital literature celebrate it as a postmodern art form with roots in contemporary technologies and social interactions, Digital Modernism provides an alternative genealogy. Grounding her argument in literary history, media studies, and the practice of close-reading, Jessica Pressman pairs modernist works by Ezra Pound, James Joyce, and Bob Brown, with major digital works like William Poundstone's Project for the Tachistoscope {Bottomless Pit}, Young-hae Chang Heavy Industries's Dakota, and Judd Morrissey's The Jew's Daughter to demonstrate how the modernist movement of the 1920s and 1930s laid the groundwork for the innovations of electronic literature. Accordingly, Digital Modernism makes the case for considering these digital creations as literature and argues for the value of reading them carefully, closely, and within literary history.

Buyology Martin Lindstrom, 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.
