Essay on the Creative Imagination Théodule Ribot,1906

Everyday Creativity and the Healthy Mind Ruth Richards,2018-08-20 As human beings we all have creative potential, a quality essential to human development and a vital component to healthy and happy lives. However this may often remain stifled by the choices we make, or ways in which we choose to live in our daily lives. Framed by the “Four Ps of Creativity” – product, person, process, press – this book offers an alternative understanding of the fundamentals of ordinary creativity. Ruth Richards highlights the importance of “process”, circumventing our common preoccupation with the product, or creative outcome, of creativity. By focusing instead on the creator and the creative process, she demonstrates how we may enhance our relationships with life, beauty, future possibilities, and one another. This book illustrates how our daily life styles and choices, as well as our environments, may enable and allow creativity; whereas environments not conducive to creative flow may kill creative potential. Also explored are questions of ‘normality’, beauty and nuance in creativity, as well as creative relationships.

From India to the Planet Mars Theodore Flournoy,2015-03-08 A classic in the field of psychology, *From India to Planet Mars* (1900) depicts the remarkable multiple existence of the medium Hélène Smith, who claimed to be the reincarnation of Marie Antoinette, of a Hindu princess from fifteenth-century India, and of a regular visitor to Mars, whose landscapes she painted and whose language she appeared to speak fluently. Through a psychological interpretation of these fantasies, which consisted in the subliminal elaboration of forgotten memories, Théodore Flournoy vastly extended the scope and understanding of the unconscious, and in particular, of its creative and mythopoetic capacities. In the introduction to this work, Sorriu Shamdasani evokes the rich cultural and intellectual setting which Flournoy published his findings, and discusses their impact on Freud, Jung, and other pioneers psychology. Originally published in 1994. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. Hélène Smith Claudie Massicotte,2023-06-20 In 1896, a young Genevan medium named Hélène Smith perceived in trance the following words from a Martian inhabitant: michma michtmon mimini thouainenm mimatchineg. Those attending her séance dutifully transcribed these words and the event marked the beginning of a series of occult experiences that transported her to the red planet. In her state of trance, Smith came to produce foreign conversations, a new alphabet, and paintings of the Martian surroundings that captured the popular and scientific imagination of Geneva. Alongside her Martian travels, she also retrieved memories of her past lives as a fifteenth-century Hindoo princess and as Queen Marie Antoinette. Today, Smith's séances may appear to be nothing more than eccentric practices at the margins of modernity. As author Claudie Massicotte argues, however, the medium came to embody the extreme possibilities of a new form of subjectivity, with her séances becoming important loci for pioneering authors' discoveries in psychology, linguistics, and the arts. Through analyses of archival documents, correspondences, and publications on the medium, Massicotte sheds light on the role of women in the construction of turn-of-the-century psychological discourses, showing how Smith challenged traditional representations of female patients as powerless victims and passive objects of powerful doctors. She shows how the medium became the site of conflicting theories about subjectivity--specifically one's relationship to embodiment, desire, language, art, and madness--while unleashing a radical form of creativity that troubled existing paradigms of modern sciences. Massicotte skillfully retraces the story of this prolific figure and the authors, scientists, and artists she inspired in order to bring to light a forgotten chapter in modern intellectual history.

Psychotherapy of the Combat Veteran Harvey J. Schwartz, 2012-12-06 AN OVERVIEW OF THE PSYCHOANALYTIC APPROACH TO THE WAR NEUROSES The survivors of traumatic events have long been known to suffer psychological sequelae. Of all possible stressors, combat is one of the most devastating. Wartime exposes its victim to a myriad of stimuli that are far beyond those of civilized life. The impact that remains can affect generations to come. In recent years there has been a paucity of research on the long term effects of battle. Particularly after the recent war there was initially an inclination to minimize the psychological impact of combat. It was only after concerted effort by a few dedicated clinicians that formal recognition was granted to the current version of the war neuroses. In the parlance of the day it was called the Post traumatic Stress Disorder (Figley, 1978). This phenomenologic diagnosis has been instrumental in bringing the necessary attention to this condition. Its applicability has been tested across a wide range of stressors, from man-made to natural. Few workers in the field now doubt the power of traumatic events to leave a profound impression on the victim. Contrary to previous thought, it has now been found that this imprint often becomes a chronic scar. Copyright © 1984 by Spectrum Publications, Inc. *Psychotherapy of the Combat Veteran*, edited by H. The Oxford Handbook of William Wordsworth Richard Gravil, Daniel Robinson, 2015-01-22 The Oxford Handbook of William Wordsworth deploys its forty-eight original essays, by an international team of scholar-critics, to present a stimulating account of Wordsworth's life and achievement and to map new directions in criticism. Nineteen essays explore the highlights of a long career systematically, giving special prominence to the lyric Wordsworth of Lyrical Ballads and the Poems in Two Volumes and to the blank verse poet of 'The Recluse'. Most of the other essays return to the poetry while exploring other dimensions of the life and work of the major Romantic poet. The result is a dialogic exploration of many major texts and problems in Wordsworth scholarship. This uniquely comprehensive handbook is structured so as to present, in turn, Wordsworth's life, career, and networks; aspects of the major lyrical and narrative poetry; components of 'The Recluse'; his poetical inheritance and his transformation of poetics; the variety of intellectual influences upon his work, from classical republican thought to modern science; his shaping of modern culture in such fields as gender, landscape, psychology, ethics, politics, religion and ecology; and his 19th- and 20th-century reception-most importantly by poets, but also in modern criticism and scholarship.

700 Conscientiology Experiments Waldo Vieira, 2018-08-22 A reference work on conscientiology, this treatise, with more than 5,000 entries in the bibliography, first published in Portuguese in 1994, presents the reader with the bases of the neoscience conscientiology. The author proposes 300 tests for self-application, dealing with topics of great relevance such as assistance, the theory of thosene (thought, sentiment and energy), and the theories of inversion and existential recycling, among others. The work presents conscientiology as the science applied to the study of consciousness (ego, personality) in an integral approach, with all its vehicles of manifestation (bodies), previous existences and attributes. The content being deepened and presented in a theoretical and practical way, so a reader understands the importance of this knowledge to their life. The science of conscientiology utilizes the best of the main lines of human knowledge: common sense, religion, philosophy, political ideology and conventional science; and is based on multidimensional self-experience, having consciousness as both the instrument and object of research.

The Ashgate Research Companion to Minimalist and Postminimalist Music Keith Potter, Kyle Gann, 2016-03-23 In recent years the music of minimalist composers such as La Monte Young, Terry Riley, Steve Reich and Philip Glass has, increasingly, become the subject of important musicological reflection, research and debate. Scholars have also been turning their attention to the work of lesser-known contemporaries such as Phill Niblock and Eliane Radigue, or to second and third generation minimalists such as John Adams, Louis Andriessen, Michael Nyman and William Duckworth, whose range of styles may undermine any sense of shared aesthetic approach but whose output is still to a large extent informed by the innovative work of their minimalist predecessors. Attempts have also been made by a number of academics to contextualise the work of composers who have moved in parallel with these developments while remaining resolutely outside its immediate environment, including such diverse figures as Karel Goeyvaerts, Robert Ashley, Arvo Pärt and Brian Eno. Theory has reflected practice in many respects, with the multimedia works of Reich and Glass encouraging interdisciplinary approaches, associations and interconnections. Minimalism's role in culture and society has also become the subject of recent interest and debate,

complementing existing scholarship, which addressed the subject from the perspective of historiography, analysis, aesthetics and philosophy. The Ashgate Research Companion to Minimalist and Postminimalist Music provides an authoritative overview of established research in this area, while also offering new and innovative approaches to the subject.

The Brain Sell Dr. David Lewis, 2013-09-23 Science has made the leap from the lab to come to a store near you and the effects on us are phenomenal. Corporations in hyper-competition are now using the new mind sciences to analyze how and when we shop, and the hidden triggers that persuade us to consume. From bargains in the Big Apple to the bustling bazaars of Istanbul, from in-store to interactive and online to mobile, neuromarketing pioneer Dr. David Lewis goes behind the scenes of the persuasion industry to reveal the powerful tools and techniques, technologies and psychologies seeking to stimulate us all to buy more often without us consciously realizing it.
